Goldberg,Gilbert B. Schiffman,1972      **Reading Difficulties--their Diagnosis and Correction** Guy Loraine Bond,Miles Albert Tinker,Barbara B. Wasson,1979      **Dyslexia and Hyperlexia** P. G. Aaron,1989-03-31 Even though I had been studying reading problems in children for a number of years as a means of understanding cognitive processes I became deeply committed to the study of developmental dyslexia after my encounter with S H a dyslexic college student Until then dyslexia to me remained an interesting phenomenon but somewhat removed from the mainstream of my research interests

The facts that in spite of his superior IQ S H could read no better than a child in the fifth grade and misspelled even common words such as was and here however took me by surprise and made me appreciate the intriguing and challenging nature of developmental dyslexia This led to a series of studies of college students with reading disability a group that is relatively unexplored The general plan of these investigations was to study a small number of disabled readers at any given time rather intensively Even though this approach limits the generalizability of the research findings it lays bare some of the most interesting facts about dyslexia which are obscured in large scale statistical studies These studies have now extended well over a decade and are still continuing As soon as these studies were started it became obvious that not all reading disabled college students are alike and that disabled readers could be classified into three broad categories those with poor decoding skill those with poor comprehension ability and those with a combination of these two deficits **Can We Read Letters?**

Finn Egil Tønnessen, Per Henning Uppstad, 2015-02-27 In their new book Finn Egil Tønnessen and Per Henning Uppstad provide a set of theoretical and philosophical reflections on research in reading and dyslexia It is a pleasure to welcome this book which reflects the many contributions made by researchers at the National Centre for Reading Education and Research in Stavanger Norway Professor Usha Goswami University of Cambridge Careful reflection on the concepts and methods used is a prerequisite for further development in any field of research The authors think cognitive psychology has become too dominant in reading and dyslexia research arguing that it should be combined with behaviourism and connectionism in part by focusing on the concept of skill The key components of a skill are claimed to be automaticity awareness and shifts between them Reading is defined as an interpretative skill which should be viewed from the perspective of hermeneutics The authors use these fundamental analyses and definitions to shed new light on the balanced approach to reading instruction reading fluency and other key concepts The book also deals with problems in the definition of dyslexia and proposes a method to arrive at clear and fruitful definitions It concludes with a chapter trying to answer the question of in what sense or to what extent it can be claimed that reading and dyslexia research has made progress The book mainly builds on articles published over the past 25 years by Professor Finn Egil Tønnessen at the National Centre for Reading Education and Research Stavanger Norway
