Rationing Medicine:

Rationing Medicine Robert H. Blank, 1989-11-17 *Rationing Medicine* Eric Matthews, Elizabeth Russell, 2018-10-08 *Rationing Medical Care on the Basis of Age* explores this highly topical issue and presents a critical argument on the nature of the possible crisis. Its in-depth philosophical analysis of the main ethical positions adopts an interdisciplinary and international approach. This book is important reading for healthcare policy makers and shapers and healthcare managers. Academics in ethics, philosophy, economics, and all healthcare disciplines will find it useful, as will public health specialists, health economists, and social scientists with an interest in health and medicine. The authors of this book have opened up significant new perspectives on many important issues which in practice confront politicians, managers, professionals, patients, and the public today. They have done this moreover in a way that is highly accessible to a non-specialist readership.

Rationing and Resource Allocation in Healthcare Ezekiel Emanuel, Harald Schmidt, Andrew Steinmetz, 2018-05-10 *Rationing and Resource Allocation in Healthcare: Essential Readings* provides key excerpts from seminal and pertinent texts and case studies about these topics, contextualized by original introductions. The volume is divided into three broad sections: Conceptual Distinctions and Ethical Theory; Rationing and Resource Allocation; and Containing the most important and classic articles surrounding the theoretical and practical issues related to rationing and how to allocate scarce medical resources. This collection aims to assist and inform those who wish to be a part of bioethics 21st century shift, including practitioners and policy makers and students and scholars in the health sciences, philosophy, law, and medical ethics.

Choosing Who's to Live James William Walters, 1996 The population is rapidly aging while access to proper and affordable medical treatment is becoming more and more limited. This impasse challenges us to make ethical decisions regarding the rationing of health care. Arguing that de facto rationing is already taking place due to economic necessity and that proper management of this rationing is essential to the fair and ethical treatment of all seeking care, *Choosing Who's to Live* directly addresses one of the most challenging moral questions of our day. Appearing in the wake of increasing awareness of health care reform, this volume identifies four compelling arguments for managed health care rationing: the number of citizens over age eighty-five will increase 500 percent by the year 2040; current baby boomers could live longer than today's elderly by seven to fifteen years; new medical technologies are appearing every day and the ratio of workers to retirees will be 1.4 in forty years instead of the current 1.25. In this volume, six leading scholars take the discussion of rationing health care beyond the simple idea of withholding government-funded life-saving treatment from the very old to a more ethical, effective treatment plan for all.

Exposing the Twenty Medical Myths Arthur Garson Jr., Ryan Holeywell, 2019-10-22 Despite intense political focus and debate for the past 10 years, Americans remain deeply worried about the availability and affordability of health care for themselves and their families. In clear and accessible prose, journalist Ryan Holeywell and medical doctor and health policy expert Arthur Garson provide Americans with the tools we need to have

an honest unbiased view of the state of health care policy in America By fact checking 20 enduring health care myths they move the debate beyond Obamacare v repeal and replace and give citizens the tools they need to evaluate the major policy issues confronting our health care system [Library of Congress Subject Headings](#) Library of Congress, Library of Congress.
