## **Rationality In Action Contemporary Approaches:**

**Rationality in Action** Paul K. Moser,1990-10-26 An anthology of previously published pieces that have proven long term importance to theoretical work in rational action      **Cognition and Chance** Raymond S. Nickerson,2004-06-24 This book presents an overview of the necessary information needed to make educational assumptions about the statistical or probable characteristics of a situation The book can be used as a supplemental text in courses on probability logic statistics

**Environmental Regulation Through Financial Organisations:Comparative Perspectives on the Industrialised Nations** Benjamin Richardson,2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance      **Aspects of Rationality** Raymond S. Nickerson,2007-11-19 What

does it mean to be rational to reason well and effectively How does rationality broadly conceived relate to the knowledge one acquires the beliefs one forms the explanations one constructs or appropriates the judgments and decisions one makes the values one adopts What is the character of human reasoning and in particular does it t      *Contemporary Approaches to Public Policy* B. Guy Peters,Philippe Zittoun,2016-05-25 This book considers a range of contemporary approaches to public policy studies These approaches are based on a number of theoretical perspectives on decision making as well as alternative perspectives on policy instruments and implementation The range of approaches covered in the volume includes punctuated equilibrium models the advocacy coalition framework multiple streams approaches institutional analyses constructivist approaches behavioural models and the use of instruments as an approach to public policy The volume concludes with a discussion of fundamental issues of democracy in public policy      **Newcomb's Problem** Arif Ahmed,2018-11 Which of two

boxes to select for a monetary award or to select both Someone else has predicted your choice      **Tools and Techniques for Social Science Simulation** Ramzi Suleiman,Klaus G. Troitzsch,Nigel Gilbert,2012-12-06 The use of computer simulations to study social phenomena has grown rapidly during the last few years Many social scientists from the fields of economics sociology psychology and other disciplines now use computer simulations to study a wide range of social

phenomena The availability of powerful personal computers the development of multidisciplinary approaches and the use of artificial intelligence models have all contributed to this development The benefits of using computer simulations in the social sciences are obvious This holds true for the use of simulations as tools for theory building and for its implementation as a tool for sensitivity analysis and parameter optimization in application oriented models In both simulation provides powerful tools for the study of complex social systems especially for dynamic and multi agent social systems in which mathematical tractability is often impossible The graphical display of simulation output renders it user friendly to many social scientists that lack sufficient familiarity with the language of mathematics The present volume aims to contribute in four directions 1 To examine theoretical and methodological issues related to the application of simulations in the social sciences By this we wish to promote the objective of designing a unified user friendly simulation toolkit which could be applied to diverse social problems While no claim is made that this objective has been met the theoretical issues treated in Part 1 of this volume are a contribution towards this objective

**The Oxford Handbook of Rationality** Alfred R. Mele, Piers Rawling, 2004-01-08

*Tadeusz Kotarbiński's Action Theory* Piotr Tomasz Makowski, 2016-11-30 The book introduces Tadeusz Kotarbiński's philosophy of action into the mainstream of contemporary action theoretical debates Piotr Makowski shows that Kotarbiński Alfred Tarski's teacher and one of the most important philosophers of the renowned Lvov Warsaw school proposed a groundbreaking original and in at least a few respects still fresh perspective in action theorizing The book examines and develops Kotarbiński's ideas in the context of the most recent discussions in the philosophy of action The main idea behind Kotarbiński's action theory and thus behind this book is the significance of the philosophical investigations of the general conditions of effectiveness efficiency and economy of intentional actions Makowski presents and reinterprets Kotarbiński's views on these dimensions of our activities and sheds new light on the most important areas of action theory

**The Problem of Bureaucratic Rationality** Junko

Kato, 1994-10-31 Through a detailed account of the political battles over Japanese tax reform during the last two decades

Junko Kato draws an unconventional portrait of bureaucratic motivation showing how fiscal bureaucrats exploit their unique

technical knowledge to influence policymaking Rejecting the notion that the monopolization of policy expertise leads to bureaucratic domination Kato contends that bureaucrats seek to increase their influence upon politicians by strategically sharing information She also explores the reason for the relative strength of the bureaucratic organization in comparison to the governing party whose interest in reelections and intra party politics may pose dilemmas for individual politicians In 1989 the Japanese Diet enacted a broad based consumption tax after two failed attempts and in the face of widespread public disapproval Its passage was all the more remarkable for coming just as a series of dramatic financial scandals had begun to undermine popular support for the ruling Liberal Democratic Party fore shadowing its fall from power four years later Kato argues that skillful maneuvering by the Ministry of Finance determined to ensure stable long term revenues was decisive in persuading a majority of legislators to oppose their constituents in endorsing an unpopular program of tax reform Her careful analysis of the Japanese case holds important implications for the study of bureaucratic power and public policy in advanced industrial democracies elsewhere in East Asia and the West

