Reaching The Rural Poor A Renewed Strategy For Rural Development:

Reaching the Rural Poor, 2003 Despite the fact that three quarters of the world's poor live in rural areas the level of international development aid directed at rural areas has continued to decline over the last decade particularly in terms of the agricultural sector In 2001 lending for agricultural projects was the lowest in the World Bank's history This publication presents the World Bank's new rural development strategy based upon a results oriented approach which stresses practice implementation monitoring and empowerment aspects The strategy seeks to highlight rural development efforts focusing on the needs of the rural poor fostering a broad based economic growth and addressing the impact of global developments on client countries

World Bank Assistance to Agriculture in Sub-Saharan Africa, 2007-01-01 Sub Saharan Africa is a critical development priority it has some of the world's poorest countries and during the past two decades the number of poor in the Region has doubled to 300 million more than 40 percent of the Region's population Africa remains behind on most of the Millennium Development Goals MDGs and is unlikely to reach them by 2015 With some of the world's poorest countries Africa is a development priority for the donor community A major drag on Africa's development is the underperformance of the critical agriculture sector which has been neglected both by donors and governments over the past two decades The sector faces a variety of constraints that are particular to agriculture in Africa and make its development a complex challenge Poor governance and conflict in several countries further complicate matters IEG has assessed the development effectiveness of World Bank assistance in addressing constraints to agricultural development in Africa over the period of fiscal 1991-2006

Food for All Uma J. Lele, Uma Lele, Manmohan Agarwal, Brian C. Baldwin, Sambuddha Goswami, 2021 This book assesses the prospects for achieving the sustainable development goals and the role of international organizations in achieving them in light of recent economic medical and environmental developments

Agricultural Diversification and Smallholders in South Asia P. K. Joshi, Ashok Gulati, 2007 Contributed articles at two workshops

Success in Agricultural Transformation Isabelle Tsakok, 2011-08-01 To lift and keep millions out of poverty requires that smallholder agriculture be productive and profitable in the developing world Do we know how to make this happen Researchers and practitioners still debate how best to do so The prevailing methodology which claims causality from measures of statistical significance is inductive and yields contradictory results In this book instead of correlations Isabelle Tsakok looks for patterns common to cases of successful agricultural transformation and then tests them against other cases She proposes a hypothesis that five sets of conditions are necessary to achieve success She concludes that government investment in and delivery of public goods and services sustained over decades is essential to maintaining these conditions and thus successfully transform poverty ridden agricultures No amount of foreign aid can substitute for such sustained government commitment The single most important threat to such government commitment is subservience to the rich and powerful minority

World Bank Annual Report 2003, 2003-01-01 Annotation The World Bank Annual Report 2003

offers a concise look at **Global Food and Agricultural Institutions** D. John Shaw, 2008-10-27 This pioneering text brings together for the first time the global institutions on the front line of the campaign against hunger and poverty The institutions examined in this book the Food and Agricultural Organization FAO the International Fund for Agricultural Development IFAD the World Bank the World Food Programme WFP and the Consultative Group on International Agricultural Research CGIAR play important roles in achieving and maintaining world food security which is essential for human existence economic and social development and world peace By analyzing the origins functions successes and difficulties of these global institutions Shaw highlights the continuing relevance of these bodies in their quest to meet the challenges of the twenty first century In the light of the current world food crisis this book provides a particularly pertinent commentary on a highly topical issue that is never far from the media spotlight This book is essential reading for all students academics and readers with an interest in international organisations agricultural development and economic and humanitarian affairs

Shaping the Future of Water for Agriculture, 2005 Agricultural water management is a vital practice in ensuring reduction and environmental protection After decades of successfully expanding irrigation and improving productivity farmers and managers face an emerging crisis in the form of poorly performing irrigation schemes slow modernization declining investment constrained water availability and environmental degradation More and better investments in agricultural water are needed In response the World Bank in conjunction with many partner agencies has compiled a selection of good experiences that can guide practitioners in the design of quality investments in agricultural water The messages of Shaping the Future of Water for Agriculture A Sourcebook for Investment in Agricultural Water Management center around the key challenges to agricultural water management specifically Building policies and incentives Designing institutional reforms Investing in irrigation systems improvement and modernization Investing in groundwater irrigation Investing in drainage and water quality management Investing in water management in rainfed agriculture Investing in agricultural water management in multipurpose operations Coping with extreme climatic conditions Assessing the social economic and environmental impacts of agricultural water investments Shaping the Future of Water for Agriculture is an important resource for those interested and engaged in development with a focus on agricultural water

