Recent Trends In Meaningtext Theory:

Recent Trends in Meaning-text Theory Leo Wanner, 1997-01-01 The present volume contains articles of well known representatives of the Meaning Text Theory MTT and other related linguistic theories Founded by I Mel'cuk and A Zholkovsky in the sixties in Moscow MTT soon became known in the West as a prominent outsider theory The picture changed since then though MTT gained importance in several areas of linguistics and computational linguistics It influenced the design of new grammar formalisms such as Dependency Tree Grammars Also specific parts of MTT have been directly overtaken into other theories consider for example the work on integrating Lexical Functions into Pustejovsky's Generative Lexicon The present volume is a further convincing demonstration of MTT's liveliness and relevance to the field's burning issues The focus of the volume is on semantics semantic representation and relation of semantics to surface in MTT Six out of eight articles Polguère, Escalier, Paducheva, St Germain, Beck, Bogulavsky deal with problems related to these topics while the last two articles of the volume Sgall and Rambow, Joshi throw a bridge between MTT or more precisely between dependency based theories of which MTT is one instantiation and other linguistic theories

Dependenz und Valenz/ Dependency and Valency Vilmos Agel, Ludwig M. Eichinger, Hans Werner Emonds, Peter Hellwig, Hans Jürgen Heringer, Henning Lobin, 2003 Annotation The handbook provides an overview of the current status of this research In its first volume the handbook begins by presenting the historical background of the theories in which the conceptions are rooted and then goes on to deal with the individual elements

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2003-06-29 CICLing 2001 is the second annual Conference on Intelligent text processing and Computational Linguistics hence the name CICLing see www.CICLing.org It is intended to provide a balanced view of the cutting edge developments in both theoretical foundations of computational linguistics and practice of natural language text processing with its numerous applications A feature of the CICLing conferences is their wide scope that covers nearly all areas of computational linguistics and all aspects of natural language processing applications The conference is a forum for dialogue between the specialists working in these two areas This year our invited speakers were Graeme Hirst U Toronto Canada Sylvain Kahane U Paris 7 France and Ruslan Mitkov U Wolverhampton UK They delivered excellent extended lectures and organized vivid discussions A total of 72 submissions were received all but very few of surprisingly high quality After careful reviewing the Program Committee selected for presentation 53 of them 41 as full papers and 12 as short papers by 98 authors from 19 countries Spain 19 authors Japan 15 USA 12 France Mexico 9 each Sweden 6 Canada China Germany Italy Malaysia Russia United Arab Emirates 3 each Argentina 2 Bulgaria The Netherlands Ukraine UK and Uruguay 1 each

Deconstructing Constructions Christopher S. Butler, Javier Martín Arista, 2009-01-14 This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a construction is and what roles constructions play in the

frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to the ongoing debate about the relationship between functionalist and constructionist models **An Advanced Introduction**

to Semantics Igor Mel'čuk, Jasmina Milićević, 2020-04-02 This book is an advanced introduction to semantics that presents this crucial component of human language through the lens of the Meaning Text theory an approach that treats linguistic knowledge as a huge inventory of correspondences between thought and speech Formally semantics is viewed as an organized set of rules that connect a representation of meaning Semantic Representation to a representation of the sentence Deep Syntactic Representation The approach is particularly interesting for computer assisted language learning natural language processing and computational lexicography as our linguistic rules easily lend themselves to formalization and computer applications The model combines abstract theoretical constructions with numerous linguistic descriptions as well as multiple practice exercises that provide a solid hands on approach to learning how to describe natural language semantics

Advances in Artificial Intelligence and Its Applications Obdulia Pichardo Lagunas, Oscar Herrera Alcántara, Gustavo Arroyo Figueroa, 2015-11-19 The two volume set LNAI 9413 9414 constitutes the proceedings of the 14th Mexican International Conference on Artificial Intelligence MICAI 2015 held in Cuernavaca Morelos Mexico in October 2015 The total of 98 papers presented in these proceedings was carefully reviewed and selected from 297 submissions They were organized in topical sections named natural language processing logic and multi agent systems bioinspired algorithms neural networks evolutionary algorithms fuzzy logic machine learning and data mining natural language processing applications educational applications biomedical applications image processing and computer vision search and optimization forecasting and intelligent applications *New-dialect Formation in Canada* Stefan Dollinger, 2008 This book details the development of eleven modal auxiliaries in late 18th and 19th century Canadian English in a framework of new dialect formation The study assesses features of the modal auxiliaries tracing influences to British and American input varieties parallel developments or Canadian innovations The findings are based on the Corpus of Early Ontario English pre Confederation Section the first electronic corpus of early Canadian English The data which are drawn from newspapers diaries and letters include original transcriptions from manuscript sources and texts from semi literate writers While the overall results are generally coherent with new dialect formation theory the Ontarian context suggests a number of adaptations to the current model In addition to its general Late Modern English focus New Dialect Formation in Canada traces changes in epistemic modal functions up to the present day offering answers to the loss of root uses in the central modals By comparing Canadian with British and American data important theoretical insights on the origins of the variety are gained The study offers a sociohistorical

