Leys,2009-01-10 Why has shame recently displaced guilt as a dominant emotional reference in the West After the Holocaust survivors often reported feeling guilty for living when so many others had died and in the 1960s psychoanalysts and psychiatrists in the United States helped make survivor guilt a defining feature of the survivor syndrome Yet the idea of survivor guilt has always caused trouble largely because it appears to imply that by unconsciously identifying with the perpetrator victims psychically collude with power In *From Guilt to Shame* Ruth Leys has written the first genealogical critical study of the vicissitudes of the concept of survivor guilt and the momentous but largely unrecognized significance of guilt s replacement by shame Ultimately Leys challenges the theoretical and empirical validity of the shame theory proposed by figures such as Silvan Tomkins Eve Kosofsky Sedgwick and Giorgio Agamben demonstrating that while the notion of survivor guilt has depended on an intentionalist framework shame theorists share a problematic commitment to interpreting the emotions including shame in antiintentionalist and materialist terms **Family Problems and Family Violence**

Mental Patient Abigail Gosselin, 2022-12-13 A philosopher who has experienced psychosis argues that recovery requires regaining agency and autonomy within a therapeutic relationship based on mutual trust In Mental Patient philosopher Abigail Gosselin uses her personal experiences with psychosis and the process of recovery to explore often overlooked psychiatric ethics For many people who struggle with psychosis she argues psychosis impairs agency and autonomy She shows how clinicians can help psychiatric patients regain agency and autonomy through a positive therapeutic relationship characterized by mutual trust Patients she says need to take an active role in regaining their agency and autonomy specifically by giving testimony constructing a narrative of their experience to instill meaning making choices about treatment and deciding to show up and participate in life activities Gosselin examines how psychotic experience is medicalized and describes what it is like to be a patient receiving mental health care treatment In addition to mutual trust she says a productive therapeutic relationship requires the clinician's empathetic understanding of the patient's experiences and perspective She also explains why psychotic patients sometimes feel ambivalent about recovery and struggle to stay committed to it The psychiatric ethics issues she examines include the development of epistemic agency and credibility epistemic justice the use of coercion therapeutic alliance the significance of choice and the taking of responsibility

Mental Patient differs from straightforward memoirs of psychiatric illness in that it analyses philosophic issues related to psychosis and recovery and it differs from other books on psychiatric ethics in that its analyses are drawn from the author's first person experiences as a mental patient
