Reason And Action:

Reason in Action Martin Hollis, 1996 This 1995 book collects together essays from twenty five years of Hollis's work on rationality and social action

Reason, Action and Morality John Kemp, 2021-05-27 Originally published in 1964 this book critically examines some philosophical theories of the relation between reason and morality with particular reference to the writings of Cudworth Locke Clarke Hume and Kant It also discusses the ways in which conduct may be assessed or criticised and of the extent to which these ways of assessment may amount to or be connected with moral assessment The conclusion shows how far and in what ways rational moral judgment is possible and what are its inevitable limitations

Action, Intention, and Reason Robert Audi, 2019-01-24 For the first time Robert Audi presents in *Action Intention and Reason* a full version of his theory of the nature explanation freedom and rationality of human action Over the years Audi has set out in journal articles different aspects of a unified theory of action This volume offers the unity of a single seamless book with thirteen self contained chapters two of them previously unpublished and a new overview of action theory and the book's contribution to it The book is divided into four parts each addressing a major problem area The chapters in Part One describe the motivational grounds of action explicate desire belief intention and volition and give a distinctive account of their interconnections In the second part Audi sets out a theory of the explanation of action and argues that actions can be both law governed and performed for reasons The third part provides an account of free action and its relation to causation and responsibility Chapters in the fourth and final part construct an account of rational action and its connections with practical reasoning self deception and weakness of will

Why Bank Panics Matter Frederick Betz, 2013-10-17 Bank panics have always mattered because they create serious disruptions in economic and financial activity depressing national economies But they matter even more now as information and communications technologies have stitched together a global financial system that is more vulnerable to crisis on a large scale For example the global bank panic of 2007 08 froze up the national economies of the U S England France Iceland Ireland and Germany all at the same time And each of their governments had to act to bail out their own banks without a consistent international regulatory framework In this volume Fred Betz takes a unique cross disciplinary approach to understanding bank panics with an emphasis on the U S Bank Panics of 1857 1907 1930 33 2007 08 and the European Bank Panics of 2010 2013 Despite over a hundred years of modern economic theory and many excellent historical studies about bank panics they are still poorly understood and certainly not yet preventable Partly this has been a function of the limitations of modern economic theory which cannot interpret bank panics as complex societal phenomena All societal phenomena are in reality multi disciplinary in scope and cross disciplinary in connections Bank panics can best be understood through the collective lenses of sociology political science psychology management science management of technology among other disciplines Through this dynamic approach the author identifies five key underlying triggers of bank panics 1 funding excessive leverage in speculation 2 lack of proper banking regulation 3 bad banking

practices 4 lack of banking integrity 5 corrupt banking practices In so doing he suggests new strategies for avoiding and recovering from bank panics and other financial crises

Reason and Action Bruce Aune, 1977-09-30 Philosophers writing on the subject of human action have found it tempting to introduce their subject by raising Wittgenstein's question What is left over if you subtract the fact that my arm goes up from the fact that I raise my arm The presumption is that something of particular interest is involved in an action of raising an arm that is not present in a mere bodily movement and the philosopher's task is to specify just what this is Unfortunately such an approach does not take us very far since a person could properly be said to raise his or her arm while asleep or hypnotized even though he or she would not be performing an action in the sense of action with which philosophers are particularly concerned To avoid this kind of difficulty I shall approach the subject of human action in a more academic way I shall expound some important rival theories of human action and introduce the relevant issues by commenting critically on those theories One of the issues I eventually introduce is a metaphysical one A theory of action makes sense I contend only on the assumption that there are such things as actions or events After considering some key arguments bearing on the issue I conclude that as matters currently stand in philosophy a metaphysically noncommittal attitude toward actions and events seems justified

Austrian Economics in America Karen I. Vaughn, 1998-01-28 This book examines the development of the ideas of the new Austrian school from its beginnings in Vienna in the 1870s to the present It focuses primarily on showing how the coherent theme that emerges from the thought of Carl Menger Ludwig von Mises Friedrich Hayek Ludwig Lachmann Israel Kirzner and a variety of new younger Austrians is an examination of the implications of time and ignorance or processes and knowledge for economic theory

Reorienting Economics Tony Lawson, 2012-08-21 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret Despite regular economic crises and ongoing critique of the discipline the drift from political economy into applied mathematics appears to continue unabated In this book Tony Lawson advocates a realignment of economics with social reality In analyzing mainstream economists' misplaced universality the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences

Action, Freedom and Responsibility Subasini Barik, 2022-10-19 This book is a work on human doing analyses and applies three central aspects of human life Action Freedom and Responsibility in the wide spectrum of the Philosophy of Mind Reflections on these issues and their interconnections have a significant effect on the Philosophy of Value and application of ethical theories in practical life This book even reconstructs the conceptual connection between action and freedom on the one hand and that between freedom and responsibility on the other It also puts the concepts of freedom and determinism to critical test and reinterprets them from different angles and perspectives The conventional doctrine of karma based on the teachings of the Bhagavadgītā is relieved from its usual deterministic presentation and a logically reasonable explanation is offered Human actions and human agency are central concepts in the philosophy of mind and action Free will

and responsibility constitute the bedrock of the moral life of the human agents and the book pinpoints that freedom is meant to undertake the goal oriented actions It is therefore focused on the enquiry into the various aspects of philosophy of mind as well as the philosophy of value

An Enquiry into Moral Notions (Routledge Revivals) John Laird, 2014-01-09 First published in 1935 this book compares and examines what John Laird termed the three most important notions in ethical science the concepts of virtue duty and well being Laird poses the question of whether any one of these three concepts is capable of being the foundation of ethics and of supporting the other two This is an interesting reissue which will be of particular value to students researching the philosophy of ethics and morality

Types of Ethical Theory James Martineau, 1901
