Sandra Wood, 2008 Introduction to Health Sciences Librarianship covers a wide range of areas beyond traditional medical libraries This helpful guide provides an overview of the health care environment academic health sciences hospital libraries health informatics and more This single volume provides a sound foundation on health sciences libraries to students beginning and practicing librarians alike Health Sciences Librarianship M. Sandra Wood, 2014-05-09 This comprehensive textbook of health sciences librarianship provides the library student and new librarian with the background and skills necessary to handle day to day activities and provide quality services in a health sciences library or a more general library serving students and practitioners in the health professions The book has 16 chapters each authored by an experienced medical librarian and is organized logically into 4 sections The Profession Collection Services User Services and Administrative Services Each chapter contains photographs figures tables and charts illustrating the essential concepts introduced Overseen by a 3 member editorial board of leading professors in medical librarianship programs this authoritative text provides students beginning and experienced librarians with a comprehensive overview of state of the art medical librarianship

Introduction to Reference Sources in the Health Sciences Jeffrey T. Huber, Susan Swogger, 2014-04-22 Prepared in collaboration with the Medical Library Association this completely updated revised and expanded edition lists classic and up to the minute print and electronic resources in the health sciences helping librarians find the answers that library users seek Introduction to Health Sciences Librarianship Frank Kellerman, 1997-01-21 Health sciences librarianship today demands a balance among computer files human ingenuity and print sources The many information sources presently available enable health sciences librarians to do a better job but that job has also become correspondingly more difficult This professional reference surveys the various types of print and electronic resources important to the health sciences and provides valuable practical advice to librarians for meeting the information needs of researchers practicing physicians and other health professionals Health sciences librarianship today demands a balance among electronic files human ingenuity and print sources Thanks to computerization and telecommunications librarians can do much more now than just a few years ago While the tremendous growth in available resources has enabled librarians to provide more thorough information to patrons the process of doing so has become correspondingly more complex While librarians still need to use many traditional skills they must also develop new ways of finding and utilizing information This professional reference surveys the field of health sciences librarianship and provides extensive practical advice to assist health sciences librarians in meeting the information needs of their patrons Because journal literature is the principal medium of information in the health sciences the book begins with an examination of the roles that journals play as well as the large proportion of the library budget that they consume The volume then discusses techniques of searching journal literature such as print and electronic indexing and abstracting tools Additional chapters are

devoted to the selection and organization of health sciences books and reference tools and services Special attention is given to the electronic distribution of biomedical information With important sources of health information now becoming available via the Internet this book provides a point of departure to evaluate those sources The final chapter discusses the various environments that shape health sciences librarianship such as library settings professional associations and economic contexts
