Contemporary Themes in Humanities Higher Education E.A. Chambers,2013-03-14 This book is about the teaching and study of the humanities in our universities It addresses humanities educators whose job it is to teach undergraduate students researchers into the processes of teaching and learning involved and higher education policy makers The book aims to stimulate discussion among them of the proper purposes processes and outcomes of this form of education And in the process it aims to help define and develop the new field of Arts and Humanities Higher Education AHHE In the humanities as in other academic domains of higher education a public discourse of teaching and of students learning is presently underdeveloped This may seem surprising given the long history of the university as an institution and the huge resources devoted to higher education in many countries but there are of course reasons for it First until very recently there has been no profession of teacher education focused on the academy Simply academics have needed neither training nor qualification as teachers of their subject so that no one has been required to make teacher education their business or teaching learning in 2 higher education their special field of interest As regards schooling the The label Arts and Humanities Higher Education reflects the fact that the humanities subjects Classics Cultural Studies History Art History European Studies Languages Literature Philosophy Religious Studies etc are usually taught in the Faculty of Arts in UK universities The book does not include discussion of the fine or performing arts except incidentally **A.M.F.
