Recent History:

Doing Recent History Claire Bond Potter, Renee C. Romano, 2012-04-25 Recent history the very phrase seems like an oxymoron Yet historians have been writing accounts of the recent past since printed history acquired a modern audience and in the last several years interest in recent topics has grown exponentially With subjects as diverse as Walmart and disco and personalities as disparate as Chavez and Schlafly books about the history of our own time have become arguably the most exciting and talked about part of the discipline Despite this rich tradition and growing popularity historians have engaged in little discussion about the specific methodological political and ethical issues related to writing about the recent past The twelve essays in this collection explore the challenges of writing histories of recent events where visibility is inherently imperfect hindsight and perspective are lacking and historiography is underdeveloped Those who write about events that have taken place since 1970 encounter exciting challenges that are both familiar and foreign to scholars of a more distant past including suspicions that their research is not historical enough negotiation with living witnesses who have a very strong stake in their own representation and the task of working with new electronic sources Contributors to this collection consider a wide range of these challenges They question how sources like television and video games can be better utilized in historical research explore the role and regulation of doing oral histories consider the ethics of writing about living subjects discuss how historians can best navigate questions of privacy and copyright law and imagine the possibilities that new technologies offer for creating transnational and translingual research opportunities *Doing Recent History* offers guidance and insight to any researcher considering tackling the not so distant past

Discursive Processes of Intergenerational Transmission of Recent History M. Achugar, 2016-04-12 Debates about how to remember politically contested or painful pasts exist throughout the world As with the case of the Holocaust in Europe and Apartheid in South Africa South American countries are struggling with the legacy of state terrorism left by the 1970s dictatorships Coming to terms with the past entails understanding the role different social actors played in those events as well as what those event mean for us today Young people in these situations have to learn about painful historical events over which there is no national consensus This book explores discursive processes of intergenerational transmission of recent history through the case of the Uruguayan dictatorship The main themes of the book are the discursive construction of social memory and intergenerational transmission of contested pasts through recontextualization resemiotization and intertextuality

Seth, 2010 This comprehensive and balanced history of modern Korea explores the social economic and political issues it has faced since being catapulted into the wider world at the end of the nineteenth century Placing this formerly insular society in a global context Michael J Seth describes how this ancient culturally and ethnically homogeneous society first fell victim to Japanese imperialist expansionism and then was arbitrarily divided in half after World War II Seth traces the postwar paths of the two

Koreas with different political and social systems and different geopolitical orientations as they evolved into sharply contrasting societies South Korea after an unpromising start became one of the few postcolonial developing states to enter the ranks of the first world with a globally competitive economy a democratic political system and a cosmopolitan and dynamic culture By contrast North Korea became one of the world's most totalitarian and isolated societies a nuclear power with an impoverished and famine stricken population Considering the radically different and historically unprecedented trajectories of the two Koreas Seth assesses the insights they offer for understanding not only modern Korea but the broader perspective of world history
