Reader In International Relations:

A Reader in International Relations and Political Theory Howard L. Williams, Tony Evans, Moorhead Wright, 1993 This reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects It draws together writings representing two distinct traditions and demonstrates their interconnections In political theory excerpts are drawn from classical texts which have an important bearing on problems of international relations In international relations the collection includes essays which have had a seminal influence on the development of this discipline International

Relations in Uncommon Places J. Beier, 2005-06-10 The central claim developed in this book is that disciplinary International Relations IR is identifiable as both an advanced colonial practice and a postcolonial subject The starting problematic here issues from disciplinary IR's relative dearth of attention to indigenous peoples their knowledges and the distinctive ways of knowing that underwrite them The book begins by exploring how IR has internalized many of the enabling narratives of colonialism in the Americas evinced most tellingly in its failure to take notice of indigenous peoples More fundamentally IR is read as a conduit for what the author terms the hegemonologue of the dominating society a knowing hegemonic Western voice that owing to its universalist pretensions speaks its knowledge to the exclusion of all others **The Global**

Resistance Reader Louise Amoore, 2005 The Global Resistance Reader provides the first comprehensive collection of work on the phenomenal rise of transnational social movements and resistance politics from the visible struggles against the financial economic and political authority of large international organizations such as the World Trade Organization World Bank and International Monetary Fund to the much less visible acts of resistance in everyday life The conceptual debates substantive themes and case studies have been selected to open up the idea of global resistance to interrogation and discussion by students and to provide a one stop orientation for researchers journalists policymakers and activists

through the required material in a gentle reassuring pace with an accessible and concise style without shying away from the more complex theories and concepts A clear and consistent structure and pedagogical framework of key terms key concepts key events and key thinkers to enable students with little or no knowledge of theory to develop a strong theoretical understanding supported by easy to navigate points of reference Critical reflection on new theoretical knowledge is encouraged by Think Critically questions that are supported by hints and tips to guide avenues of thought Opportunities to apply theory to today's events and issues and to practise using theory to analyse and interpret important societal concerns Available as an e book enhanced with self assessment activities and multi media content to offer a fully immersive experience and extra learning support

Reader in International Relations and Diplomatic Service, 2012 The Realism Reader
Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism's engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism's engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism

Race and Racism in International Relations Alexander Anievas, Nivi Manchanda, Robbie Shilliam, 2014-10-30 International Relations as a discipline does not grant race and racism explanatory agency in its conventional analyses despite such issues being integral to the birth of the discipline Race and Racism in International Relations seeks to remedy this oversight by acting as a catalyst for remembering exposing and critically re articulating the central importance of race and racism in International Relations Focusing especially on the theoretical and political legacy of W E B Du Bois's concept of the colour line the cutting edge contributions in this text provide an accessible entry point for both International Relations students and scholars into the literature and debates on race and racism by borrowing insights from disciplines such as history anthropology and sociology where race and race theory figures more prominently yet they also suggest that the field of IR is itself an intellectually and strategic field through which to further confront the global colour line Drawing together a wide range of contributors this much needed text will be essential reading

for students and scholars in a range of areas including Postcolonial studies race racism in world politics and international relations theory The Globalizing Cities Reader Xuefei Ren,Roger Keil,2017-10-12 The newly revised Globalizing Cities Reader reflects how the geographies of theory have recently shifted away from the western vantage points from which much of the classic work in this field was developed The expanded volume continues to make available many of the original and foundational works that underpin the research field while expanding coverage to familiarize students with new theoretical and epistemological positions as well as emerging research foci and horizons It contains 38 new chapters including key writings on globalizing cities from leading thinkers such as John Friedmann Michael Peter Smith Saskia Sassen Peter Taylor Manuel Castells Anthony King Jennifer Robinson Ananya Roy and Fulong Wu The new Reader reflects the fact that world and global city studies have evolved in exciting and wide ranging ways and the very notion of a distinct global class of cities has recently been called into question The sections examine the foundations of the field and processes of urban restructuring and global city formation A large number of new entries focus on the emerging urban worlds of Asia Latin America and Africa including Beijing Bogota Cairo Cape Town Delhi Istanbul Medellin Mumbai Phnom Penh Rio de Janeiro Sao Paulo and Shanghai The book also presents cases off the conventional map of global cities research such as smaller cities and less known urban regions that are undergoing processes of globalization The book is a key resource for students and scholars alike who seek an accessible compendium of the intellectual foundations of global urban studies as well as an overview of the emergent patterns of early 21st century urbanization and associated sociopolitical contestation around the world
