Photography and Failure Kris Belden-Adams, 2020-08-06 Throughout photography s history failure has played an essential recurring part in the

development and perceived value of this medium Exploring a range of failures individual and institutional technological and historiographical Photography and Failure asks what it means to fail and considers how this narrative of failure has shaped our understanding of photography From the trial and error beginnings of photochemistry to poor business decisions influenced by fickle public opinion and taste the founders and early practitioners of photography frequently faced bankruptcy and ignominy Alongside these individual failures this collection of essays examines the role of museums in rediscovering preserving and presenting photographs within institutions as well as technological limitations such as the problematic panoramic lens or the digital archival failures of Snapchat Moving beyond the physical photograph and these processes the book also investigates the limitations of photographs themselves as purveyors of truth time space documentary realism and social change whether these failures are used to effect or not Finally the book probes the historiographical failures affecting the discipline drawing on key debates such as the perceived over emphasis on European and American photography and the place of photography theory in contemporary art practice Blurring the boundaries between traditional binaries of art and non art photography amateur and professional practice and individual and corporate perspectives Photography and Failure presents a new approach to understanding and evaluating photographic history **The Decisive Network** Nadya

Bair,2020-07-07 Since its founding in 1947 the legendary Magnum Photos agency has been telling its own story about photographers who were witnesses to history and artists on the hunt for decisive moments Based on unprecedented archival research The Decisive Network unravels Magnum s mythologies to offer a new history of what it meant to shoot edit and sell news images after World War II Nadya Bair shows that between the 1940s and 1960s Magnum expanded the human interest story to global dimensions while bringing the aesthetic of news pictures into new markets Working with a vast range of editorial and corporate clients Magnum made photojournalism integral to postwar visual culture But its photographers could not have done this alone By unpacking the collaborative nature of photojournalism this book shows how picture editors sales agents spouses and publishers helped Magnum photographers succeed in their assignments and achieve fame Bair concludes in the late 1960s and early 1970s when changing market conditions led Magnum to consolidate its brand In that moment Magnum s photojournalists became artists and their assignments oeuvres Bridging art history media studies cultural history and the history of communication The Decisive Network transforms our understanding of the photographic profession and the global circulation of images in the predigital world **Reconstructions : New Perspectives on Postbellum America**

Institute for Southern Studies and Associate Professor of History University of South Carolina Thomas J. Brown Associate Director,2006-10-16 The pivotal era of Reconstruction has inspired an outstanding historical literature In the half century after W E B DuBois published Black Reconstruction in America 1935 a host of thoughtful and energetic authors helped to dismantle racist stereotypes about the aftermath of emancipation and Union victory in the Civil War The resolution of long running interpretive debates shifted the issues at stake in Reconstruction scholarship but the topic has remained a vital

venue for original exploration of the American past In *Reconstructions New Perspectives on the Postbellum United States* eight rising historians survey the latest generation of work and point to promising directions for future research They show that the field is opening out to address a wider range of adjustments to the experiences and effects of Civil War Increased interest in cultural history now enriches understandings traditionally centered on social and political history Attention to gender has joined a focus on labor as a powerful strategy for analyzing negotiations over private and public authority The contributors suggest that Reconstruction historiography might further thrive by strengthening connections to such subjects as western history legal history and diplomatic history and by redefining the chronological boundaries of the postwar period The essays provide more than a variety of attractive vantage points for fresh examination of a major phase of American history By identifying the most exciting recent approaches to a theme previously studied so ably the collection illuminates the creative process in scholarly historical literature

City Building on the Eastern Frontier Diane Shaw, 2020-03-03

America's westward expansion involved more than pushing the frontier across the Mississippi toward the Pacific it also consisted of urbanizing undeveloped regions of the colonial states In 1810 New York's future governor DeWitt Clinton marveled that the rage for erecting villages is a perfect mania The development of Rochester and Syracuse illuminates the national experience of internal economic and cultural colonization during the first half of the nineteenth century Architectural historian Diane Shaw examines the ways in which these new cities were shaped by a variety of constituents founders merchants politicians and settlers as opportunities to extend the commercial and social benefits of the market economy and a merchant culture to America's interior At the same time she analyzes how these priorities resulted in a new approach to urban planning According to Shaw city founders and residents deliberately arranged urban space into three segmented districts commercial industrial and civic to promote a self fulfilling vision of a profitable and urbane city Shaw uncovers a distinctly new model of urbanization that challenges previous paradigms of the physical and social construction of nineteenth century cities Within two generations the new cities of Rochester and Syracuse were sorted at multiple scales including not only the functional definition of districts but also the refinement of building types and styles the stratification of building interiors by floor and even the coding of public space by class gender and race Shaw's groundbreaking model of early nineteenth century urban design and spatial culture is a major contribution to the interdisciplinary study of the American city

