Academic Language In Second Language Learning Christian J. Faltis, M. Beatriz Arias, 2013-03-01 Language in academic settings also referred to as academic language has gained attention in the field of second language learning owing to new understandings of the complexities of language inherent in learning academic content and new efforts to assess English learners language proficiency in the context of school learning The concept of academic language as distinct from social language has been in the academic literature since the mid 1950s and surfaced as a major construct in the field of bilingual education in the 1980s Many readers will be familiar with the ideas of BICS and CALP first introduced by Jim Cummins in the 1980s This book presents a critique of academic language as a separable construct from social language and introduces current research efforts to understand how English learners interact interpret and show understanding of language in academic contexts in ways that re think and go beyond the distinction between social and academic language The book is organized into three main sections each with a range of chapters that consider how academic language plays into how children and youth learn academic content as emergent bilingual students in school settings A Foreward and Afterward offer commentary on the book and its contents The intended

audience for this book is graduate students teacher educators and researchers interested in issues of language and content learning for English learners the new mainstream of schools across the nation There is something for a wide range of readers and students of second language acquisition in this volume **Nurturing Giftedness to Genius** Harry Giles,2016-12-30

This work is a combination of research applied research and ultimate success When I got into it I was a university lecturer in three different areas I knew nothing about preschool primary school or secondary school except that I had passed through them I had wanted my psychologist wife to run the first bilingual school in Canada but there were so many legal problems imposed by an uninformed ministry that I had to become headmaster as well as to continue to practice law to earn my livelihood and to subsidize the school in its dramatic growth Since I knew how to research I found out the best schools in the world visited them and adopted their procedures I visited fourteen countries studied the approaches of perhaps forty schools was helped by the government of France and ended up with one school that was probably the most successful academic school in the world It dominated the Putnam University Level Mathematics Competition beat every country in the world in the Chemistry and Physics Olympiads except Russia and beat most of the European countries regularly some every year When the university professors chose the Canadian Olympiad teams they almost always chose the students from the Toronto French School because they had covered 23 1 2 years of the program at the University of Toronto because I knew how to hire gifted teachers and because our programs were enriched beyond any that I knew of in the world Because of my complex approaches and early academic intervention all of the children had a boost in measured IQ Unhappily they dropped my ideas of teachers dropped my psychological approaches my learning methodologies and neither of the two schools now even reach the Putnam or the Olympiad teams for any of their students and do not win regular national science fair gold medals or national mathematics competitions *Open Court Basic Readers: A trip around the world. 4th rev. ed. 1972* Arther S.
