

The background of the cover is a dark, textured purple. In the upper right corner, there is a stylized sun or star with a black center and radiating lines. A large, abstract, light-colored figure, possibly a person, is depicted in the center, with their arms and legs spread out. The figure is overlaid with a complex network of thin, dark, intersecting lines that form a web-like pattern across the entire cover.

New Genetics Challenges For Science Faith And Politics:

The New Genetics Roger Lincoln Shinn,1996 In the extensive controversial literature about the genome project and genetic engineering The New Genetics occupies a distinctive niche It uses the startling new discoveries in genetics as a case study for the many ethical decisions generated by the explosion of new scientific knowledge and power Shinn investigates the interactions of science ethics faith politics and ideology in the making of decisions by individuals communities and governments The New Genetics addresses the difficult problems facing all of us from policy makers to ordinary families

Unprecedented Choices Audrey R. Chapman,1999-01-01 We face unprecedented choices in genetics for which traditional ethics provides little direct guidance What role can the religious community play in addressing the ethical and theological issues that even scientists now acknowledge as urgent cover Jewish Faith and Modern Science Norbert M. Samuelson,2008-10-17 In Jewish Faith and Modern Science renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died that it has failed to address the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today Samuelson confronts these challenges head on critically reflecting on how all of the forms of contemporary Judaism from orthodox to liberal to secular to new age can address questions raised by the latest scientific advances Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world *The Christian Religion and Biotechnology* George P. Smith,2005-03-21 Religion is a dominant force in the lives of many Americans It animates challenges directs and shapes as well the legal political and scientific agendas of the new Age of Biotechnology In a very real way religion biomedical technology and law are epistemologically different Yet they are equal vectors of force in defining reality and approaching an understanding of it Indeed all three share a synergetic relationship for they seek to understand and improve the human condition This book strikes a rich balance between thorough analysis in the body anchored in sound references to religion law and medical scientific analysis and a strong scholarly direction in the end notes It presents new insights into the decision making processes of the new Age of Biotechnology and shows how religion law and medical science interact in shaping directing and informing the political processes This volume will be of interest to both scholars and practitioners in the fields of religion and theology philosophy ethics family law science medicine political science and public policy and gender studies It will serve as a reference source and can be used in graduate and undergraduate courses in law medicine and religion

Law and Bioethics George Patrick Smith (II),2012 George P Smith II is a leading figure in the world of medical law and ethics During his long career he has addressed some of the most important issues in bioethics and has contributed much original thought to the debates in this field This book celebrates his contribution bringing together his key writings in bioethics The chapters include previously published material however the pieces have been substantially updated to include

more recent developments and rewritten drawing out the themes and strands which have run through Professor Smith's thinking over the past fifty years. The book covers topics including human rights and medical law, the allocation of resources and distributive justice, ethical relativism, science and religion, and public health emergencies. In doing so, it offers an excellent overview of the current bioethical issues in medical law in light of recent and ongoing technological developments in medicine. This collection of essays by one of the world's leading medical lawyers is academic research of the highest quality. With an enviable clarity of thought and force of argument, Professor Smith tackles some of the major issues facing medicine and law today. It is a tour de force by an academic at the height of his powers. Professor Jonathan Herring, University of Oxford.

Claiming Power Over Life Mark J. Hanson, 2001-10-03. Developments in biotechnology such as cloning and the decoding of the human genome are generating questions and choices that traditionally have fallen within the realm of religion and philosophy: the definition of human life, human vs. divine control of nature, the relationship between human and non-human life, and the intentional manipulation of the mechanisms of life and death. In *Claiming Power over Life*, eight contributors challenge policymakers to recognize the value of religious views on biotechnology and discuss how best to integrate the wisdom of the Christian and Jewish traditions into public policy debates. Arguing that civic discourse on the subject has been impoverished by an inability to accommodate religious insights productively, they identify the ways in which religious thought can contribute to policymaking. Likewise, the authors challenge religious leaders and scholars to learn about biotechnology, address the central issues it raises, and participate constructively in the moral debates it engenders. The book will be of value to policymakers, religious leaders, ethicists, and all those interested in issues surrounding the intersection of religion and biotechnology policy.

Eco-Justice--The Unfinished Journey William E. Gibson, 2012-02-01. Eco Justice: The Unfinished Journey links ecological sustainability and social justice from an ethical and often theological perspective. Eco justice, defined as the well-being of all humankind on a thriving earth, began as a movement during the 1970s responding to massive sobering evidence that nature imposes limits to production and consumption with profound implications for distributive justice and limits to the human numbers sustainable by habitat earth. This collection includes contributions from the leading interpreters of the eco justice movement as it recounts the evolution of the Eco Justice Project initiated by campus ministries in Rochester and Ithaca, New York. Most of these essays were originally published in the organization's journal, and they address many themes including environmental justice, hunger, economics, and lifestyle.

Bridging Science and Religion Ted Peters, Gaymon Bennett. This extraordinary volume models a fruitful interaction between the profound discoveries of the natural sciences and the venerable and living wisdoms of the world's major religions. *Bridging Science and Religion* brings together distinguished contributors to the sciences, comparative philosophy, and religious studies to address the most important current questions in the field. Sponsored by the Center for Theology and the Natural Sciences in Berkeley.

it is an ideal starting point for novices yet has much to offer academics professionals and students Part 1 establishes a working methodology for bridge building between scientific and religious approaches to reality Part 2 lays down the challenge to current theological and ethical positions from genetics neuroscience natural law and evolutionary biology Part 3 offers a religious response to modern science from scholars working out of Islamic Jewish Hindu Orthodox Latin American Catholic and Chinese contexts Showcasing attitudes toward science from outside the West and an inclusive and comparative perspective Bridging Science and Religion brings a new and timely dimension to this burgeoning field *Expanding Humanity's Vision Of God* Robert Herrmann, 2009-08-15 How has our understanding of our world and our place in the universe changed in recent decades through the momentous discoveries of science Do recent developments in the philosophy of science which place limitations on scientific knowing provide a more level playing field This collection of essays and sermons which have not been readily available before address these thought provoking questions The John Templeton Foundation sponsored an essay and sermon contest to convey an expanded vision of God one that is informed by recent discoveries of science on the nature of the universe and the place we have in the world These selections are the winners of that competition The book is divided into three sections Contemporary Science Raising Theological Questions New Visions of Theology and Historical and Philosophical Perspectives on the Science Religion Dialogue The essays cover such areas as physics theology cosmology origins and artificial intelligence There is another way to conceive our life together There is another way to conceive of our life in God but it requires a different worldview not a clockwork universe in which individuals function as discrete springs and gears but one that looks more like a luminous web in which the whole is far more than the parts In this universe there is no such thing as an individual apart from his or her relationships Every interaction between people and people between people and things between things and things changes the face of history Life on earth cannot be reduced to four sure fire rules It is an ever unfolding mystery that defies precise prediction Meanwhile in this universe there is no such thing as parts The whole is the fundamental unit of reality Barbara Brown Taylor Physics and Faith
