Real People Working In Science:

Real-Life Science Mysteries Colleen Kessler, 2021-09-09 Real Life Science Mysteries puts an exciting new spin on scientific thinking by profiling real life scientists showing students in grades 5-8 ways they can use science in their everyday lives. From a biologist studying the habits of garter snakes in Manitoba, Canada to a landscape designer and greenhouse owner in Ohio, the scientists in this book share information and solutions to the thorniest problems they face in their scientific careers. With the more than 30 activities included in Real Life Science Mysteries, students will be required to try their hand at solving common science problems and performing experiments while learning about real people from diverse backgrounds, all of whom share a love for discovering how things work and how they can work better. This book is perfect for any science classroom or young scientists looking to increase their knowledge. Grades 5-8 **Adult Education**

Teachers Rebecca Rogers, Mary Ann Kramer, 2020-08-11 This book examines the literacy practices of exemplary adult education teachers working within critical literacy frameworks. It provides an in-depth look at the complexity of adult literacy education through the lenses of these teachers. An understanding of this complexity helps teachers design literacy practices in classrooms on a daily basis. This is an important book for there is considerable pedagogical and political attention focused on adult literacy education at this time. As the field of adult education continues to grapple with issues of teacher professionalization and certification, it adds a much-needed teacher perspective. Appropriate as a text for adult education courses, this volume will also appeal to researchers, teacher educators, practitioners, and graduate students across the field of literacy education. **From Grammar to Science**

Victor H. Yngve, 1996-01-01 Although efforts have been under way for the past two centuries to treat language scientifically, linguists and others who work with language, speech, or communication have not found an adequate scientific foundation in current linguistic theory. Many of the difficulties are caused by longstanding confusions between the logical domain of science and grammar and the physical domain of sound waves and the people who speak and understand. In this book, therefore, the last impediments of tradition, the ancient semiotic grammatical foundations of linguistics, are set aside. We move into the physical domain where theories and hypotheses can be tested against observations of the physical reality. Here, new foundations are laid that are fully consonant with modern science as practiced in physics, chemistry, and biology. On these foundations is built a structure of testable, specific, dynamic causal laws of communicative behavior that provides support for treating previously recalcitrant context-dependent semantic, pragmatic, interactive, rhetorical, and literary phenomena. The central role of context in the foundations of the theory provides the insights of scientific lawfulness while still honoring the particularity of situations celebrated in the humanities. **Annual**

based on these engaging personality profiles They include Dan Shechtman the 2011 Nobel laureate and discoverer of quasicrystals James D Watson the Nobel laureate and codiscoverer of the double helix structure of DNA Linus Pauling the Nobel laureate remembered most for his work on the structure of proteins Edward Teller a giant of the 20th century who accomplished breakthroughs in understanding of nuclear fusion George Gamow a pioneering scientist who devised the initially ridiculed and now accepted Big Bang In each case the author has uncovered a singular personality characteristic motivational factor or circumstance that in addition to their extraordinary drive and curiosity led these scientists to make outstanding contributions For example Gertrude B Elion who discovered drugs that saved millions of lives was motivated to find new medications after the deaths of her grandfather and later her fianc F Sherwood Rowland who stumbled upon the environmental harm caused by chlorofluorocarbons eventually felt a moral imperative to become an environmental activist Rosalyn Yalow the codiscoverer of the radioimmunoassay always felt she had to prove herself in the face of prejudice against her as a woman These and many more fascinating revelations make this a must read for everyone who wants to know what traits and circumstances contribute to a person s becoming the scientist who makes the big breakthrough

McLuhan's Galaxies: Science Fiction Film Aesthetics in Light of Marshall McLuhan's Thought Artur Skweres, 2019-01-17 This groundbreaking book uses observations made by Marshall McLuhan to analyze the aesthetics of science fiction films treating them as visual metaphors or probes into the new reality dominated by electronic media it considers the relations between the senses and sensuality in Blade Runner the visually tactile character of the film and the status of replicants as humanity s new clothes it analyzes the mixture of Eastern and Western aesthetics in Star Wars analyzing Darth Vader as a combination of the literate and the tribal mindset it discusses the failure of visual society presented in the Terminator and Alien franchises the rekindling of horror vacui tribalism and the desire to obliterate the past as a result of the simultaneity of the acoustic space finally the book discusses the Matrix trilogy and Avatar as being deeply related in terms of the growing importance of tactility easternization tribalization as well as connectivity and the implosion of human civilization

How Fantasy Becomes Reality Karen E. Dill-Shackleford, 2015-12-01 From smartphones to social media from streaming videos to fitness bands our devices bring us information and entertainment all day long forming an intimate part of our lives Their ubiquity represents a major shift in human experience and although we often hold our devices dear we do not always fully appreciate how their nearly constant presence can influence our lives for better and for worse In this revised and expanded edition of *How Fantasy Becomes Reality* social psychologist Karen E Dill Shackleford explains what the latest science tells us about how our devices influence our thoughts feelings and behaviors In engaging conversational prose she discusses both the benefits and the risks that come with our current level of media saturation The wide ranging conversation explores Avatar Mad Men Grand Theft Auto and Comic Con to address critical issues such as media violence portrayals of social groups political coverage and fandom Her conclusions will empower readers to make our favorite sources of entertainment and information

work for us and not against us *Anthropology and Political Science* Myron J. Aronoff, Jan Kubik, 2013 What can anthropology and political science learn from each other The authors argue that collaboration particularly in the area of concepts and methodologies is tremendously beneficial for both disciplines though they also deal with some troubling aspects of the relationship Focusing on the influence of anthropology on political science the book examines the basic assumptions the practitioners of each discipline make about the nature of social and political reality compares some of the key concepts each field employs and provides an extensive review of the basic methods of research that bridge both disciplines ethnography and case study Through ethnography participant observation reliance on extended case studies and the use of anthropological concepts and sensibilities a greater understanding of some of the most challenging issues of the day can be gained For example political anthropology challenges the illusion of the autonomy of the political assumed by political science to characterize so called modern societies Several chapters include a cross disciplinary analysis of key concepts and issues political culture political ritual the politics of collective identity democratization in divided societies conflict resolution civil society and the politics of post Communist transformations *Linking Science and Technology to Society's Environmental Goals* Policy Division, Policy and Global Affairs, National Research Council, 1996-12-05 Where should the United States focus its long term efforts to improve the nation s environment What are the nation s most important environmental issues What role should science and technology play in addressing these issues Linking Science and Technology to Society s Environmental Goals provides the current thinking and answers to these questions Based on input from a range of experts and interested individuals including representatives of industry government academia environmental organizations and Native American communities this book urges policymakers to Use social science and risk assessment to guide decisionmaking Monitor environmental changes in a more thorough consistent and coordinated manner Reduce the adverse impact of chemicals on the environment Move away from the use of fossil fuels Adopt an environmental approach to engineering that reduces the use of natural resources Substantially increase our understanding of the relationship between population and consumption This book will be of special interest to policymakers in government and industry environmental scientists engineers and advocates and faculty students and researchers
