Reality Matrix The:

Unified Reality Theory Steven Kaufman, 2015-12-04 Unified Reality Theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each other or any other aspect of reality I recommend this book to anyone interested in understanding the nature of reality and their place in it Deepak Chopra Unified Reality Theory describes how all reality evolves from an absolute existence It also demonstrates that this absolute existence must have consciousness as an attribute that is intrinsic to its being Thus Unified Reality Theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness Unified Reality Theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation That is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that is twisted upon itself i.e. it remains whole while differentiating into other forms Thus Unified Reality Theory demonstrates that reality is a state of existential self relation The idea that the universe consists of existence which has formed relationships with itself isn't new Taoists have understood this idea for at least a couple of thousand years What is new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular Ultimately Unified Reality Theory uses science and logic to make the case that God exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that

Inside Reality Dr. Thomas Stark, There are those such as scientists who see only the outside of reality its appearance its surface its phenomenal aspect They are blind to the inside the substance the foundation the noumenal aspect They dismiss it as non-existent or illusion or epiphenomenon Scientists are those that believe that phenomena have no underlying noumena What you see is what you get Seeing is believing Everything is appearance Nothing is concealed There are no hidden variables and no unobservables The scientific method says Observe That works only if everything is observable If there are foundational unobservables science is catastrophically wrong and has cut itself off from the truth The only truth it can furnish is that of surfaces and appearances with no substance Those who truly want to understand reality must become masters of both perspectives inside and outside noumenon and phenomenon and see how they relate communicate and interact

The Four States of Reality Dr. Jonathan Sumner, 2018-12-13 As we explore the four states of reality it brings forth two hypothetical systems of physics that are of the author's creation the reallusion hypothesis and the two spectrums of energy hypothesis The reallusion hypothesis proposes that the universe is not an external presence of matter space energy and time that exists separate and independent to our own physical essence and our consciousness but rather the universe and our own physical essence are each the product of a virtual reality like process that is expressed within our consciousness as our consciousness is created within the physics of our mind and as our mind encompasses more than just our brain If we could explore into the levels of order that precede the subatomic level the universe would revert into the embodiment of all that our mind encompasses revealing that our mind transcends the boundaries of our perceived essence within processes that create our consciousness and the universe within it The first three states of reality correspond to the three stages of the reallusion process where code and data are processed into the creation of conscious perspective and independent thought The fourth state of reality corresponds to the afterlife The two spectrums of energy hypothesis explores how our conscious perspective of the universe is created within two spectrums of code and data
