Recent Marxian Theory Class Formation Social Conflict In Contemporary Capitalism:

Recent Marxian Theory John F. Sitton, 1996-07-03 This book brings together some of the more prominent recent analyses within the Marxian tradition that bear on the topics of class formation and social conflict in contemporary capitalism After examining debates over historical agency class structure and electoral dynamics it explores the provocative arguments of analytical Marxists Claus Offe Jürgen Habermas and Immanuel Wallerstein In light of these discussions the author concludes that even if the variety of forces contemporary capitalism structurally generates do not promote the formation of a revolutionary proletariat class relations continue to be important for analyzing the historical trajectory of and challenges to capitalism although not in the way that Marx imagined *Classical Social Theory and Modern Society* Edward Royce, 2015-01-22 Karl Marx mile Durkheim and Max Weber are indispensable for understanding the sociological enterprise They are among the chief founders of the discipline and among the foremost theorists of modernity and their work can stimulate readers to reflect on their own identities and worldviews *Classical Social Theory and Modern Society* introduces students to these three thinkers and shows their continued relevance today The first chapter sets the stage by situating the work of Marx Durkheim and Weber in the context of three modernizing revolutions the Enlightenment the French Revolution of 1789 and the Industrial Revolution Three overview chapters follow that summarize the key ideas of each thinker focusing on their contributions to the development of sociology and their conceptions of modern society The last portion of the book explores the thinking of Marx Durkheim and Weber on four themes the pathologies of modern society the predicament of the modern individual the state and democracy and socialism versus capitalism These thematic chapters place Marx Durkheim and Weber in dialogue with one another offering students the opportunity to wrestle with conflicting ideas on issues that are still significant today Classical sociology is essential to the teaching of sociology and also an invaluable tool in the education of citizens *The New Blackwell Companion to Medical Sociology* William C. Cockerham, 2016-09-26 An authoritative topical and comprehensive reference to the key concepts and most important traditional and contemporary issues in medical sociology Contains 35 chapters by recognized experts in the field both established and rising young scholars Covers standard topics in the field as well as new and engaging issues such as bioterrorism bioethics and infectious disease Chapters are thematically arranged to cover the major issues of the sub discipline Global range of contributors and an international perspective ***Habermas and Contemporary Society*** J. Sitton, 2003-08-15 Over the last four decades Jürgen Habermas has forged an innovative and much discussed theory of contemporary capitalist society Building on Max Weber's thesis that the dynamic of capitalism actually erodes individual freedom and the meaningfulness of social life famously resulting in a culture of specialists without spirit sensualists without heart Habermas traces contemporary social conflict to resistance to this dynamic by a variety of social groups His theory of communicative action attempts to show the possibilities in contemporary society for moving toward a more balanced social life that unlike other political currents today would not

sacrifice the truly progressive features of complex modern societies By marginalizing methodological and other more specialized theoretical concerns this book focuses on Habermas s substantive portrayal of contemporary society and its discontents **Habermas, Critical Theory and Health** Graham Scambler,2013-11-05 The first book to apply Habermas s ideas to health Applies the latest social theory to health and illness The contributors offer innovative approaches to the most central topics in medical sociology *Understanding Marxism* Geoff Boucher,2014-09-03 Marxism as an intellectual movement has been one of the most important and fertile contributions to twentieth century thought No social theory or political philosophy today can be taken seriously unless it enters a dialogue not just with the legacy of Marx but also with the innovations and questions that spring from the movement that his work sparked Marxism Marx provided a revolutionary set of ideas about freedom politics and society As social and political conditions changed and new intellectual challenges to Marx s social philosophy arose the Marxist theorists sought to update his social theory rectify the sociological positions of historical materialism and respond to philosophical challenges with a Marxist reply This book provides an accessible introduction to Marxism by explaining each of the key concepts of Marxist politics and social theory The book is organized into three parts which explore the successive waves of change within Marxist theory and places these in historical context while the whole provides a clear and comprehensive account of Marxism as an intellectual system *Pluralist Readings in Economics: Key Concepts and Policy Tools for the 21st Century* Maria Alejandra Madi,2017-06-15 The era of globalization has brought about unprecedented social political and environmental challenges for policy makers around the world due to the global impact of economic decisions In view of these challenges economics as a discipline needs to be taught with the goal of broadening the dialogue on social responsibility and developing a new pluralist culture of decision making which is inclusive to different schools of economic thought Pluralist Readings in Economics Key concepts and policy tools for the 21st century highlights the long standing debates regarding economic systems business models criteria of justice and economic policies by providing conceptual openings to economic theory in an engaging and accessible way The author provides broad coverage of relevant topics through the selection of influential economic thinkers and introduces the reader to their ideas context and relevant interpretations While dealing with complex problems the author goes beyond commonly known concepts by presenting questions on the historical context of globalization The study of economic concepts in this way leads to asking new questions concerning various issues relevant to economics The goal of the text is to provide an interdisciplinary perspective to readers in order to equip them with information that is key to address global economic challenges Thus this pluralist approach calls for a reflection of the evolution of global social and economic conditions to demonstrate problem solving approaches that align with the goal of addressing these challenges Pluralist Readings in Economics Key concepts and policy tools for the 21st century is suitable to a broad interdisciplinary readership as it will benefit all those who seek to better understand the complex stakes of the capitalist system in the tensions between regulatory policies free market

equilibria and participatory openings in governance This introductory work also prepares the reader for debates and discussion in economic theory aimed at shaping policy transformations towards a more equitable just and sustainable world

Sport And Society: History, Power And Culture Scambler, Graham, 2005-05-01 This text presents a comprehensive account of the contemporary sociology of sport It examines the changing role of sport in society and analyses topics such as representations of sport in the media and violence in sport

Marxist Class Theory for a Skeptical World Raju J Das, 2017-01-16 Marxist Theory of Class for a Skeptical World is a critique of some of the influential radical theories of class and presents an alternative approach to it This book critically discusses Analytical Marxist and Post structuralist Marxist theories of class and offers an alternative approach that is rooted in the ideas of Marx and Engels as well as Lenin and Trotsky It presents a materialist dialectical foundation for class theory and conceptualizes class at the trans historical level and at the level of capitalism It shows that capitalism is an objectively existing articulation of exchange property and value relations between capital and labour at multiple geographical scales and that the state is an arm of class relation It draws out implications of class relations for consciousness and political power of the proletariat
