Re Thinking Reason:

Re-Thinking Reason Kerry S. Walters, 1994-09-08 For two decades colleges and universities have regularly offered and in some cases required courses in thinking skills. Such courses generally have focused on training students in the basics of informal and formal logic, the assumption being that good thinking is logical thinking and that instruction in critical or good thinking consequently should emphasize logical procedures. This logistic assumption is clearly reflected in both critical thinking textbooks as well as in the professional literature. Recently, however, the epistemic and pedagogical identification of critical thinking and logical thinking has been questioned by educators from a wide diversity of disciplines. Many of these critics argue that a richer, more comprehensive model of thinking itself is needed, one that acknowledges the importance of traditionally downplayed faculties such as empathy, imagination, and insight. Others contend that thinking skills theory and pedagogy must take into consideration the contextual and sometimes political influences upon not just content but also styles of thinking. Finally, still other critics of the conventional model of critical thinking argue that recent research in feminist studies sheds a great deal of light upon the directions in which critical thinking instruction should go. The fourteen essays in this anthology all illustrate this new way of thinking about critical thinking. Each of them is critical of the received model and each of them argues for one that goes beyond the conventional reduction of thinking skills to logical expertise. But each approaches the issue from a different angle, thereby providing the reader with a diversity of perspectives and accents. *Re Thinking Reason* is an invaluable resource, tool, research guide, and supplemental textbook for educators across the disciplines who are concerned with incorporating thinking skills instruction in their classes. *Re-Thinking Reason* Kerry S.

Walters, 1994-01-01 Challenges the widespread assumption that good thinking is logical thinking and that college students should learn better after taking a course in critical thinking. The 14 contributors argue for and provide a richer model of thinking that acknowledges the importance of faculties traditionally downplayed or discouraged. Addressed to educators.

Rethinking Curriculum in Times of Shifting Educational Context Kaustuv Roy, 2017-07-25 This book engages with the dynamic intersection of several domains such as philosophy, psychology, sociology, and pedagogy in order to critically analyze and reinvent our understanding of curriculum. The chapters raise important questions such as: what are the conditions of possibility for a living curriculum in which Eros and intellect or reason and intuition are not separated? How is it possible to escape ideology that keeps us bound to defunct categories? What are the ingredients of an inquiry that is able to grasp curriculum as an expanding interpersonal movement? How do the teacher/learner ensemble get creatively constituted beyond obstructive dualities? How can we reinvent meaning in curriculum without totalization? Which indigenous understandings can be recovered in order to reinvent curriculum with greater relevance for diverse peoples? This volume

addresses elements of reason nonreason becoming dissipation violence uncertainty transcendence love and death in order to come to a critical understanding of the relationship between knowledge and knower from these multiple perspectives

Reading Bataille Now Shannon Winnubst, 2007-01-08 The work of Georges Bataille 1897 1962 has often been reduced to his outrageous erotic and libertine fiction and essays This book presents contemporary interpretations that situate Bataille in French and European intellectual traditions and brings forward key concepts to understand the challenges posed by his important work and philosophy

Rethinking Peter Singer Gordon R. Preece, 2002-01-01 Who is Peter Singer What does he say about issues like abortion infanticide euthanasia and animal rights What does he say about Christianity What exactly is his philosophy Peter Singer is probably the world's most famous or infamous contemporary philosopher says Gordon Preece Recently appointed as professor of bioethics at Princeton University's Center for Human Values Singer is best known for his book on animal rights *Animal Liberation* and for his philosophical text *Practical Ethics* But underneath his seemingly benign agenda lies perhaps the most radical challenge to Christian ethics proposed in recent times In *Rethinking Peter Singer* four of Singer's contemporaries fellow Australian scholars Gordon Preece Graham Cole Lindsay Wilson and Andrew Sloane grapple with Singer's views respectfully but incisively From a straightforwardly Christian perspective they critique Singer's thought in four major areas abortion and infanticide euthanasia animal rights and Christianity *Rethinking Peter Singer* is not only for those who want to understand Singer's views but also for all who want to challenge the thinking that more and more informs our society's stance on moral issues

