Smallholder farmers were trained by frontline extensionists and local experts on how to apply Integrated Pest Management (IPM) in outdoor tomatoes, *Solanum lycopersicum*, during farmer field schools in Northern Tanzania between 2005 and 2008. Farmers were also organised into newly-established vegetable producer clubs within which they developed a technical guideline defining the minimum requirements for integrated tomato production. Unaligned, clustered sample surveys conducted among farmers trained in IPM and conventional farmers between 2009 and 2010 revealed that IPM farmers adopted and/or more frequently used non-hazardous preventive measures for pest (arthropod, disease and weed) control than non-IPM farmers. However, pest incidence was so severe during these years that nearly every IPM and non-IPM farmer had to use synthetic pesticides as a direct control measure. Overall, IPM farmers sprayed synthetic pesticides in smaller quantities and less frequently than non-IPM farmers, but they applied natural source pesticides more frequently and in larger amounts. IPM farmers used 85% less often the more hazardous pesticides (WHO toxicity Class I and II) than non-IPM farmers, as well as 42% more often the less hazardous pesticides [Class III and U (=IV)], and 84% more often 'green' products (for example, biological, safe botanicals). In conclusion, the training of farmers in IPM, together with the implementation of a technical guideline and the establishment of producer clubs, is highly recommended for reducing the use of hazardous pesticides and improving the production of vegetables that are safer for producers, consumers and the environment.

Key words: Integrated pest management (IPM), farmer training, technical guideline, project monitoring and evaluation, vegetable producer clubs, *Solanum lycopersicum*, pesticide reduction, Tanzania.

INTRODUCTION

The tomato (*Solanum lycopersicum* L.) is of great importance to smallholder farmers in the Kilimanjaro and Arusha regions of the northern zone of Tanzania in terms of local consumption and income generation (Barry et al.,

2009; Djurfeldt et al., 2010). Smallholder farmers usually grow tomatoes outdoors all year round in Northern Tanzania if there is sufficient rainfall or the availability of irrigation. Main production periods are from March to May

Rational Pesticide Use K. J. Brent, R. K. Atkin, 1987-09-17 There is growing concern among scientists farmers and the general public that pesticides are being applied ever more widely but with less and less discretion This book brings together a range of experts to discuss how crop protection chemicals can be used more rationally so as to maximise benefits in yield and quality while minimising environmental and economic costs The book is based on the ninth Long Ashton Symposium and is organised into four sections The first environment examines to what extent current pesticide use is affecting the environment and human welfare and what changes in practice are justified The second application assesses progress in performance and safety in the use of pesticides while the next section resistance looks at problems and shortcomings arising from the appearance of resistant strains of pests and considers strategies for surmounting these difficulties The final section forecast and pest management asks whether existing methods of assessing risks are acceptable and seeks ways of rendering decision making in crop protection more rational

Rational Pesticide Use K. J. Brent, 1987 *Optimising Pesticide Use* Michael Wilson, 2004-01-09 Optimising Pesticide Use brings together the wide range of scientific disciplines necessary to ensure best practice through monitoring what is used and improving how it is formulated and applied The book provides An in depth exploration of pesticide optimisation from the view point of industry and research scientist A case study on the development of a new range of active chemistries from bacteria A discussion of complementary pest control methods This text will provide essential information to workers in the pesticide industry and regulatory community who need to be aware of current thinking and advancements in the optimal use of pesticidal compounds and systems as well as environmental organisations and aid development organisations

Technological Innovations in Integrated Pest Management Biorational and Ecological Perspective Dharam P. Abrol, 2017-04-01 Human population is growing rapidly disproportionate to food supply which necessitate production of more volume of food in the near future The reliance on insecticides for quick and dramatic results was not totally free from adverse effects This book intends to fill the gap by providing a critical analysis of different management strategies that have a bearing on agriculture sustainability and environmental protection This book emphasizes the management strategies with evaluation of each strategy in the bigger picture of ecologically driven pest management This book includes 24 chapters which cover ecological and biorational basis of pest management integrated pest and disease management crop breeding for resistance use of entomopathogenic nematodes and other agents remote sensing biosecurity issues risk to biodiversity by exotic species new and emerging pests of horticultural crops saffron and stored grains the role of extension technologies in dissemination of IPM and future challenges and strategies The book is aimed to serve as reference book for teachers researchers extension officers and policy makers associated with IPM This book can also be used as supplementary reading material in undergraduate and postgraduate courses This book provides a multidisciplinary IPM perspective to entomologists plant pathologists extension educationists anthropologist and economists **Pesticides in**

World Agriculture Robert Boardman,1986-06-02 **The Pesticide Detox** Jules N. Pretty,2012-07-26 Since the 1960s the world's population has more than doubled and agricultural production per person has increased by a third Yet this growth in production has masked enormous hidden costs arising from widespread pesticide use massive ecological damage and high incidences of farmer poisoning and chronic health effects Whereas once the risks involved with pesticide use were judged to be outweighed by the potential benefits increasingly the external costs of pesticides to environments and human health are being seen as unacceptable In response to this trend recent years have seen millions of farmers in communities around the world reduce their use of harmful pesticides and develop cheaper and safer alternatives The Pesticide Detox explores the potential for the phasing out of hazardous pesticides and the phasing in of cost effective alternatives already available on the market This book makes clear that it is time to start the pesticide detox and to move towards a more sustainable agriculture

Agribusiness and Society Kees Jansen,Sietze Vellema,2008-02-29 This volume examines how far agribusiness corporations are responding to the opportunities and pressures resulting from emerging environmental awareness In particular in what ways are they changing their R some changed their production practices in a sustainable way while others have complied with or resisted state environmental regulation notably labelling systems and certification Each study explores how institutional cultural economic political and technological contexts shape the strategies of big business Topics include green bananas genetically modified tomatoes and soy the new markets in organic produce health and pesticides and access to justice The book explains why some corporations are successful in introducing environmentally friendly innovations and others are not The key to understanding contrasting outcomes is examining the interaction between internal corporate environments where profit and efficiency considerations predominate and external environments where consumer preferences NGO pressures and government regulation are important The book also explores possible new roles for the public sector The result is a sophisticated and critical analysis of business practices and regulatory systems in the agro food sector Catie , **OECD Trade Policy Studies Environmental Requirements and Market Access** OECD,2005-11-28 Investigating over twenty cases this OECD report examines how environmental requirements can become trade barriers for developing countries **Pesticide Resistance** National Research Council,Board on Agriculture,Committee on Strategies for the Management of Pesticide Resistant Pest Populations,1986-02-01 Based on a symposium sponsored by the Board on Agriculture this comprehensive book explores the problem of pesticide resistance suggests new approaches to monitor control or prevent resistance and identifies the changes in public policy necessary to protect crops and human health from the ravages of pests The volume synthesizes the most recent information from a wide range of disciplines including entomology genetics plant pathology biochemistry economics and public policy It also suggests research avenues that would indicate how to counter future problems A glossary provides the reader with additional guidance **Integrated Pest Management in Tropical Regions** Carmelo Rapisarda,Giuseppe E Massimino Cocuzza,2017-12-11 This book provides up to
