Polish Aircraft, 1893-1939 Jerzy B. Cynk, 1971-01-01 *The Polish Underground Army, the Western Allies, and the Failure of Strategic Unity in World War II* Michael Alfred Peszke, 2015-07-11 This military history covers the attempts of General Wladyslaw Sikorski and his successor General Kazimierz Sosnkowski to integrate Polish forces into Western strategy and to have their clandestine forces declared an allied combatant. It addresses such topics as Poland's part in the Norwegian and French campaigns, the Battle of Britain, Polish intelligence services, Polish radio communications, the Polish Parachute Brigade, the German invasion of the Soviet Union, the Bomber Offensive, the Katyn graves, Polish air crews in the RAF Transport Command, the Tehran Conference, Polish Wings in the 2nd Tactical Air Force, the Bardsea Plan, the invasion of Normandy, the Pierwsza Pancerna, the Warsaw Uprising, Operation Freeston, the disbanding of the Polish Home Army, and the Yalta Conference.

Air Warfare and Air Base Air Defense, 1914-1973 John F. Kreis, 1988 *Foundations of Russian Military Flight, 1885-1925* James K. Libbey, 2019-05-15 *Foundations of Russian Military Flight* focuses on the early use of balloons and aircraft by the Russian military. The best early Russian aircraft included flying boats designed by Dimitrii Grigorovich and large reconnaissance bombers created by Igor Sikorsky. As World War I began, the Imperial Russian Navy made use of aircraft more quickly than the army. Indeed, the navy established a precursor to the aircraft carrier. The Imperial Russian Army came to respect over time the work of aircraft that evolved from reconnaissance and bomber to fighter planes. Over 250 army pilots during the war received awards of high distinction for their wartime flights. After the 1917 revolution, both the new Bolshevik government and the reactionary White forces created air arms to combat each other. In the 1920s, the Soviet Union and Germany negotiated agreements that allowed Germany to violate the Treaty of Versailles by building military aircraft and training German military pilots in the USSR. This provided the Soviet Union access to the latest aviation technology and prevented them from falling too far behind the West in this crucial sphere.

Encyclopedia of World War II Alan Axelrod, 2007 A reference to the ideological, military, political, biographical, and social topics surrounding World War II, which is often considered the pivotal event of the twentieth century.

The Evolution of European Manufacturing Industries Bolesław Domański, Grzegorz Micek, Robert Guzik, Krzysztof Gwosdz, Arkadiusz Kocaj, 2024-08-29 The book provides a picture of the increasing significance of Central Europe and especially Poland in global production networks, discussing the underlying economic, social, and political factors. The key question it answers is to what extent the growth of production and exports results in industrial upgrading towards the manufacturing of more sophisticated, high value added products, new technologies, and the development of non-production functions, especially design and advanced service capabilities. The book shows that Central European manufacturing no longer exhibits the typical features of production activities in the periphery: in particular, low density and diversity, low productivity, narrow specialisation in low value added activities, and poor local linkages, hence limited local value creation and value capture. There is still dependence on foreign

controlled enterprises in several sectors and limited product innovation which remains a major weakness Further the book assesses the social consequences of the ongoing development of manufacturing capabilities in Poland and its impact on employment conditions including the quality of jobs and level of wages The authors provide insight into relationships between globalisation processes place specific attributes and current economic policies and as such the book will be of interest to academics policy makers and other stakeholders interested in both peripheral economies and core countries and representing various international organisations dealing with economic transition and development **Sailplanes 1920 -**

1945 Martin Simons ,2013-12-20 *Why Air Forces Fail* Robin Higham,Stephen J. Harris,2006-02-17 Includes two new chapters One of the more interesting and better books on military aviation to appear in the last few years Journal of Military History Since the publication of the first edition of *Why Air Forces Fail* the debate over airpower s role in military operations has only intensified Here eminent historians Robin Higham and Stephen J Harris assemble a team of experts to add essential new details to their cautionary tale for current practitioners of aerial warfare Together the contributors examine the complex often deep seated reasons for the catastrophic failures of the Russian Polish French British Italian German Argentine and American air services Complemented by reading lists and suggestions for further research this seminal study with two new chapters provides an essential and detailed analysis of defeat Contains many interesting insights and interpretations an excellent introduction to the study of military failure in general and air forces in particular Journal of America s Military Past I recommend this book to those who are interested in air forces and air power whether amateur or professional past present and future Richard Cobbold Bryanston The Yearbook Provides an excellent analysis of the root causes of failure this engaging study goes far beyond the aerial battlefield to examine the circumstances leading to defeat Dennis Drew Colonel USAF Ret
