New Face Of Terrorism Threats From Weapons Of Mass Destruction:

The Metaphysics of Terror Rasmus Ugilt, 2014-03-13 This groundbreaking study aims to provide a philosophical analysis of the phenomenon of terror in particular the political reactions to it such as public anxiety and pre-emptive wars and to re-articulate the understanding of metaphysics through a consideration of its political implications The book reveals that the key feature of terror is potentiality that is terror is always about what could happen as opposed to what is likely to happen This notion helps broaden the scope of the investigation as the argument spans the ontology political psychology political cosmology and political theology of terror Each chapter begins with an empirical discussion examining such topics as the political practices in reaction to terror the politics of fear warfare sovereignty and the debates about the state of exception in relations to anti-terrorism laws This unique examination of our political reality uncovers the axiom of terrorism namely its potentiality Going beyond the scope of terrorism studies it explains the philosophical underpinnings of terror without compromising on the empirical facts drawn from policymaking jurisprudence and related fields

The Rise of Nuclear Fear Spencer R. Weart, 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant triggering a meltdown protesters around the world challenged the use of nuclear power Germany announced it would close its plants by 2022 Although the ills of fossil fuels are better understood than ever the threat of climate change has never aroused the same visceral dread or swift action Spencer Weart dissects this paradox demonstrating that a powerful web of images surrounding nuclear energy holds us captive allowing fear rather than facts to drive our thinking and public policy Building on his classic *Nuclear Fear* Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction Long before nuclear fission was discovered fantasies of the destroyed planet the

transforming ray and the white city of the future took root in the popular imagination At the turn of the twentieth century when limited facts about radioactivity became known they produced a blurred picture upon which scientists and the public projected their hopes and fears These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined they appeared on the evening news Weart examines nuclear anxiety in sources as diverse as Alain Resnais's film *Hiroshima Mon Amour* Cormac McCarthy's novel *The Road* and the television show *The Simpsons* Recognizing how much we remain in thrall to these setpieces of the imagination Weart hopes will help us resist manipulation from both sides of the nuclear debate

Routledge Handbook of Risk Studies Adam Burgess, Alberto Alemanno, Jens Zinn, 2016-03-31 It is over 40 years since we began to reflect upon risk in a more social than technological and economic fashion firstly making sense of the gap between expert and public assessment of risks such as to our health and environment

With fixed certainties of the past eroded and the technological leaps of big data ours is truly an age of risk uncertainty and probability from Google's algorithms to the daily management of personal lifestyle risks Academic reflection and research has kept pace with these dizzying developments but remains an intellectually fragmented field shaped by professional imperatives and disciplinary boundaries from risk analysis to regulation and social research This is the first attempt to draw together and define risk studies through a definitive collection written by the leading scholars in the field It will be an indispensable resource for the many scholars students and professionals engaging with risk but lacking a resource to draw it all together