Resource Management in Agroecosystems Gabrijel Ondrasek, Ling Zhang, 2023-11-22 In our rapidly growing and changing world the sustainable management of Earth's resources has become an urgent global priority Resource Management in Agroecosystems provides a compass for navigating this complex terrain It offers a multifaceted exploration of resource management from sustainable agricultural practices to water and energy optimization soil conservation and biodiversity preservation This book delves deep into the strategies needed to harmonize food production with environmental stewardship Beyond addressing challenges this book also spotlights opportunities inviting readers to embark on a transformative journey With profound gratitude to our authors reviewers and publishers we invite you to join us in this

intellectual odyssey Let Resource Management in Agroecosystems guide you toward a more sustainable and resilient future where the needs of humanity harmonize with the well being of our planet **The World Bank Research Program 2004** World Bank,2005 The World Bank s research is intended to address critical issues and problems facing member governments in developing and transition economies How can the governments of the poorest countries generate enough revenue to provide the education and health services essential to reducing poverty and promoting growth and development How can poor countries attract investors to build the infrastructure their economies need How can they develop systems to bring clean water to the 2 billion people without it today How can they train teachers and bring to class the 115 million children who have not yet received any education And how can rich countries be persuaded to lower market barriers helping to reverse the decline in export prices for poor countries that has left them earning less from trade today than in the 1970s These are the types of questions that are addressed in this edition of The World Bank Research Program Abstracts from Current Studies This volume reports on research projects initiated under way or completed from July 2003 through June 2004 It covers 151 research projects on several broad development related issues including agriculture health education environment infrastructure investment climate and more The abstract for each project describes the questions addressed the analytic methods used the findings to date and policy implications It's Small World After All: Defining Smallholder Agriculture in Ghana Jordan Chamberlin,2008 *Food Security in Africa* Alexander Sarris,2010-01-01 As they often do Jamie Morrison and Alexander Sarris have provided researchers policy makers and the interested public with the firm empirical grounding needed for sound agricultural development policies They have synthesized from a rich and varied set of country studies a unique contribution to one of the key challenges of our times increasing the productivity of smallholder food production in the age of globalization Timothy A Wise Tufts University US Food security has been a major concern in Africa for decades and a more pressing problem with recent increases in food prices The editors and contributors to this volume are experts in the field and should be commended for a timely informative and in places challenging analysis of food production and markets in eastern and southern Africa The volume brings a refreshing variety of theoretical analytical and informed case study approaches to bear on the food security problem it should be read by anybody seriously interested in African development Oliver Morrissey University of Nottingham UK Drawing on insights from theoretical applications empirically based approaches and case study experience this book contributes to the improved design and use of trade and related policy interventions in staple food markets Trade policy interventions have a potentially critical role to play in the development of staple food markets in developing countries and as a source of revenue in wider processes of rural development Governments have long defended trade and related policy interventions in staple food markets on the basis of food security concerns However the design and implementation of these policies has often resulted in unintended impacts increasing the risks faced by private sector actors and reducing their incentives for investment in improved market

performance In the context of increasingly volatile staple food markets this book commissioned from leading experts in this field seeks to enhance dialogue between stakeholders involved in and affected by the design and use of trade and related policy interventions This significant book will appeal to policy analysts and decision makers influential in the design and implementation of trade and related market interventions as well as students of development economics Researchers contributing to debates on the use and impacts of trade and related market interventions in staple food markets in poor countries will also find this volume of great benefit

Agricultural Extension Systems B.S. Hansra (ed.), 2008 Papers presented at the National Seminar on Alternative Extension Approaches in Technology Transfer held at Trivandrum during 21-22 February 2004

Growth and Productivity in Agriculture and Agribusiness, 2011 The report assesses the World Bank Group's support for growth and productivity in the agriculture sector Enhancing agricultural growth and productivity is essential to meeting the worldwide demand for food and to reducing poverty particularly in the poorest developing countries Between 1998 and 2008 the period covered by this evaluation the World Bank Group WBG provided 23.7 billion in financing for agriculture and agribusiness in 108 countries roughly 8 percent of total WBG financing spanning areas from irrigation and marketing to research and extension However this was a time of declining focus on agricultural growth and productivity by both countries and donors The cost of inadequate attention to agriculture especially in agriculture based economies came into focus with the food crisis of 2007-08 The crisis added momentum to an emerging renewal of attention and stepped up financing to agriculture and agribusiness at the World Bank and International Finance Corporation IFC as well as at several multilateral and bilateral agencies World Bank financing rose two and a half times from 2008 to 2009 though that increase in lending seems to have been accompanied by a decline in analytical work which this review finds valuable for results This evaluation seeks to provide lessons from successes and failures to help improve the development impact of the renewed attention to the sector Ratings against the World Bank's stated objectives and IFC's market based benchmarks for agriculture and agribusiness projects have been equal to or above portfolio averages in East Asia Latin America and the transition economies in Europe with notable successes over a long period in China and India But performance of WBG interventions has been well below average in Sub Saharan Africa where IFC has had little engagement in agribusiness Inconsistent client commitment and weak capacity have limited the effectiveness of WBG support in agriculture based economies particularly in Sub Saharan Africa and constraints on staffing and internal coordination within the WBG have also hurt outcomes Financial sustainability has been constrained by insufficient government funding and the difficulty of maintaining agricultural services and infrastructure The WBG has a unique opportunity to match the increases in the financing for agriculture with sharper focus on improving agricultural growth and productivity in agriculture based economies notably in Sub Saharan Africa Greater effort will be needed to connect sectoral interventions and achieve synergies from public and private sector interventions to build capacity and knowledge exchange to take stock of experience

