Real Relations:

The Metaphysics of Relations Anna Marmodoro, David Yates, 2016-01-07 This volume presents thirteen original essays which explore both traditional and contemporary aspects of the metaphysics of relations. It is uncontroversial that there are true relational predications: Abelard loves Eloise, Simmias is taller than Socrates, smoking causes cancer, and so forth. More controversial is whether any true relational predications have irreducibly relational truthmakers. Do any of the statements above involve their subjects jointly instantiating polyadic properties, or can we explain their truths solely in terms of monadic, non-relational properties of the relata? According to a tradition dating back to Plato and Aristotle and continued by medieval philosophers, polyadic properties are metaphysically dubious. In non-symmetric relations such as the amatory relation, a property would have to inhere in two things at once: lover and beloved, but characterise each differently, and this puzzled the ancients. More recent work on non-symmetric relations highlights difficulties with their directionality. Such problems offer clear motivation for attempting to reduce relations to monadic properties. By contrast, ontic structural realists hold that the nature of physical reality is exhausted by the relational structure expressed in the equations of fundamental physics. On this view, there must be some irreducible relations, for its fundamental ontology is purely relational. *The Metaphysics of Relations* draws together the work of a team of leading metaphysicians to address topics as diverse as ancient and medieval reasons for scepticism about polyadic properties, recent attempts to reduce causal and spatiotemporal relations, recent work on the directionality of relational properties, powers ontologies, and their associated problems, whether the most promising interpretations of quantum mechanics posit a fundamentally relational world, and whether the very idea of such a world is coherent. From those who question whether there are relational properties at all to those who hold they are a fundamental part of reality, this book covers a broad spectrum of positions on the nature and ontological status of relations from antiquity to the present day.

Compendium of Theology Saint Thomas Aquinas, Aeterna Press, 1992 To restore man who had been laid low by sin to the heights of divine glory the Word of the eternal Father though containing all things within His immensity willed to become small This He did not by putting aside His greatness but by taking to Himself our littleness No one can say that he is unable to grasp the teaching of heavenly wisdom what the Word taught at great length although clearly throughout the various volumes of Sacred Scripture for those who have leisure to study He has reduced to brief compass for the sake of those whose time is taken up with the cares of daily life Man's salvation consists in knowing the truth so that the human mind may not be confused by divers errors in making for the right goal so that man may not fall away from true happiness by pursuing wrong ends and in carrying out the law of justice so that he may not besmirch himself with a multitude of vices Aeterna Press

Epistemology and Transformation of Knowledge in Global Age Zlatan Delic, 2017-07-26 This book consists of seven chapters containing multiple questions of the global socially epistemological situation in science and higher education Despite the progress of techno sciences we are facing blind flaws in leading systems of knowledge and perception The global era in a paradox way connects the new knowledge of economics postpolitics postdemocracy and biopolitical regulation of live and unrepresentable forms of the global geo located violence Techno optimism and techno dictatorship in the twenty first century coincide with the ideology of market biopolitics of mandatory satisfaction religious revivalism and collapse of higher education In order for sciences to recover it is necessary to make a globally epistemological and moral turn toward the truth The book shows that when joint

desires of the new economics of knowledge and technology erase epistemology in a way to assign definitions of knowledge and rules and practices of the public usage of the mind then the time for epistemology is on its way **And in Our Hearts Take Up Thy Rest** Michael Eades, 2019-07-26 In his seminary classes and his writings Frederick Crowe SJ 1915-2012 sought to understand anew the eternal identity of the Holy Spirit and the Spirit's role in the Church's life Despite Crowe's fame as a professor of Trinitarian theology and his groundbreaking work on Thomas Aquinas' doctrine of complacent love as an analogy for the Holy Spirit's eternal procession no book has ever been published on this influential Canadian Jesuit who set up centres around the world for the study of the thought of Bernard Lonergan SJ 1904-84 Drawing on Crowe's published works and archival material Eades emphasizes how Crowe's Trinitarian pneumatology modestly and creatively extended Lonergan's theology of the Holy Spirit Making use of Crowe's own historical methodology Eades looks for the emergence of new and significant questions about the Holy Spirit in Crowe's works
