Stephen Roach on the Next Asia Stephen S. Roach, 2010-10-05 As Morgan Stanley's chief Asia specialist getting Asia right is Stephen Roach's personal obsession and this in depth compilation represents more than 70 of Roach's key research efforts not just on Asia but also on how the region fits into the broad context of increasingly globalized financial markets The book argues that the Asia factor is not a static concept but rather one that is constantly changing and evolving Broken down into five parts Asia's critical role in globalization the coming rebalancing of the Chinese economy a new pan regional framework for integration and competition and a frank discussion of the biggest risk to this remarkable transformation this book will help readers understand and profit from the world's most dynamic region **Equality** Darrin

McMahon, 2024-04-11 This fascinating and refreshing book is more necessary than ever A must read Thomas Piketty Fascinating New York Times WINNER OF THE 2024 JACQUES BARZUN PRIZE IN CULTURAL HISTORY Equality is in crisis Our world is filled with soaring inequalities spanning wealth race identity and nationality Yet how can we strive for equality if we don't understand it As much as we have struggled for equality we have always been profoundly sceptical about it How much do we want and for whom Darrin M McMahon's Equality is the definitive intellectual history tracing equality's global origins and spread from the dawn of humanity through the Enlightenment to today Equality has been reimagined continually in the great world religions and the politics of the ancient world by revolutionaries and socialists Nazis and fascists and post war reformers and activists A magisterial exploration of why equality matters and why we continue to reimagine it Equality offers all the tools to rethink equality anew for our own age War on Hunger, 1968 **The New Communism** Bob

Appreciating Our Cosmic Bonds Chidi Giniji, 2008-09 *Appreciating Our Cosmic Bonds* introduces the philosophy and definition behind the term Re humanism and how this peaceful and honest way of life could touch the people of this world regardless of religion class or race to enhance a better universe Chidi Giniji instills a wakeup call for mankind by introducing an innovative way to view our universe where people question the meaning of life and earnestly want to know why we are here on earth and why we act the way we do While defining his theory for achieving a harmonious planet Giniji emphasizes that re humanists of diverse backgrounds can co exist peacefully because they recognize the simple truth that we are all children of one human family in one world with one origin and one destiny influenced by one ultimate power In a universe where negativity often abounds a Re humanist regards fellow human beings and all creation with due respect and empathy while holding his or her own being in high esteem and dignity a truly uplifting way to live a life and shape a destiny *Appreciating Our Cosmic Bonds* encourages those who wish to change the world through their own actions making each new day a day of personal reassessment *Nature's Web* Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world *Nature's Web* lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them

Human Rights Makau Mutua, 2013-07-03 In 1948 the United Nations adopted the Universal Declaration of Human Rights and with it a profusion of norms processes and institutions to define promote and protect human rights Today virtually every cause seeks to cloak itself in the righteous language of rights But even so this universal reliance on the rights idiom has not succeeded in creating common ground and deep agreement as to the scope content and philosophical bases for human rights Makau Mutua argues that the human rights enterprise inappropriately presents itself as a guarantor of eternal truths without which human civilization is impossible Mutua contends that in fact the human rights corpus though well meaning is a Eurocentric construct for the reconstitution of non Western societies and peoples with a set of culturally biased norms and practices Mutua maintains that if the human rights movement is to succeed it must move away from Eurocentrism as a civilizing crusade and attack on non European peoples Only a genuine multicultural approach to human rights can make it truly universal Indigenous non European traditions of Asia Africa the Pacific and the Americas must be deployed to deconstruct and to reconstruct a universal bundle of rights that all human societies can claim as theirs
