Egocentricity and Mysticism Ernst Tugendhat,2016-10-04 In Egocentricity and Mysticism Ernst Tugendhat casts mysticism as an innate facet of what it means to be human a response to an existential need for peace of mind This need is created by our discursive practices which serve to differentiate us from one another and privilege our respective first person standpoints Emphasizing the first person fuels a desire for mysticism which builds knowledge of what binds us together and connects us to the world Any intellectual pursuit that prompts us to step back from our egocentric concerns harbors a mystic kernel that manifests as a sense of awe wonder and gratitude Philosophy the natural sciences and mathematics all engender forms of mystical experience as profound as any produced by meditation and asceticism One of the most widely discussed books by a German philosopher in decades Egocentricity and Mysticism is a philosophical milestone that clarifies in groundbreaking ways our relationship to language social interaction and mortality

Equilibrium of Eternity's Playground Andrew Lennard,2021-02-15 The transcendental truth had always been hidden from the spiritual being Even among the enigma of supernatural existence the celestial contradictions of the consecrated cosmos were concealed from the Archangel and Seraphim But the days of a duplicitous divine design were numbered Infinity's lies are about to come to an end The mutiny of three malevolent malcontents are ready to destroy the Deity's deceit as Parrish May and Ecole's insurrection ignites the flames of divine dissidence in heaven and earth releasing an angelic apocalypse But can the three subversive seraphs rebellion alter the numinous nebula of creation with their seditious symmetry Or will the inviolable equilibrium of eternity's playground come to a bitter end

Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe

Nature, Technology, and Society Victor Ferkiss, 1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In Nature Technology and Society Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues
