New Directions For American Policy In East Asia:

New Directions for American Policy in Asia Bernard K. Gordon, 1990 The importance of East Asia in international politics is continually growing as United States trade across the Pacific now exceeds their trade across the Atlantic **New Directions for American Policy in Asia** examines current United States foreign policy in East Asia surveys current problems and our relations with each of the major powers in the region and makes recommendations for improvement Gordon argues that although the region is at present a good environment forces which adversely affect the U S are already at work **New Directions in Japan's Security** Paul Midford, Wilhelm Vosse, 2020-09-06 While the US Japan alliance has strengthened since the end of the Cold War Japan has almost unnoticed been building security ties with other partners in the process reducing the centrality of the US in Japan's security This book explains why this is happening Japan pursued security isolationism during the Cold War but the US was the exception Japan hosted US bases and held joint military exercises even while shunning contacts with other militaries Japan also made an exception to its weapons export ban to allow exports to the US Yet since the end of the Cold War Japan's security has undergone a quiet transformation moving away from a singular focus on the US as its sole security partner Tokyo has begun diversifying its security ties This book traces and explains this diversification The country has initiated security dialogues with Asian neighbors assumed a leadership role in promoting regional multilateral security cooperation and begun building bilateral security ties with a range of partners from Australia and India to the European Union Japan has even lifted its ban on weapons exports and co development with non US partners This edited volume explores this trend of decreasing US centrality alongside the continued and perhaps even growing security inter dependence with the US **New Directions in Japan's Security** is an essential resource for scholars focused on Japan's national security It will also interest on a wider basis those wishing to understand why Japan is developing non American directions in its security strategy **New Directions for University Museums** Brad King, 2023-12-06 **New Directions for University Museums** is intended to help university museum leaders to help them plan strategically in the context of the issues and needs of the 2020s by examining trends affecting them and directions in response to those forces It will lay out a series of potential directions for university museums in the 21st century using examples from the field Although university museums are similar to other museums in their topic areas art natural history archaeology etc they are a unique category that requires special consideration Today university museums are grappling with new forces that are affecting their future University museums still have a dual responsibility to campus and community and they still try to mount exhibitions that are attractive to the communities in which they are embedded But they are rethinking the nature of service to town and gown in response to larger trends around accessibility It is no longer enough to try to attract visitors these museums are becoming much more active and outgoing in their outreach to the broader public They have unparalleled access to academic firepower but university museum research is no longer the sole province of academics intended for publication in scholarly

journals In the 2020s research is being made much more relevant to existential problems of the world For example some are bridging the gap between academic research and teaching and the most pressing social issues of our time such as climate change the fight against racism and the interface between humans and technology University museum research is no longer cloistered and these institutions are finding ways to better leverage the new knowledge yielded by collections based research for both the university s and for public benefit Student engagement and education is still important but communication is no longer unidirectional from faculty and museum staff to students Now student input and co curation is now invited as learning becomes a two way street Moreover public science communication has become a much more important role for university museums These are in effect the new directions to which the title refers The main thesis of the book is therefore that university museums are becoming much more outward facing They are engaging with the public and with the world at large as never before In effect they matter more than ever This is the overarching new direction Within this general approach there are a number of questions that the book addresses What are the expectations of university museums in the 21st century from their key stakeholders university administrations faculties and students and the communities in which they are embedded How are those expectations changing and how are the museums evolving to meet them How are university museums navigating the minefields of political polarization cancel culture or heightened activism on campus and in society at large What is the nature of the relationship between the university s research and teaching mission and the university museum What trends can we identify and how can we help the university museum director navigate those trends The university donor relationship what can we learn from a study of donor expectations and the dynamics of university donor relationships in contemporary society How is the relationship between the university museum and the broader external community changing How is the university museum contributing to or detracting from the overall relationship between the university and the community What role is the university museum playing in terms of public communication of research especially public science communication This book is for all those who work in benefit from or are interested in university museums In particular it is hoped that the book will help university museum leaders who are embarking on strategic plans understand the common issues that are currently affecting their peers and provide some context and guidance to those leaders as they chart their own paths for the future and to advance larger goals For faculty it will show how the museum can help improve undergraduate teaching and graduate student training via highlights and illustrations of new ways in which faculty departments are cooperating and partnering with their campus museums and from a university administration point of view how the museum can help the university achieve its bigger strategic goals such as helping increase the percentage of successful faculty grant applications

Democratic Equilibrium Michael W. Fowler, 2015-11-12 *Democratic Equilibrium* The Supply and Demand of Democracy defines a model for political change that results in either an increase or decrease in democracy The book presents a model that builds upon the existing literature to bridge several major gaps in political change theory This book provides a holistic supply and demand model that draws upon works from political science economics and history The work conducts an econometric test of the model and validates the results with field research cases from Mexico the Philippines and Senegal The econometric chapter is a rare quantitative analysis of the effects of violence and development upon democracy This topic is central to contemporary academic and policy debates about how to create democracies consolidate democracies achieve development and improve security especially within developing countries This topic is especially timely as the Arab Spring represents a unique opportunity and challenge for democratic change across the Middle East and North Africa Recent events in Tunisia and Egypt demonstrate that democracy studies remain just as relevant today as they were twenty years ago The findings indicate that common structural explanations of democracy are incomplete since the structural relationships are not stable or constant over time Instead democratic change or lack thereof can be explained using a supply and demand model Key actors including the military political parties NGOs the ruling regime and civil society are the suppliers and consumers that determine a country's resulting level of democracy However stating that actors are important is a major oversimplification Each key actor builds preferences based upon a variety of factors most importantly security income and the adoption of democratic norms It is this key dynamic that explains why insurgency poverty and under development do not have a linearly negative effect on democracy Instead these factors have a centripetal effect on political development pulling a country's government towards an intermediate state of political transition in which regimes stagnate in a partially democratic partially autocratic regime type Conversely the model also explains why high income democratic norms and security do not necessarily lead to democratization in all cases
