Real World Justice Grounds Principles Human Rights And Social Institutions:

Real World Justice A. Follesdal, Thomas Winfried Menko Pogge, T. Pogge, 2005-06-08 The concept of global justice makes visible how we citizens of affluent countries are potentially implicated in the horrors so many must endure in the so called less developed countries Distinct conceptions of global justice differ in their specific criteria of global justice However they agree that the touchstone is how well our global institutional order is doing compared to its feasible alternatives in regard to the fundamental human interests that matter from a moral point of view We are responsible for global regimes such as the global trading system and the rules governing military interventions These institutional arrangements affect human beings worldwide for instance by shaping the options and incentives of governments and corporations Alternative paths of globalization would have differed in how much violence oppression and extreme poverty they engender And global institutional reforms could greatly enhance human rights fulfillment in the future The importance of this global justice approach reaches well beyond philosophy It enables ordinary citizens to understand their options and responsibility for global institutional factors and it challenges social scientists to address the causes of poverty and hunger that act across borders The present volume addresses four main topics regarding global justice The normative grounds for claims regarding the global institutional order the substantive normative principles for a legitimate global order the roles of legal human rights standards and some institutional arrangements that may make the present world order less unjust All royalties from this book have been assigned to Oxfam

Domination and Global Political Justice Barbara Buckinx, Jonathan Trejo-Mathys, Timothy Waligore, 2015-02-11 Domination consists in subjection to the will of others and manifests itself both as a personal relation and a structural phenomenon serving as the context for relations of power Domination has again become a central political concern through the revival of the republican tradition of political thought not to be confused with the US political party However normative debates about domination have mostly remained limited to the context of domestic politics Also the republican debate has not taken into account alternative ways of conceptualizing domination Critical theorists liberals feminists critical race theorists and postcolonial writers have discussed domination in different ways focusing on such problems as imperialism racism and the subjection of indigenous peoples This volume extends debates about domination to the global level and considers how other streams in political theory and nearby disciplines enrich expand upon and critique the republican tradition's contributions to the debate This volume brings together for the first time mostly original pieces on domination and global political justice by some of this generation's most prominent scholars including Philip Pettit James Bohman Rainer Forst Amy Allen John McCormick Thomas McCarthy Charles Mills Duncan Ivison John Maynor Terry Macdonald Stefan Gosepath and Hauke Brunkhorst

Spheres of Global Justice Jean-Christophe Merle, 2013-06-22 Spheres of Global Justice analyzes six of the most important and controversial spheres of global justice each concerning a specific global social good These spheres are democratic participation migrations cultural minorities economic justice social justice and intergenerational justice Together they constitute two constellations dealt with in this collection of essays by leading scholars in two different volumes Global Challenges to Liberal Democracy and Fair Distribution These essays illustrate each of the spheres delving into their differences commonalities collisions and interconnections Unlike many writings on global justice Spheres of Global Justice does not content itself with describing the painful and advantageous effects of the globalization process as being ipso facto a global injustice or a just global order Rather this multidisciplinary collection of essays from a pluralist inspiration combines empirical analysis with theoretical approaches and ethical principles paying close attention to two aspects of the effects of the globalization process These aspects are the causal relationships that lead to such effects and the kinds of obligations or of normative relationships between global rights and correlative duties that applies to each specific individual case This volume illustrates how diverse global obligations are and how they can be grounded in diverse relationships identity ability to provide help causal responsibility past injustices protection of agency and promotion of independence etc These essays also demonstrate that an
