Reason and Nature Morris R. Cohen, 2018-12-14 First published in 1931 this volume represents the culmination of twenty years of the study on the principles of science Noticing a widespread craving for philosophical light at a time of scant such offerings Morris R. Cohen aimed to demonstrate here the fundamental and ancient connection between nature and science between hearts and minds in an attempt to salve the developing mutual hostility between the two in the 1920s The volume bears particular relation to George Santayana's *Life of Reason* and Bertrand Russell's *Principles of Mathematics* and explores areas

including the character of the insurgence against reason and reason in the contexts of the natural and social sciences

Natural Law, Constitutionalism, Reason of State, and War J. A. Fernández-Santamaría, 2005 Natural Law

Constitutionalism Reason of State and War Counter Reformation Spanish Political Thought Volumes I and II aims at understanding how Spanish thinkers in the sixteenth and early seventeenth centuries approached the emerging institution of the state The volumes are divided evenly into four distinct but related parts that cover the Spaniards central concerns In the first a fundamental question is asked Is the state a natural institution In the second the theme is the best form of government The third part is concerned with the imperative need to define the ethical boundaries beyond which the state must not trespass Finally the fourth part examines the question of war as an instrument of policy *Logic for the Million; a Familiar Exposition of the Art of Reasoning; with an Appendix of the Philosophy of Language* James William Gilbert, 1865 *Beyond Reason* Sanjay Seth, 2020-12-11 The knowledge disseminated by universities and mobilized by states to govern populations has been globally dominant for more than a century It first emerged in the early modern period in Europe and subsequently became globalized through colonialism Despite the historical and cultural specificity of its origins modern Western knowledge was thought to have transcended its particularities such that unlike pre modern and non Western knowledges it was universal or true for all times and places In this bold and ambitious book Sanjay Seth argues that modern knowledge and the social sciences are a product of Western modernity claiming a spurious universality that what we treat as the truths discovered by social scientific reason are instead a parochial knowledge Drawing upon and deriving its critical energies principally from postcolonial theory *Beyond Reason* traverses many disciplines including science studies social history art and music history political science and anthropology and engages with a range of contemporary thinkers including Butler Habermas Chakrabarty Chatterjee and Rawls It demonstrates that while global in their impact the social sciences do not and cannot transcend the Western historical and cultural circumstances in which they emerged If the social sciences are not explained and validated simply by the fact that they are true it becomes possible to ask what purpose they serve what it is that they do A defining feature of modern knowledge is that it is divided into disciplines each with its own object of inquiry and corresponding protocols and thus asking what such knowledge does requires asking what purpose disciplines serve It also requires asking what ways of understanding the world they facilitate and what they disallow *Beyond Reason* proceeds to anatomize the disciplines of history and political science to ask what representations and relations with the past and with politics these academic disciplines enable and what ways of understanding and engaging the world they foreclose

Reason's Inquisition Christopher A. Colmo, 2023-08-29 *Reasons Inquisition On Doubtful Ground* is an exploration in the literature of political philosophy before and after Alfarabi and ranging from Thucydides to Leo Strauss and Eric Voegelin These studies most of them previously unpublished open inquiries into theory and practice reason and revelation and the relation between thinkers ancient and modern Readers may be surprised to see the Platonist Alfarabi presented as a critic of

Plato's theory in the name of practice while Alfarabi and Hobbes are shown to have a common interest in a theory commensurate with action Strauss Voegelin and Lucien Febvre all explore the problem of reason and revelation in relation to the limits of human knowledge An ambitious study of Shakespeare's Macbeth explores the ambiguity of both nature and knowledge in relation to male and female good and evil present and future The contrast between ancients and moderns is explicit in questions of the modern aspects of Marlowe's Doctor Faustus and of Rousseau's reversal of Plato Kierkegaard and Heidegger bring radical modernity into focus against a Platonic background in the closing essay These diverse essays attempt to follow the thinkers and themes explored in turning a critical gaze upon reason itself