Moving Frames

Carrie Collenberg-González, Martin P. Sheehan, 2022-02-14 As the building blocks of moving pictures photographs have played an integral role in cinema since the dawn of the medium a relationship that has grown more complexly connected even as the underlying technologies continue to evolve *Moving Frames* explores the use of photographs in German films from Expressionism to the Berlin School addressing the formal and narrative roles that photographs play as well as the cultural and historical contexts out of which these films emerged Looking beyond and within the canon the editors gather stimulating new insights into the politics of surveillance resistance representation and collective

memory functioning through photographic rupture and affect in German cinema American Tantalus Andrew Warnes, 2014-10-23 American Tantalus argues that modern US fictions often grow preoccupied by tantalisation This keyword might seem commonplace thesauruses certainly often lump it in with tease and torment in their general inventories of desire Such lists however mislead Just as most US dictionaries have in fact long recognised tantalise's origins in The Odyssey so they have defined it as the unique desire we feel for objects that like the fruit and water once cruelly placed before Tantalus lie within our reach yet withdraw from our attempts to touch them On these terms American Tantalus shows tantalise not only describes a particular kind of thwarted desire but also one that dominates modern US fiction to a remarkable extent For this term specifically evokes the yearning to touch alienated or virginal objects that we find examined by F Scott Fitzgerald Toni Cade Bambara Richard Wright and Toni Morrison and it also indicates the insatiable pursuit of the horizon so important to Willa Cather and Edith Wharton among others This eclectic canon indeed prefers the dictionary to the thesaurus unreachable destinations and untouched commodities here indeed tantalise inviting gestures of inquiry from which they then recoil This focus while lodging cycles of tantalisation at the very heart of American myth holds profound implications for our understanding of modernity and in particular of the cultural genesis of the commodity as a form **Picturing the Past** Bonnie Brennen, Hanno Hardt, 1999 Explores the relations between photo journalism and history investigating how photographs shape both what we remember and how we remember This book provides insight into how photographs generate a sense of national community and reinforce prevailing social cultural and political values **Controlling Time and Shaping the Self** J. Arianne Baggerman, Rudolf M. Dekker, Michael James Mascuch, 2011-06-22 This book gives answers to questions surrounding the rise of autobiographical writing from the sixteenth to the twentieth century by analyzing texts varying from the time of the Spanish Inquisition to post war Japan **Sensible Politics** William A. Callahan, 2020-01-08 Visual images are everywhere in international politics But how are we to understand them In Sensible Politics William A Callahan uses his expertise in theory and filmmaking to explore not only what visuals mean but also how visuals can viscerally move and connect us in affective communities of sense The book's rich analysis of visual images photographs film art and visual artifacts maps veils walls gardens cyberspace shows how critical scholarship needs to push beyond issues of identity and security to appreciate the creative politics of social ordering and world ordering Here sensible politics isn't just sensory but looks beyond icons and ideology to the affective politics of everyday life It challenges our Eurocentric understanding of international politics by exploring the meaning and impact of visuals from Asia and the Middle East Sensible Politics offers a unique approach to politics that allows us to not only think visually but also feel visually and creatively act visually for a multisensory appreciation of politics **Northwest Lands, Northwest Peoples** Dale D. Goble, Paul W. Hirt, 2012-03-15 It can be said that all of human history is environmental history for all human action happens in an environment in a place This collection of essays explores the environmental history of the Pacific Northwest of North

America addressing questions of how humans have adapted to the northwestern landscape and modified it over time and how the changing landscape in turn affected human society economy laws and values Northwest Lands and Peoples includes essays by historians anthropologists ecologists a botanist geographers biologists law professors and a journalist It addresses a wide variety of topics indicative of current scholarship in the rapidly growing field of environmental history *Eyes on Labor* Carol Quirke,2012-08-30 *Eyes on Labor* narrates an essential chapter in American cultural history offering a fascinating broad stroke history of the relationship of photography to the complex and troubled history of 20th century labor and unionization movements **Poetry and the Limits of Modernity in Depression America** Justin Parks,2023-10-05

Chinn,2024-06-30 During the Civil War hundreds of thousands of men were injured and underwent amputation of hands feet limbs fingers and toes As the war drew to a close their disabled bodies came to represent the future of a nation that had been torn apart and how it would be put back together again In her authoritative and engagingly written new book Sarah Chinn claims that amputation spoke both corporeally and metaphorically to radical white writers ministers and politicians about the need to attend to the losses of the Civil War by undertaking a real and actual Reconstruction that would make African Americans not just legal citizens but actual citizens of the United States She traces this history reviving little known figures in the struggle for Black equality and in so doing connecting the racial politics of 150 years ago with contemporary debates about justice and equity Work and Identity J. Kirk,C. Wall,2010-11-17 This book presents an accessible and fascinating account of theoretical debates around

identity and work recent empirical trends and methodological arguments concerning the role of oral testimony and its interpretation Focusing on three occupational sectors in particular teachers bank workers and the railway industry it also presents an argument that is both more general than this and theoretically and analytically wide ranging The book explores some important questions how are workers both in the past and the present juncture socialised into work cultures What are the cultural and structural differences with regard the world of work across class gender and generation What are the historical conditions of which these differences play a part How is the idea of work found in a range of representations from artistic production to sociological discourse expressed and explored The development of concepts such as structures of feeling and affect and the weaving in of historical and visual material make the book important to a wide range of readers including ethnographers cultural sociologists and narrative researchers In turn this book offers an authoritative and sophisticated summary and analysis of work and identity and is an important intervention into mainstream sociology concerns