Hamlet and the Rethinking of Man Eric P. Levy, 2008 Isolating the conceptual apparatus dominant in the world of the play this book traces the play's origins including those pertaining to Christian Humanism and the Aristotelian Thomist synthesis with its assumption of the sovereignty of reason

Rethinking Law as Process James MacLean, 2012-05-23 *Rethinking Law as Process* draws on insights from process philosophy in order to rethink the nature of legal decision making

Rethinking Popper Zuzana Parusniková, Robert S. Cohen, 2009-03-13 In September 2007 more than 100 philosophers came to Prague with the determination to approach Karl Popper's philosophy as a source of inspiration in many areas of our intellectual endeavor This volume is a result of that effort Topics cover Popper's views on rationality scientific methodology the evolution of knowledge and democracy and since Popper's philosophy has always had a strong interdisciplinary influence part of the volume discusses the impact of his ideas in such areas as education economics psychology biology or ethics The concept of falsification the problem of demarcation the ban on induction or the role of the empirical basis along with the provocative parallels between historicism holism and totalitarianism have always caused controversies The aim of this volume is not to smooth them but show them as a challenge In this time when the traditional role of reason in the Western thought is being undermined Popper's non foundationist model of reason brings the Enlightenment message into a new perspective Popper believed that the open society was vulnerable due precisely to its tolerance of otherness This is a matter of great urgency in the modern world as cultures based on different

values gain prominence The processes related to the extending of the EU or the increasing economic globalization also raise questions about openness and democracy The volume s aim is to show the vitality of critical rationalism in addressing and responding to the problems of this time and this world

The Norm of Belief John Gibbons,2013-08-01 John Gibbons presents an original account of epistemic normativity Belief seems to come with a built in set of standards or norms One task is to say where these standards come from But the more basic task is to say what those standards are In some sense beliefs are supposed to be true Perhaps they re supposed to constitute knowledge And in some sense they really ought to be reasonable Which if any of these is the fundamental norm of belief The Norm of Belief argues against the teleological or instrumentalist conception of rationality that sees being reasonable as a means to our more objective aims either knowledge or truth And it tries to explain both the norms of knowledge and of truth in terms of the fundamental norm the one that tells you to be reasonable But the importance of being reasonable is not explained in terms of what it will get you or what you think it will get you or what it would get you if only things were different The requirement to be reasonable comes from the very idea of what a genuine requirement is That is where the built in standards governing belief come from and that is what they are

Rethinking Philosophy and Theology with Deleuze Brent Adkins,Paul R. Hinlicky,2013-06-06 The debate between faith and reason has been a dominant feature of Western thought for more than two millennia This book takes up the problem of the relation between philosophy and theology and proposes that this relation can be reconceived if both philosophy and theology are seen as different ways of organising affects Brent Adkins and Paul R Hinlicky break new ground in this timely debate in two ways Firstly they lay bare the contemporary dependence on Kant and propose that our Kantian inheritance leaves us with an insuperable dualism Secondly the authors argue that the philosophy of Gilles Deleuze provides a way of resolving the debate between faith and reason that does justice to philosophy and theology by reconceiving of both as assemblages Deleuze s philosophy differentiates domains of thought in terms of what they create This seems like a particularly fruitful way to pursue the problem of the relations among philosophy and theology because it allows their distinction without at the same time placing them in opposition to one another

Rethinking Progress Jeffrey C. Alexander,Piotr Sztompka,2002-09-11 Rethinking Progress provides a challenging reevaluation of one of the crucial ideas of Western civilization the notion of progress Progress often seems to have become self defeating producing ecological deserts overpopulated cities exhausted resources decaying cultures and widespread feelings of alienation The contributors from all over the world present their diversified perspectives on the fate of progress