**Rational Powers in Action** Sergio Tenenbaum,2020 Rational Powers in Action presents a conception of instrumental rationality as governing actions that are extended in time with indeterminate ends Tenenbaum argues that previous philosophical theories in this area in focusing on momentary snapshots of the mind of idealized agents miss central aspects of human rationality

**The Oxford Handbook of Political Psychology** Leonie Huddy,David O. Sears,Jack S. Levy,2013-08-01 Political psychology applies what is known about human psychology to the study of politics It examines how people reach political decisions on topics such as voting party identification and political attitudes as well as how leaders

mediate political conflicts and make foreign policy decisions The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions Focusing first on political psychology at the individual level attitudes values decision making ideology personality and then moving to the collective group identity mass mobilization political violence this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy Now with new material providing an up to date account of cutting edge research within both psychology and political science this is an essential reference for scholars and students interested in the intersection of the two fields      **Multi-Agent Systems and Agent-Based Simulation** Jaime S.

Sichman,Rosaria Conte,Nigel Gilbert,2005-07-12 Fifteen papers were presented at the first workshop on Multi Agent Systems and Agent Based Simulation held as part of the Agents World conference in Paris July 4 6 1998 The workshop was designed to bring together two developing communities the multi agent systems researchers who were the core participants at Agents World and social scientists interested in using MAS as a research tool Most of the social sciences were represented with contributions touching on sociology management science economics psychology environmental science ecology and linguistics The workshop was organised in association with SimSoc an informal group of social scientists who have arranged an irregular series of influential workshops on using simulation in the social sciences beginning in 1992 While the papers were quite heterogeneous in substantive domain and in their disciplinary origins there were several themes which recurred during the workshop One of these was considered in more depth in a round table discussion led by Jim Doran at the end of the workshop on Representing cognition for social simulation which addressed the issue of whether and how cognition should be modelled Quite divergent views were expressed with some participants denying that individual cognition needed to be modelled at all and others arguing that cognition must be at the centre of social simulation      *An Introduction to*

*Criminological Theory* Marilyn McShane,2013-09-13 First Published in 1997 This is a book about the different ways in which crime and criminal behaviour has been explained in modern times It will be seen that there are different explanations or theories which have been proposed at various times during the past 200 years by among others legal philosophers biologists psychologists sociologists and political scientists      **Contemporary Sociological Theory** Jonathan H. Turner,2012-09-20

Written by award winning scholar Jonathan H Turner this is a comprehensive in depth and detailed review of present day theory in sociology      **Reflections on Water** Joachim Blatter,Helen M. Ingram,2001 This book offers conceptual and

empirical support for the idea that the human relationship with water must move beyond rationalist definitions of water as product property and commodity      **Social Action** Gottfried Seebaß,R. Tuomela,2012-12-06 The papers contained in this

volume are based on the contributions to an international interdisciplinary Symposium entitled Analytical and Sociological Action Theories which took place in Berlin West on September 1 3 1982 Each part comprises a main paper followed by two in Part IV three papers commenting on it On the whole there is an equal division into philosophical and sociological papers In

particular each main paper receives both inter and innerdisciplinary comments The Berlin Symposium was supported by the Deutsche Forschungsgemeinschaft Bonn and to a smaller extent by the Freie UniversiHit Berlin both grants are acknowledged gratefully Berlin and Helsinki May 1984 GOTTFRIED SEEBASS RAIMO TUOMELA vii GOTTFRIED SEEBASS

INTRODUCTION I It is a striking fact that the extended efforts of both sociologists and analytical philosophers to work out what is termed a theory of action have taken little if any account of each other Yet of the various reasons for this that come to mind none appears to be such as to foil any hopes for fruitful interdisciplinary exchange Being concerned apparently with the same set of phenomena viz individual and social actions the two theories can reasonably be expected to be partially overlapping as well as competitive and complementary Accordingly each can eventually be shown by the other to need completion or revision Whether or to what extent this is the case is subject to inquiry and discussion
