## Reaching For The Rim:

**The Land of Benjamin** Izchak Magen, Noga Haimovich-Carmin, 2004 This title deals with one of the most important areas in the Land of Israel during the Second Temple period. It was to this area that most Jews returned from the Babylonian Exile and it was here that the Hasmonean state with its religious and military heritage was formed and flourished. At the core of this book is the description of the discovery of two agricultural settlements and the finds unearthed there which illuminate Jewish rural life during the Second Temple period. Most important is the unearthing of a synagogue dating from before the destruction of the Temple which is the first synagogue discovered from that period to date in the Land of Benjamin.

In this region the genus is of particular interest because of its wide distribution, the number and diversity of its food plants and the injuriousness of certain species. It is the largest aleyrodid genus known on the continent and all species now known in the Nearctic Region presumably are indigenous to it or are Neotropical species whose northern limits extend into that Region. Characteristics of interest are modifications in papillae and in the vasiform orifice exhibited by some of its members and also the unusual parthenogenetic behavior of one of them.
