Redefining Security In The Middle East:

Redefining security in the Middle East Tami Jacoby, Brent Sasley, 2018-07-30 For over five decades the Cold War security agenda was distinguished by the principal strategic balance that of a structure of bipolarity between the United States US and the Soviet Union USSR This book seeks to draw from current developments in critical security studies in order to establish a new framework of inquiry for security in the Middle East It addresses the need to redefine security in the Middle East The focus is squarely on the Arab Israeli context in general and the Palestinian Israeli context in particular The character of Arab Israeli relations are measured by the Israeli foreign policy debate from the 1950s to the 1990s A dialogue between Islam and Islamism as a means to broaden the terrain on which conflict resolution and post bipolar security in the Middle East is to be understood is presented The Middle East peace process MEPP was an additional factor in problematizing the military strategic concept of security in the Middle East The shift in analysis from national security to human security reflects the transformations of the post Cold War era by combining military with non military concerns such as environmental damage social unrest economic mismanagement cultural conflict gender inequity and radical fundamentalism By way of contrast to realist international relations IR theory developing world theorists have proposed a different set of variables to explain the unique challenges facing developing states Finally the book examines the significance of ecopolitics in security agendas in the Middle East An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence *Redefining Security in the Middle East* Tami Amanda Jacoby, Brent Sasley, 2002 Publisher Description

Regional Security in the Middle East Pinar Bilgin, 2004-09-09 This is an accessible yet critical analysis of regional security in the Middle East Using a non realist approach Bilgin provides a comprehensive study of the past present and future of security in the region She also considers the question of identity formation explaining how and why various regional representations came into being and explor *Human Security in the Middle East and North Africa* Alaa Al-Din

Arafat, 2024-12-20 This book analyzes major human security threats in the MENA region including food water energy climate and health security It also examines sectarian conflict terrorism and poverty in the region The author highlights the relationship between human security concerns and conventional or military security threats He demonstrates how MENA nations failed to respond to the region s human security threats and to develop a human security formula and regional security architecture that included both human and conventional security threats Therefore this book concludes that the MENA region s future will be determined by its governments ability to address human security threats **Regional**

Security in the Middle East , Socio-Political Order and Security in the Arab World Andreas Krieg, 2017-03-27 This book examines the connection between socio politics and security in the Arab World In an effort to understand the social and political developments that have been on going in the Arab World since the 1990s culminating in the Arab Spring Krieg moves beyond liberal deterministic assumptions most notably that the promotion of liberal values and democracy are the

panacea for the structural problems of the region. Instead, this text advances the case that grievances related to individual security needs are at the heart of regional insecurity and instability. Looking towards the future, the author asserts that regimes can only be resilient if they are able to provide for individual security inclusively. When regimes fail to cater for public security, they might be replaced by alternative non-state security providers. Jordan's Inter-Arab Relations Laurie Brand, 1995-01-05. Lisa Anderson, Columbia University.

Thinking International Relations Differently Arlene Tickner, David L. Blaney, 2013-03-01. A host of voices has risen to challenge Western core dominance of the field of International Relations (IR), and yet intellectual production about world politics continues to be highly skewed. This book is the second volume in a trilogy of titles that tries to put the international back into IR by showing how knowledge is actually produced around the world. The book examines how concepts that are central to the analysis of international relations are conceived in diverse parts of the world, both within the disciplinary boundaries of IR and beyond them. Adopting a thematic structure, scholars from around the world discuss issues that include security, the state, authority, and sovereignty, globalization, secularism, and religion, and the international, an idea that is central to discourses about world politics but which, in given geocultural locations, does not necessarily look the same. By mapping global variation in the concepts used by scholars to think about international relations, the work brings to light important differences in non-Western approaches and the potential implications of such differences for the IR discipline and the study of world politics in general. This is essential reading for anyone who is concerned about the history, development, and future of International Relations.

Emerging Security Threats in the Middle East Ashok Swain, Anders Jägerskog, 2016-04-12. Increasingly, the Middle East and its growing population face a highly complex and fragile security system. The rich deposits of natural resources, such as oil and gas, suffer from a strained renewable resource base that includes water and arable land. This leads to water scarcity, desertification, and land degradation. Increasing population, industrialization, and urbanization put more and more demand on the food supply. Energy insecurity may not be generally associated with the Middle East, but the countries in the eastern Mediterranean part have been traditionally vulnerable to it, as their fossil fuel endowments have been low. Another issue is the large-scale temporary labor migration and the large number of forced migrants, refugees, and internally displaced persons. The book analyzes these emerging security challenges in a comprehensive and systematic manner. It draws national and regional security issues into both the global security and human security perspectives.

World Society and the Middle East S. Stetter, 2008-07-11. Offers a novel cross-disciplinary theoretical perspective on conflict and conflict transformation in world society and integrates the study of conflicts in the Middle East region into a modern systems theoretical framework.

Unveiling the Magic of Words: A Report on "**Redefining Security In The Middle East**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their power to kindle emotions, provoke contemplation, and ignite transformative change is truly awe-inspiring. Enter the realm of "**Redefining Security In The Middle East**," a mesmerizing literary masterpiece penned with a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve in to the book is central themes, examine its distinctive writing style, and assess its profound affect the souls of its readers.
