The Space of Culture Sebastian Luft, 2015-10-01 Sebastian Luft presents and defends the philosophy of culture championed by the Marburg School of Neo Kantianism Following a historical trajectory from Hermann Cohen to Paul Natorp and through to Ernst Cassirer this book makes a systematic case for the viability and attractiveness of a philosophical culture in a transcendental vein in the manner in which the Marburgers intended to broaden Kant s approach In providing a philosophical study of culture Luft adheres to

important Kantian tenets while addressing empirical studies of culture *The Space of Culture* culminates in an exploration of Cassirer's Philosophy of Symbolic Forms and argues for the extent to which Cassirer's thought was firmly rooted in the Marburg School despite his originality At the same time it shows how Cassirer opened up the philosophical study of culture to new horizons making it attractive for contemporary philosophy

The Philosophy of Philip Rieff William G. Batchelder IV, Michael P. Harding, 2025-01-23 Arguing that Philip Rieff was a Freudian who departed in vital and fascinating ways from Freud and a committed modern who nevertheless viewed modernity as a disaster this book makes clear his thought transcends contemporary left right culture war dichotomies Alasdair MacIntyre described Rieff's early work as a permanently valuable contribution to the human sciences The essays in this volume engage with Rieff's teaching both early and late across a number of different axes and from a number of disciplinary perspectives placing him into dialogue with thinkers such as Plato Nietzsche Freud Weber Heidegger Strauss Pieper Wilde and more *The Philosophy of Philip Rieff* conveys the utility of Rieff's theory for thinking through various contemporary issues from religion culture and race to the role of elites in a democratic society Philip Rieff's thought offers a key to unlocking the cultural trajectories of late modernity and this interdisciplinary volume engages that work in its depth and complexity while suggesting Rieff's place in the wider philosophic tradition

McNeal, 2024-12-23 This anthology broadly examines the interrelated roles of art science and experimentation in Nietzsche's philosophical project It is divided into two parts the first organized around the theme of experimentally reconceiving our world the second investigating the aforementioned subjects in Nietzsche's free spirit or middle period works Together the essays comprising the book underscore Nietzsche's concern that experimentation with values ultimately provide humankind with a new wherefore or purpose Wide ranging in its scope this volume brings together a diverse group of scholars working in both the analytic and continental traditions to provide original insights into Nietzsche's thought A unique contribution to the scholarship it deepens understanding of the relationship between Nietzsche's critiques of art and science the role this relationship plays in his future thought and the experimental life affirming practices that his free spirit project may enable toward the transfiguration of humankind

Philosophy, Science, Education and Culture Robert Nola, Gürol Irzik, 2006-02-22 Currents such as epistemological and social constructivism postmodernism and certain forms of multiculturalism that had become fashionable within science education circles in the last decades lost sight of critical inquiry as the core aim of education In this book we develop an account of education that places critical inquiry at the core of education in general and science education in particular Since science constitutes the paradigm example of critical inquiry we explain the nature of science paying particular attention to scientific methodology and scientific modeling and at the same time showing their relevance in the science classroom We defend a universalist rationalist and objectivist account of science against epistemological and social constructivist views postmodernist approaches and epistemic multiculturalist accounts