Rethinking Trinitarian Theology Giulio Maspero,Robert J. Wozniak,2012-03-01 The book aims at showing the most important topics and paradigms in modern Trinitarian theology It is supposed to be a comprehensive guide to the many traces of development of Trinitarian faith As such it is thought to systematize the variety of contemporary approaches to the field of Trinitarian theology in the present philosophical cultural context The main goal of the publication is not only a description of what happened to Trinitarian

theology in the modern age It is rather to indicate the typically modern specificity of the Trinitarian debate and first of all to encourage development in the main areas and issues of this subject *Cognitive Psychology* Sabian Fleming,2019-09-22

Cognitive psychology is a form of discipline within psychology that touches all parts of the perceptual memory and thinking processes Cognitive psychology is the scientific study of the thinking mind involving the total range of psychological processes Cognitive psychology is the scientific study of the mind as an information processor Cognitive psychologists try to build up cognitive models of the information processing that goes on inside people's minds including perception attention language memory thinking and consciousness Cognitive psychologists examine internal mental processes such as memory perception learning and language and they are concerned with how people understand diagnose and solve problems and make decisions Cognitive psychology generally favors the gathering of empirical data from scientific research methods instead of through clinically based observation such as in the field of psychoanalysis to reach conclusions and state a case However because cognitive psychology is a vast and diverse field clinical observation can be useful in generating hypotheses for further research The behaviorists approach only studies external observable stimulus and response behavior which can be objectively measured They believe that internal behavior cannot be studied because we cannot see what happens in a person's mind and therefore cannot objectively measure it In comparison the cognitive approach believes that internal mental behavior can be scientifically studied using experiments Cognitive psychology assumes that a mediational process occurs between stimulus input and response output This book is written for all those students who are associated with psychology It is hoped that the contents of this book will explain different aspects of cognition and prepare you to comprehend future developments An effort has been made to put a comprehensive view of cognitive psychology involving some of its multifarious components *Rethinking Facticity* , **Rethinking Party Reform** Fabio Wolkenstein,2020 This book addresses a question of fundamental importance to contemporary representative democracies How could political parties reconnect with society It advances a normative account of party reform drawing on both democratic theory and political science scholarship on parties *Rethinking the Good* Larry S. Temkin,2012-01-20 This book discusses a broad range of issues concerning normative ethics ethical theory and practical rationality **Rethinking Online Education** Bessie Mitsikopoulou,2015-11-17 *Rethinking Online Education* analyzes online educational materials on the recent Iraq war aimed to be used by U S educators in elementary and secondary schools It is suggested that far from being ideologically neutral these educational materials weave together resources which provide a coherent view of the Iraq war theme and can thus be seen as constituting a kind of an informal curriculum Mitsikopoulou argues that the teacher resources adhere to different pedagogical discourses and constitute materializations of two broad approaches to education A number of pedagogical issues are also raised in the discussion What is the difference between critical thinking and critical pedagogy How is the genre of lesson plan realized in different teaching philosophies and how do curricular texts change when they are

delivered online This important book highlights the need to explore the new forms of textuality which emerge from online curricular materials and to develop an understanding of the processes of text composition distribution and consumption

Rethinking Refugee Law Nīraj Nathwani, 2003-01-01 1 4 DE FACTO STATELESSNESS **Rethinking the Value of Humanity** Sarah Buss, L. Nandi Theunissen, 2023 It is widely agreed that to treat some human beings as less worthy of concern and respect than others is to lose sight of their humanity But what does this moral blindness amount to The essays in this volume offer a wide range of competing yet overlapping answers to this question Some essays appeal to distinctively human capacities Others argue that our obligations to one another are ultimately grounded in self interest or certain shared interests or our natural sociability This rich selection of proposals encourages us to rethink some of our own deepest assumptions about the moral significance of being human
