Towards Juristocracy Ran Hirschl, 2009-06-30 In countries and supranational entities around the globe constitutional reform has transferred an unprecedented amount of power from representative institutions to judiciaries The constitutionalization of rights and the establishment of judicial review are widely believed to have benevolent and progressive origins and significant redistributive power diffusing consequences Ran Hirschl challenges this conventional wisdom Drawing upon a comprehensive comparative inquiry into the political origins and legal consequences of the recent constitutional revolutions in Canada Israel New Zealand and South Africa Hirschl shows that the trend toward constitutionalization is hardly driven by politicians genuine commitment to democracy social justice or universal rights

Rather it is best understood as the product of a strategic interplay among hegemonic yet threatened political elites influential economic stakeholders and judicial leaders This self interested coalition of legal innovators determines the timing extent and nature of constitutional reforms Hirschl demonstrates that whereas judicial empowerment through constitutionalization has a limited impact on advancing progressive notions of distributive justice it has a transformative effect on political discourse The global trend toward juristocracy Hirschl argues is part of a broader process whereby political and economic elites while they profess support for democracy and sustained development attempt to insulate policymaking from the vicissitudes of democratic politics

The Politics of Electoral Systems Michael Gallagher, Paul Mitchell, 2005-09-15 Electoral systems matter. They are a crucial link in the chain connecting the preferences of citizens to the policy choices made by governments. They are chosen by political actors and once in existence have political consequences for those actors. They are an important object of study for anyone interested in the political process and in this book we subject them to systematic analysis. In addition to some comparative chapters the book contains full accounts of the operation of electoral systems in 22 countries: France, the UK, Germany, Italy, Israel, Spain, Austria, Belgium, Denmark, Finland, The Netherlands, Ireland, Hungary, Russia, Australia, Canada, India, the USA, Japan, New Zealand, Chile and South Africa. The book provides detailed analyses of the operation of a diverse set of electoral systems in their national context. Each chapter explains how the electoral system really works in the given country, examining the strategic incentives the system provides to voters, candidates and parties. All country chapters have a common format and structure. Successive sections analyse the institutional context, how each electoral system was chosen historically, how the current electoral system operates, the rules, mechanics and ballot structure, and the political consequences of the current system, the impact on the party system, the internal life of parties and the impact on parliament and government formation. Each country chapter then contains a final section which focuses on the politicization of electoral institutions. In recent years many countries have changed their electoral systems either entirely or in part, so there is a strong focus on the processes of electoral reform, both historically and prospectively. The book concentrates on the real world politics as well as the political science of electoral systems. The book will be of interest to those concerned with the practical political business of electoral reform. The book contains a wealth of evidence about the performance of various kinds of proportional representation and of non-PR systems. This will be invaluable for anyone interested in the question: What would be the best electoral system for my country?

New Zealand And The World: Past, Present And Future Robert G Patman, Iati Iati, Balazs Kiglics, 2017-12-28 The aim of this book is to provide the reader with an overview of New Zealand's international relations. It is a country that has often shown an international presence that is out of proportion to the modest spectrum of national economic, military and diplomatic capabilities at its disposal. In this volume the editors have called upon a range of specialists representing a range of views drawn from the worlds of academia, policy making and civil society. It is an attempt to present a rounded picture of New Zealand's place in the world, one that does not rely exclusively on any particular perspective. The book does not claim to be exhaustive. But it does seek to present a more wide-ranging treatment of New Zealand's foreign relations than has generally been the case in the past. Five broad themes help shape and organize the contributions to the text.

The Political Class in Advanced Democracies Jens Borchert, Jürgen Zeiss, 2003-12-11 Professional politicians have increasingly come under public attack in most democratic countries Yet they have received surprisingly little systematic attention in political science This book demonstrates that there are both striking similarities between professional politicians in different countries and notable national peculiarities The introduction develops a common conceptual framework for the chapters to follow Using Mosca's term and Weber's seminal insights it reconstructs the concept of political class to grasp the degree of common interests shared by politicians of different parties and in different institutions Thereby it presents an innovative perspective on politicians The twenty country chapters written by scholars from sixteen countries both provide up to date information on professional politics in their countries and discuss the merits of the theoretical approach In doing so they follow a common format thus facilitating a comparative reading of particular aspects Each chapter looks at the historical process of professionalization the institutional context of professional politics the size of the political class in each country typical career paths the remuneration of politicians and recent reform debates **Global Political Marketing** Jennifer Lees-Marshment, Chris Rudd, Jesper Stromback, 2009-10-16 There is increasing awareness of growing similarities in political

Political Parties in the Digital Age Guy Lachapelle, Philippe Maarek, 2015-07-01 The Internet and social media may initially have been understood as just one more instrument politicians could employ to manage without political parties However these media cannot be reduced to being a tool available solely to politicians The electronic media make reinforcement of the glocalization of the public and political sphere a process already set in motion with the advent of television and they can develop the trend even further Political parties are therefore once again becoming indispensable they are in an unparalleled position to recreate social and political bonds for only they stand both at the center and on the periphery of the new sphere encompassing public and political life

Remembering the Great War in the Middle East Hans-Lukas Kieser, Thomas Schmutz, Pearl Nunn, 2021-10-07 This book addresses the conflicts, myths and memories that grew out of the Great War in Ottoman Turkey and their legacies in society and politics. It is the third volume in a series dedicated to the combined analysis of the Ottoman Great War and the Armenian Genocide. In Australia and New Zealand and even more in the post-Ottoman Middle East, the memory of the First World War still has an immediacy that it has long lost in Europe. For the post-Ottoman regions, the first of the two World Wars, which ended Ottoman rule, was the formative experience. This volume analyses this complex configuration: why these entanglements became possible, how shared or even contradictory memories have been constructed over the past hundred years, and how differing historiographies have developed. **Remembering the Great War in the Middle East** reaches towards a new conceptualization of the long last Ottoman decade 1912-22, one that places this era and its actors more firmly at the center instead of on the periphery of a history of a Greater Europe, a history comprising as contemporary maps did Europe, Russia and the Ottoman world.

Changing Times Jenny Carlyon, Diana Morrow, 2014-02-01 From the golden weather of postwar economic growth through the globalization, economic challenges and protest of the 1960s and 1970s to the free market revolution and new immigrants of the 1980s and 1990s and beyond, this account is the most complete and comprehensive history of New Zealand since 1945. It illustrates the chronological and social history of the country with the engaging stories of real individuals and their experiences. Leading historians Jennifer Carlyon and Diana Morrow discuss in great depth New Zealand's move toward nuclear-free status, its embrace of a small state free market ideology and the seeming rejection of its citizens of a society known for the worship of averages. Stories of pirate radio in Auckland's Hauraki Gulf, the first DC8 jets landing at Mangere airport, feminists liberating pubs, public protests over the closing of post offices and indigenous language nests vividly demonstrate how a postwar society famous around the world for its dull conformity became one of the most ethnically, economically and socially diverse countries on earth.
