## **Rationality And Relativism:**

Rationality and Relativism Martin Hollis, Steven Lukes, 1982 The contributors represent the complete spectrum of positions between a relativism that challenges the very concept of a single world and the idea that there are ascertainable objective universals *Rationality and Relativism* Martin Hollis, Steven Lukes, 1982-01 *Rationality and Relativism* I.C. Jarvie, 2015-07-03 Anthropology revolves round answers to problems about the nature development and unity of mankind problems that are both philosophical and scientific In this book first published in 1984 Professor Jarvie applies Popper's philosophy of science to understanding the history and theory of anthropology Jarvie describes how the ancient view that the aim of science and philosophy was to get at the truth is challenged in anthropology by the doctrine of cultural relativism that is that truth varies with the cultural framework He shows how philosophers as various as Peter Winch W V O Quine W T Jones Nelson Goodman and Richard Rorty were influenced by this doctrine Yet these philosophers also accept the value of rational argument Jarvie believes that there is a contradiction between relativism and any notion of human rationality that centres around argument Forced by the contradiction to choose between rationality and relativism he argues strongly that logical scientific and moral considerations favour rationality and urge repudiation of relativism The central argument of the book is that relativism is intellectually disastrous and has fostered intellectual attitudes from which anthropology still suffers

Rationality, Relativism and the Human Sciences Joseph Margolis, Michael Krausz, R. Burian, 1986-10-31 The Greater Philadelphia Philosophy Consortium was launched in the early eighties It began during a particularly lean period in the American economy But its success is linked as much to the need to be in touch with the rapidly changing currents of the philosophical climate as with the need to insure an adequately stocked professional community in the Philadelphia area faced perhaps permanently with the threat of increasing attrition The member schools of the Consortium now include Bryn Mawr College the University of Pennsylvania Temple University and Villanova University that is the schools of the area that offer advanced degrees in philosophy The philosophy faculties of these schools form the core of the Consortium which offers graduate students the instructional and library facilities of each member school The Consortium is also supported by the associated faculties of other regional schools that do not offer advanced degrees notably those at Drexel University Haverford College La Salle University and Swarthmore College both philosophers and members of other departments as well as interested and professionally qualified persons from the entire region The affiliated and core professionals now number several hundreds and the Consortium's various ventures have been received most enthusiastically by the academic community At this moment the Consortium is planning its fifth year of what it calls the Conferences on the Philosophy of the Human Studies Rationality, Relativism and Incommensurability Howard Sankey, 2018-12-21 First published in 1997 this volume brings together a series of essays on the philosophy of science and responds to the crisis of rationality which evolved from the denial of both a stable methodology and a common language for science Howard Sankey holds that important

insights about scientific methodology and rationality may be gleaned from the historical approach from which the existence of profound conceptual change in science as well as the absence of a neutral observation language are important findings Half of Sankey's essays concentrate specifically on the thesis that alternative scientific theories are incommensurable due to semantic differences between the vocabulary in which they are expressed Several others seek to derive a new way of thinking about scientific rationality from the historical critique of the idea of a fixed scientific method Still others demonstrate how some seemingly relativistic themes of the historical approach may be embraced in a non relativistic manner within the context of a pluralistic and naturalistic theory of scientific methodology and rationality *Rationality, Relativism and the Human Sciences* Joseph Margolis, A.S. Gunnell,1998-08-06 In this insightful book distinguished political scientist John G Gunnell explores the relationship between social science and philosophy and the range of problems that have attended this relationship Gunnell argues that social science has turned to philosophy especially to areas such as the philosophy of science and other sites of philosophical

foundationalism in search of cognitive identity and the grounds for normative and empirical judgment Gunnell's emphasis is on political and social theory and the theoretical constitution of social phenomena The Orders of Discourse will be of interest to political theorists political philosophers and social scientists      Scientific Realism and the Rationality of Science Howard Sankey, 2016-04-01 Scientific realism is the position that the aim of science is to advance on truth and increase knowledge about observable and unobservable aspects of the mind independent world which we inhabit This book articulates and defends that position In presenting a clear formulation and addressing the major arguments for scientific realism Sankey appeals to philosophers beyond the community of typically Anglo American analytic philosophers of science to appreciate and understand the doctrine The book emphasizes the epistemological aspects of scientific realism and contains an original solution to the problem of induction that rests on an appeal to the principle of uniformity of nature      Unapologetic Theology William C.