in rain fed agriculture to ensure attention to financial sustainability and to cross cutting issues of gender environmental and social impacts and climate and to better integrate WBG support at the global and regional levels with that at the country level

African Smallholders Göran Djurfeldt, Ernest Aryeetey, Aida C. Isinika, 2011 This book investigates how the changed agricultural policy climate affected government policies in the nine countries studied already as part of the preceding project Ethiopia Ghana Kenya Malawi Mozambique Nigeria Tanzania Uganda and Zambia By repeating the cross sectional survey made in over 100 villages in 2002 and converting it into a panel it is possible to trace village and household level effects of agricultural policies and other macro level processes The book consists of 14 chapters most of which revolve around studies on each of the nine case study countries

Small farmers for a food system transition: Evidence from Kenya and Tanzania Nunzia Borrelli, Patrick Ndakidemi, 2020-03-10 This book aims at being a first rendering of the research conducted on the coattails of the SASS Project Sustainable Agrifood Systems Strategies The SASS Project was financed by the Ministry of Education University and Research MIUR and it engaged a multidisciplinary team of agronomists microbiologists botanists economists sociologists and anthropologists The purpose of the research was to map and to analyse the local nutritional systems of three East African areas the Arusha s and the Iringa s in Tanzania and the Lake Naivasha s in Kenya with an interdisciplinary synergic and interactive approach The project intends to investigate the agro nutritional systems both from a techno scientific and a socio politic point of view in order to provide a full overview of the situation by integrating the different results from all the disciplinary fields involved

Towards New Global Strategies: Public Goods and Human Rights Erik André Andersen, Birgit Lindsnaes, 2007-08-31 This book aims to contribute to the debate on global public goods a debate which has been taking place for some time in the UN and the World Bank among the regional development banks and bilaterally among states and donors There is a need for new visions and strategies and to examine global infrastructure on the basis of the idea that global public goods including human rights contribute to cohesion at local regional and international levels The book investigates the possibilities and disadvantages of applying the idea of public goods in a global context It explains the history of the concept and its significance for human rights The authors include in addition to academics representatives from public institutions civil society organizations independent consultants the media and the private sector

Land Tenure Challenges in Africa Horman Chitonge, Ross Harvey, 2022-01-01 This book provides a significant contribution to the literature on land reform in various African contexts While the economic evidence is clear that secure property rights are a necessary condition for catalysing broad based economic development the governance process by which those rights are secured is less clear This book details the historical complexity of land rights and the importance of understanding this history in the process of trying to improve tenure security Through a combination of single country case studies comparative case studies and regional comparisons the book is unequivocal that good governance is paramount for improving the performance of land reform programmes All attempts at moving towards more formal secure tenure require

congruence with informal norms beliefs and values and a set of clear systems and processes to avoid corruption and unintended negative consequences Essays in African Land Law Robert Home (College teacher),2011 *The Politics of Food* William D. Schanbacher,2010-02-26 A description of the current global food system this book challenges our ethical responsibility to the global poor and implicates us all for failing to curb global hunger and malnutrition *The Politics of Food* The Global Conflict between Food Security and Food Sovereignty argues that our current global food system constitutes a massive violation of human rights In this impassioned well researched book William Schanbacher makes the case that the food security model for combating global hunger driven by the United Nations the World Bank the International Monetary Fund and other organizations is a failure too dependent on trade and too reliant on international agribusiness Instead the emerging model of food sovereignty helping local farmers and businesses produce better quality food is the more effective and responsible approach Through numerous case studies the book examines critical issues of global trade and corporate monopolization of the food industry while examining the emerging social justice movements that seek to make food sovereignty the model for battling hunger
