Canada's Residential Schools: The Inuit and Northern Experience Commission de vérité et réconciliation du Canada,2016-01-01 Between 1867 and 2000 the Canadian government sent over 150 000 Aboriginal children to residential schools across the country Government officials and missionaries agreed that in order to civilize and Christianize Aboriginal children it was necessary to separate them from their parents and their home communities For children life in these schools was lonely and alien Discipline was harsh and daily life was highly regimented Aboriginal languages and cultures were denigrated and suppressed Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self sustaining Child neglect was institutionalized and the lack of supervision created situations where students were prey to sexual and physical abusers Legal action by the schools former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008 The product of over six

years of research the Commission's final report outlines the history and legacy of the schools and charts a pathway towards reconciliation Canada's Residential Schools The Inuit and Northern Experience demonstrates that residential schooling followed a unique trajectory in the North As late as 1950 there were only six residential schools and one hostel north of the sixtieth parallel Prior to the 1950s the federal government left northern residential schools in the hands of the missionary societies that operated largely in the Mackenzie Valley and the Yukon It was only in the 1950s that Inuit children began attending residential schools in large numbers The tremendous distances that Inuit children had to travel to school meant that in some cases they were separated from their parents for years The establishment of day schools and what were termed small hostels in over a dozen communities in the eastern Arctic led many Inuit parents to settle in those communities on a year round basis so as not to be separated from their children contributing to a dramatic transformation of the Inuit economy and way of life Not all the northern institutions are remembered similarly The staff at Grandin College in Fort Smith and the Churchill Vocational Centre in northern Manitoba were often cited for the positive roles that they played in developing and encouraging a new generation of Aboriginal leadership The legacy of other schools particularly Grollier Hall in Inuvik and Turquetil Hall in Igluligaarjuk Chesterfield Inlet is far darker These schools were marked by prolonged regimes of sexual abuse and harsh discipline that scarred more than one generation of children for life Since Aboriginal people make up a large proportion of the population in Canada's northern territories the impact of the schools has been felt intensely through the region And because the history of these schools is so recent the intergenerational impacts and the legacy of the schools are strongly felt in the North

the Arctic and Antarctic is expanding rapidly The industry has moved beyond its infancy and is now entering a maturing phase with increased numbers and types of vessels more demanding routes and more regular and predictable patterns of activity The increase in cruise activities and the associated risks of accidents as well as the potential and actual impacts of the large numbers of tourists in the polar regions bring with it management challenges for sustainable use of these regions This book discusses critically the issues around environmental and social sustainability of the cruise industry in Polar Regions Authors from Canada USA Europe Australia and New Zealand are experts in their respective fields and take an innovative critical and at times controversial approach to the subject *Government Restructuring and Career Public Service in Canada* Evert A.
