Economic Geology of Natural Gas Hydrate Michael D. Max, Arthur H. Johnson, William P. Dillon, 2006-07-09 This book is a companion to *Natural Gas Hydrate in Oceanic and Permafrost Environments* Max 2000 2003 which is the first book on gas hydrate in this series Although other gases can naturally form

clathrate hydrates referred to after as hydrate we are concerned here only with hydrocarbon gases that form hydrates The most important of these natural gases is methane Whereas the first book is a general introduction to the subject of natural gas hydrate this book focuses on the geology and geochemical controls of gas hydrate development and on gas extraction from naturally occurring hydrocarbon hydrates This is the first broad treatment of gas hydrate as a natural resource within an economic geological framework This book is written mainly to stand alone for brevity and to minimize duplication Information in Max 2000 2003 should also be consulted for completeness Hydrate is a type of clathrate Sloan 1998 that is formed from a cage structure of water molecules in which gas molecules occupying void sites within the cages stabilize the structure through van der Waals or hydrogen bonding *Language and Identity* J. Joseph, 2004-05-28 Offering a uniquely broad based overview of the role of language choice in the construction of national ethnic and religious identity this textbook examines a wide range of specific cases from various parts of the world in order to arrive at some general principles concerning the links between language and identity It will benefit students and researchers in a wide range of fields where identity is an important issue and who currently lack a single source to turn to for an overview of sociolinguistics
