teachers and academics Rather than deny the inherent conflicts and tensions in the field in *Critical Multicultural Analysis of Children's Literature: Mirrors, Windows, and Doors* Maria Jos Botelho and Masha Kabakow Rudman confront, deconstruct, and reconstruct these terrains by proposing a reframing of the field Surely all of us children teachers and academics can benefit from this more expansive understanding of what it means to read books Sonia Nieto From the Foreword *Critical multicultural analysis provides a philosophical shift for teaching literature, constructing curriculum, and taking up issues of diversity and social justice. It problematizes children's literature, offers a way of reading power, explores the complex web of sociopolitical relations, and deconstructs taken-for-granted assumptions about language, meaning, reading, and literature. It is literary study as sociopolitical change. Bringing a critical lens to the study of multiculturalism in children's literature, this book prepares teachers, teacher educators, and researchers of children's literature to analyze the ideological dimensions of reading and studying literature. Each chapter includes recommendations for classroom application, classroom research, and further reading. Helpful end-of-book appendixes include a list of children's book awards, lists of publishers, diagrams of the power continuum, and the theoretical framework of critical multicultural analysis, and lists of selected children's literature journals and online resources.*

A Cognitive Approach to Ernest Hemingway's Short Fiction Gabriela Tucan, 2021-04-09 How do readers make sense of Hemingway's short stories? How is it possible that the camera-like quality of his narrative can appeal to our senses and arouse our emotions? How does it capture us? With reserved narrators and protagonists engaged in laconic dialogs, his texts do not seem to say much. This book consciously revisits our responses to the Hemingway story, a belated response to his invitation to discover what lies beneath the surface of his iceberg. What this pioneering critical endeavor seeks to understand is the thinking required in reading Hemingway's short fiction. It proposes a cognitively informed model of reading which questions the resources of the reader's imaginative powers. The cognitive demonstrations here are designed to have potentially larger implications for the short story's general mode of knowing. Drawing from both cognitively oriented poetics and narratology in equal measure, this book explains what structures our interaction with literary texts.

Why Literature? Cristina Vischer Bruns, 2011-05-05 *Deeper Learning, Dialogic Learning, and Critical Thinking* Emmanuel Manalo, 2019-09-30 Deeper learning, dialogic learning, and critical thinking are essential capabilities in the 21st century environments we now operate. Apart from being important in themselves, they are also crucial in enabling the acquisition of many other 21st century skills, capabilities such as problem solving, collaborative learning, innovation, information and media literacy, and so on. However, the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning, dialogic learning, and critical thinking in their students. This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion. The problem is bridging the gap between the educational researchers' work and what gets conveyed to teachers and instructors as evidence-based, usable strategies. This book addresses that gap, in it leading scholars from around the world describe strategies they have

developed for successfully cultivating students capabilities for deeper learning and transfer of what they learn dialogic learning and effective communication and critical thought They explore connections in the promotion of these capabilities and they provide in accessible form research evidence demonstrating the efficacy of the strategies They also discuss answers to the questions of how and why the strategies work A seminal resource this book creates tangible links between innovative educational research and classroom teaching practices to address the all important question of how we can realize our ideals for education in the 21st century It is a must read for pre service and in service teachers teacher educators and professional developers and educational researchers who truly care that we deliver education that will prepare and serve students for life
