Al-Deen, 2013-10-18 Recently the communication discipline has devoted increasing energy toward the study of aging yet most of the research has insufficiently addressed a crucial factor in communicative relationships culture Meanwhile cross cultural intercultural communication has not adequately addressed the aging process Combining three powerful elements communication aging and culture all of which have an increasingly profound impact on today's multicultural society this book focuses on older Americans in various communicative contexts within the framework of their cultures Composed of original research by experts in their respective fields the book combines communication aging and culture for a unique examination of those elements in American society Section 1 deals with perspectives in cross cultural communication and aging These perspectives both illustrate the issues that greatly affect the lives of our elders and suggest ways to improve their status Section 2 showcases three American co cultures Hawaiian Arab and Mormon illustrate how language attitudes and mentoring can serve as the links for maintaining cross generational continuity in multicultural society Section 3 demonstrates that many American organizations frequently contribute to the hardships that both internal elder customers employees and external elder customers residents and patients must endure Section 4 incorporates popular culture and aging It presents the role of selective popular media in portraying our elders Because Americans rely heavily on the media their mediated perceptions can have a profound impact on their attitudes toward the older population Designed as a reader or supplementary text for college students in communication gerontology anthropology sociology and other related fields this

Kidd,2000 How can the Internet and world wide web improve my long term competitive advantage This book helps answer this question by providing a better understanding of the technologies their potential applications and the ways they can be used to add value for customers support new strategies and improve existing operations It is not just about e commerce but the broader theme of e business which affects products business processes strategies and relationships with customers suppliers distributors and competitors To cover future trends the editors have collected papers from authors operating at the frontiers of the developments so the reader can more appreciate the directions in which these technologies are heading The resulting 165 essays have been collated into ten sections which have been grouped in three parts key issues applications areas and applications tools and technologies A business rarely makes radical changes but is constantly making adjustments to circumstances Businesses must now adapt to the global implications of the Internet and world wide web This book hopes to aid awareness of the implications so that the changes are managed wisely Consuming People Nikhilesh Dholakia,A. Fuat Firat,2003-12-16 Consumption is widely regarded as one of the most important phenomena in contemporary society but till now there has been very little analysis of how consumption patterns evolve transform and proliferate This revealing book provides an incisive treatment of consumption on a global scale from a cultural philosophical and business perspective Beginning with an analysis of how a dominant form of consumption pattern took hold in modern capitalist market economies this book explores the contemporary changes and paradoxes in our consumption patterns during the transitional period from the modern to the postmodern The text focuses on the forces shaping American consumption patterns from corporations to Hollywood and concludes with an analysis of the emerging trans modern possibilities of the new theatre of consumption where communities with a variety of consumption styles will flourish This is an original and radical analysis in which its first rate authors structure this key topic in a multi disciplinary and forward thinking way As such it will be of great interest to students and researchers of consumer behaviour in business and the social sciences as well as those concerned with contemporary cultural transformations Advertising and the World Wide Web David W. Schumann,Esther Thorson,1999-04-01 The chapters provide a wide ranging view of issues addressing how advertisers can proceed on the Internet and World Wide Web An initial chapter traces the development of Web advertising from its very beginnings as it was represented and discussed in the pages of Advertising Age Although there is a noticeable trend to define Web advertising by comparing it to traditional media it is clear that Web advertising just won t fit the old mold Keith Reinhard of DDB Needham actually articulates this linkage between the old and new in his invited chapter What the reader will encounter in Advertising and the World Wide Web is a solid conception of how Web advertising is different from anything that has come before There are numerous discussions on consumer and advertiser interactivity the role of Web advertising within larger campaigns

audience segmentation and alternative Web based promotion formats The five sections cover definition and theory structure specific applications legal issues and the voice of the practitioner Although there remain a few nay sayers concerning the future of Web advertising the reader will be able to see just how incredibly high impact this new medium has become and the vast potential that it holds for future promotional endeavors

Suspense Peter Vorderer, Hans Jurgen Wulff, Mike Friedrichsen, 2013-12-16 This volume begins with the general assumption that suspense is a major criterion for both an audience's selection and evaluation of entertaining media offerings This assumption is supported not only by the popularity of suspenseful narratives but also by the reasons users give for their actual choice of media contents Despite this there is no satisfying theory to describe and explain what suspense actually is how exactly it is caused by films or books and what kind of effect it has on audiences This book's main objective is to provide that theory by bringing together scholars from different disciplines who are working on the issue The editors goal is to reflect the state of the art as much as it is to highlight and encourage further developments in this area There are two ways of approaching the problem of describing and explaining suspense an analysis of suspenseful texts or the reception process Researchers who follow the more text oriented approach identify the uncertainty of the narrative outcome the threat or danger for the protagonist the play with time delay or other factors as important and necessary for the production of suspense The more reception oriented scholar focuses on the cognitive activities of audiences readers expectations the curiosity of onlookers their emotions and their relationships with the protagonists A correspondence between the two seems to be quite difficult though necessary to determine Both perspectives are important in order to describe and explain suspense Thus the editors utilize the thesis that suspense is an activity of the audience reader onlooker etc that is related to specific features and characteristics of the text books films etc Their question is What kind of relation The answer comes from finding out how why and which elements of the text cause effects that are experienced as suspense Scholars from semiotics literary criticism cultural studies and film theory assess the problem from a text oriented point of view dealing primarily with the how and which Other scholars present the psychological perspective by focusing on the cognitive and emotional processes that underlie viewers experience of suspense that is the reception theory tries to answer the question of why suspenseful texts may be experienced as they are
