Reenchanting Science Holism In German Culture From Wilhelm II To Hitler:

Reenchanting Science Anne Harrington, 1999 *The Incomplete Child* Scot Danforth, 2009 With the passage of Public Law 94-142 in 1975 the learning disability construct gained national legitimacy Feeding that political achievement behind the very idea of a learning disability was the development of a science that blended neurology psychology and education This book tracks the historical creation of the science of learning disabilities beginning with the clinical research with brain injured World War I soldiers conducted by German physician Kurt Goldstein It traces the growth of the two primary research traditions the psycholinguistic theory of Samuel Kirk and the movement education of Newell Kephart exploring how specific scientific orientations theories and practices led to the birth of the learning disability in the United States **Science, Technology and the German Cultural Imagination** Christian Emden, David R. Midgley, 2005 This volume of conference papers highlights the connections between developments in technology and scientific thought since the 16th century on the one hand and the ways in which the creative imagination of literary writers has responded to those developments on the other Great Minds in Despair Frank W. Stahnisch, 2025-08-10 The twentieth century witnessed two devastating world wars that led to the exodus of millions of people Counted among them were hundreds of neuroscientists and biological psychiatrists from Nazi Germany and its surrounding countries who were forced to emigrate in the 1930s and 1940s Many of them settled in North America where they profoundly influenced the development of the biomedical sciences Focusing on the years between 1933 and 1989 *Great Minds in Despair* examines the long term effects of this forced migration on scientific and medical cultures in North America and on the researchers themselves Frank Stahnisch traces the lives and careers of approximately four hundred German speaking doctors scientists and researchers over two generations Placed in unfamiliar research settings in Canada and the United States they helped to build the fields of neuroscience psychiatry clinical psychology and the cognitive sciences even as they rebuilt their own lives amid myriad challenges including cultural adaption and the complications of relicensing Stahnisch explores how generational factors gender international networking refugee organizations and national funding agencies shaped their experiences and affected postwar remigration *Great Minds in Despair* provides an important revision to the brain gain thesis in migration studies by turning attention to the working conditions and social acculturation of an influential academic refugee group in North America The Scalpel and the Butterfly Deborah Rudacille, 2015-12-15 An engrossing and eloquent study of the history and ethics of animal experimentation The heart of a pig may soon beat in a human chest Sheep cattle and mice have been cloned Slowly but inexorably scientists are learning how to transfer tissues organs and DNA between species Some think this research is moving too far too fast without adequate discussion of possible consequences Is it ethical to breed animals for spare parts When does the cost in animal life and suffering outweigh the potential benefit to humans In precise and elegant prose *The Scalpel and the Butterfly* explores the ongoing struggle between the promise offered by new research and the anxiety about

safety and ethical implications in the context of the conflict between experimental medicine and animal protection that dates back to the mid nineteenth century Deborah Rudacille offers a compelling and cogent look at the history of this divisive topic from the days of Louis Pasteur and the founding of organized anti vivisection in England to the Nazi embrace of eugenics from animal rights to the continuing war between PETA and biomedical researchers and the latest developments in replacing reducing and refining animal use for research and testing

The Early Frankfurt School and Religion M. Kohlenbach,R. Geuss,2004-12-14 Are religions tissues of superstition and repression or repositories of the highest hopes and aspirations of humanity or perhaps both at the same time For many of those thinkers who lived through the horrors and upheavals of the first half of the twentieth century this old question acquired a new urgency This volume examines the ways in which the authors of the early Frankfurt School criticized adopted and modified traditional forms of religious thought and practice Focusing on the works of Theodor W Adorno Walter Benjamin Erich Fromm Max Horkheimer Otto Kirchheimer and Franz Neumann it analyzes the relevance of religious traditions and of the Enlightenment critique of religion for modern conceptions of emancipatory thought art law and politics

Adorno's Gamble Mikko Immanen,2025-02-15 Adorno s Gamble offers a startling reinterpretation of the evolution of Theodor W Adorno s thought usually seen as a mix of critical Marxism Freudian psychoanalysis aesthetic modernism and Jewish tradition Mikko Immanen argues for another previously unacknowledged source of Adorno s thinking on instrumental reason dialectic of enlightenment and frailty of democracy the intellectual underpinnings of Germany s conservative revolutionary movement of the 1920s In a dramatic reappraisal of the leading light of the Frankfurt School Immanen follows Adorno s path of philosophical development from the late Weimar era through years in exile to the postwar period establishing his debt to thinkers of radical conservative bent In particular he focuses on Adorno s enduring and daring effort to harness two of the most infamous works from this tradition Oswald Spengler s *Decline of the West* and Ludwig Klages s *The Spirit as Adversary of the Soul* and to repurpose their reactionary teachings for emancipatory ends

A New Field in Mind Frank W. Stahnisch,2020-03-12 In recent decades developments in research technologies and therapeutic advances have generated immense public recognition for neuroscience However its origins as a field often linked to partnerships and projects at various brain focused research centres in the United States during the 1960s can be traced much further back in time In *A New Field in Mind* Frank Stahnisch documents and analyzes the antecedents of the modern neurosciences as an interdisciplinary field Although postwar American research centres such as Francis O Schmitt s Neuroscience Research Program at MIT brought the modern field to prominence Stahnisch reveals the pioneering collaborations in the early brain sciences at centres in Germany Austria and Switzerland in the first half of the twentieth century One of these Heinrich Obersteiner s institute in Vienna began its work in the 1880s Through case studies and collective biographies Stahnisch investigates the evolving relationships between disciplines anatomy neurology psychiatry physiology serology and neurosurgery which created new epistemological and social contexts for brain research

He also shows how changing political conditions in Central Europe affected the development of the neurosciences ultimately leading to the expulsion of many physicians and researchers under the Nazi regime and their migration to North America An in depth and innovative study A New Field in Mind tracks the emergence and evolution of neuroscientific research from the late nineteenth century to the postwar period **Phylogenetic Systematics** Olivier Rieppel,2016-07-06 Phylogenetic Systematics Haeckel to Hennig traces the development of phylogenetic systematics against the foil of idealistic morphology through 100 years of German biology It starts with the iconic Ernst Haeckel the German Darwin from Jena and the evolutionary morphology he developed It ends with Willi Hennig the founder of modern phylogenetic **Body, Femininity and Nationalism** Marion E.P. de Ras,2012-09-10 This social and cultural history of girls in the German youth movements in the pre Nazi era brings fascinating new light to bear on the history of the German youth movements It contributes to our wider understanding of girlhood in the period and investigates how mentalities collective identities and German nationalism developed in the three decades before the Nazi period