perspective on a still understudied variety of North American English by combining language internal features with settlement history in this first monograph length diachronic treatment of Canadian English in real time **Semantic Relations and the Lexicon** M. Lynne Murphy, 2003-10-02 Semantic Relations and the Lexicon explores the many paradigmatic semantic relations between words such as synonymy antonymy and hyponymy and their relevance to the mental organization of our vocabularies Drawing on a century s research in linguistics psychology philosophy anthropology and computer science M Lynne Murphy proposes a pragmatic approach to these relations Whereas traditional approaches have claimed that paradigmatic relations are part of our lexical knowledge Dr Murphy argues that they constitute metalinguistic knowledge which can be derived through a single relational principle and may also be stored as part of our extra lexical conceptual representations of a word Part I shows how this approach can account for the properties of lexical relations in ways that traditional approaches cannot and Part II examines particular relations in detail This book will serve as an informative handbook for all linguists and cognitive scientists interested in the mental representation of vocabulary

Evaluation in Context Geoff Thompson, Laura Alba-Juez, 2014-02-04 It is now an acknowledged fact in the world of linguistics that the concept of evaluation is crucial and that there is very little if any discourse that cannot be analyzed through the prism of its evaluative content This book presents some of the latest developments in the study of this phenomenon Released more than a decade later than Hunston and Thompson s 2000 Evaluation in Text Evaluation in Context is designed as its sequel in an attempt to continue update and extend the different avenues of research opened by the earlier work Both theoretical and empirical studies on the topic are presented with the intention of scrutinizing as many of its dimensions as possible by not only looking at evaluative texts but also considering the aspects of the discursive context that affect the final evaluative meaning at both the production and reception stages of the evaluative act The editors main objective has been to gather contributions which investigate the manifold faces and phases of evaluation by presenting a wide variety of perspectives that include different linguistic theories e g Axiological Semantics Functionalism or Politeness Theory different levels of linguistic description e g phonological lexical or semantic and different text types and contexts e g the evaluation found in ironic discourse the multimodality of media discourse or the world of politics just to name a few The volume can be of use not only for scholars who study the evaluative function of language but also for students who wish to pursue research in the area **New Approaches to Slavic Verbs of Motion** Viktoria Hasko, Renee Perelmutter, 2010 This volume unifies a wide breadth of interdisciplinary studies examining the expression of motion in Slavic languages The contributors to the volume have joined in the discussion of Slavic motion talk from diachronic typological comparative cognitive and acquisitional perspectives with a particular focus on verbs of motion the nuclei of the lexicalization patterns for encoding motion Motion verbs are notorious among Slavic linguists for their baffling idiosyncratic behavior in their lexical semantic syntactical and aspectual characteristics The collaborative effort of this volume is aimed both at highlighting and

accounting for the unique properties of Slavic verbs of motion and at situating Slavic languages within the larger framework of typological research investigating cross linguistic encoding of the motion domain Due to the multiplicity of approaches to the linguistic analysis the collection offers it will suitably complement courses and programs of study focusing on Slavic linguistics as well as typology diachronic and comparative linguistics semantics and second language acquisition This important book is a model of in depth exploration that is much needed intra typological diachronic and synchronic exploration of contrasting ways of encoding a particular semantic domain in this case the domain of motion events The various Slavic languages present contrasting but related solutions to the intersection of motion and aspect And as a group they offer alternate forms of satellite framed typology in contrast to the more heavily studied Germanic languages of this general type The up to date and interdisciplinary nature of the volume makes it essential reading in cognitive and typological linguistics Dan I Slobin Professor Emeritus of Psychology and Linguistics University of California Berkeley A feast for the mind with untold riches and variety different approaches patterns and usage diachronic as well as synchronic Slavic and not just Russian All on a high intellectual level from capable scholars Ful besy were the editors in every thing That to the feste was appertinent Alan Timberlake Columbia University
