Rationality Redeemed:

Rationality Redeemed? Harvey Siegel, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informal company *Money, Time and Rationality in Max Weber* Stephen Parsons, 2013-12-19 This unique study into the roots of Max Weber's Political Economy is an intriguing read and a valuable contribution to the Weberian literature Parsons argues that Weber's analysis is highly influenced by the Austrian School of Economics and the relationship between his critique of centrally planned economies and that of Mises *Christian Theology and the Secular University* Paul A. Macdonald, Jr., 2017-02-24 If the secular university by definition is non-sectarian or non-denominational then how can it accommodate a discipline like Christian theology Doesn't the traditional goal of theological study which is to attain knowledge of the divine fundamentally conflict with the main goal of secular academic study which is to attain knowledge about ourselves and the world in which we live So why should theology be admitted or even care about being admitted into secular academic life And even if theology were admitted what contribution to secular academic life could it make Working from a Christian philosophical and theological perspective but also engaging a wide range of theologians philosophers and religious studies scholars *Christian Theology and the Secular University* takes on these questions arguing that Christian theology does belong in the secular university because it provides distinct resources that the secular university needs if it is going to fulfill what should be its main epistemic and educative ends This book offers a fresh and unique perspective to scholars working in the disciplines of theology philosophy and religious studies and to those in other academic disciplines who are interested in thinking critically and creatively about the place and nature of theological study within the secular university

Wittgenstein, Education and the Problem of Rationality Michael A. Peters, 2021-01-21 This book develops an argument for a historicist and non-foundationalist notion of rationality based on an interpretation of Wittgenstein of the *Philosophical Investigations* and *On Certainty* The book examines two notions of rationality a universal versus a constitutive conception and their significance for educational theory The former advanced by analytic philosophy of education as a form of conceptual analysis is based on a mistaken reading of Wittgenstein Analytic philosophy of education used a reading of Wittgenstein's philosophy of language to set up and justify an absolute universal and ahistorical notion of rationality By contrast the book examines the underlying influence of the later Wittgenstein on the historicist turn in philosophy of science as a basis for a non-foundationalist and constitutive notion of rationality which is both historical and cultural and remains consistent with wider developments in philosophy hermeneutics and social theory This book aims to understand the philosophical motivation behind this view to examine its intellectual underpinnings and to substitute this universal conception of rationality by reference to a Hegelian interpretation of the later Wittgenstein that emphasizes his status as an anti-foundational thinker *Anyone Who Has a View* F.H. van Eemeren, J. Anthony Blair, Charles A. Willard, A. Francisca Snoeck Henkemans, 2012-12-06 This volume of the *Argumentation Library* contains a collection of twenty-six theoretical

contributions to the study of argumentation Together they provide an over view of recent developments in the theory of argumentation which does justice to the theoretical variety in the field In Anyone Who Has a View the subject of argumentation is approached from different angles Both the formal and informal logical approaches and the rhetorical and communicative approaches are represented in various ways We are convinced that the collection of essays as a whole will be of interest not only to those engaged directly in the study of argumentation but also to scholars from a variety of disciplines who are interested in the recent developments in this field The book opens with an essay by the informal logician Robert C Pinto For all the differences between them James B Freeman Harvey Siegel Ralph H Johnson Hans V Hansen and J Anthony Blair are also prominent members of that movement Some informal logicians either eschew or simply do not use formal methods in their approach to argumentation while others such as David Hitchcock use both formal and informal methods Erik C W Krabbe is a logician who proudly defends a formal dialectical approach to argumentation Daniel H Cohen Frans H van Eemeren Peter Houtlosser Fred J Kauffeld C Scott Jacobs Christian Kock Christian Plantin Sorin Stati Chris Reed Douglas N *The New Handbook of Research on Music Teaching and Learning* Richard Colwell, Carol Richardson, 2002-04-18 Featuring chapters by the world's foremost scholars in music education and cognition this handbook is a convenient collection of current research on music teaching and learning This comprehensive work includes sections on arts advocacy music and medicine teacher education and studio instruction among other subjects making it an essential reference for music education programs The original Handbook of Research on Music Teaching and Learning published in 1992 with the sponsorship of the Music Educators National Conference MENC was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field Choice This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade Notably several chapters now incorporate insights from other fields to shed light on multicultural music education gender issues in music education and non musical outcomes of music education Other chapters offer practical information on maintaining musicians health training music teachers and evaluating music education programs Philosophical issues such as musical cognition the philosophy of research theory curriculum and educating musically are also explored in relationship to policy issues In addition to surveying the literature each chapter considers the significance of the research and provides suggestions for future study Covering a broad range of topics and addressing the issues of music education at all age levels from early childhood to motivation and self regulation this handbook is an invaluable resource for music teachers researchers and scholars Transforming Critical Thinking Barbara J. Thayer-Bacon, 2000-03 Thayer Bacon argues that factors such as race gender and social status have direct bearing on philosophical inquiry by abstracting theorists from their personal and social contexts the absolutism of traditional critical thinking philosophies come into question Thayer Bacon encourages reevaluating the diversity of inquiry and suggests that

diversity is a factor which constructs philosophy *Making Sense of Education* David Carr, 2005-07-08 Making Sense of Education provides a contemporary introduction to the key issues in educational philosophy and theory Exploring major past and present conceptions of education teaching and learning this book makes philosophy of education relevant to the professional practice of teachers and student teachers as well of interest to those studying education as an academic subject The book is divided into three parts education teaching and professional practice issues concerning education the role of the teacher the relationship of educational theory to practice and the wider moral dimensions of pedagogy learning knowledge and curriculum issues concerning behaviourist and cognitive theories of learning knowledge and meaning curriculum aims and content and evaluation and assessment schooling society and culture issues of the wider social and political context of education concerning liberalism and communitarianism justice and equality differentiation authority and discipline This timely and up to date introduction assists all those studying and or working in education to appreciate the main philosophical sources of and influences on present day thinking about education teaching and learning *Becoming Historical* John Edward Toews, 2004-08-16 This book examines the ways in which selfhood and cultural solidarity came to be understood and lived as historical identities during the first half of the nineteenth century It s focus is on the Prussian capital Berlin and on the remarkable groups of artists and thinkers Karl Friedrich Schinkel Felix Mendelssohn Jacob Grimm Friedrich Karl von Savigny and Leopold von Ranke who became associated in 1840 with the cultural agenda of a regime that hoped to forge solidarity among its subjects by encouraging identification with a constructed public memory The book emphasizes both the developmental phases and the inner tensions of the program for becoming historical that was publicly articulated in 1840

Critical Theories in Education Thomas S. Popkewitz, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company **The Philosophy of Higher Education** Ronald Barnett, 2021-11-25 Providing a comprehensive introduction to the philosophy of higher education this book steps nimbly through the field leading it into new areas and advancing an imaginative ecological realism Each chapter takes the form of a short essay tackling a particular topic such as values knowledge teaching critical thinking and social justice It also examines key issues including academic freedom the digital university and the Anthropocene and draws on classic as well as contemporary texts in the field Composed of five parts the book travels on a compelling journey Part one identifies foundations of the field distinguishing between the ideas of university and higher education Part two examines key concepts including research culture academic freedom and reason Part three focuses on higher education as a set of educational practices and being a student Part four is concerned with the university as an institution and includes the matters of leadership and the spirit of the university Part five turns to the university in the world and argues for an ecological perspective Written in a lively and accessible style and ideal for anyone coming to the field for the first time but also of interest to experienced scholars this book offers sightings of new possibilities for higher education and the university **How Do You Know?** J.M. Beach, 2017-11-13 This book defines the

concept and practices of literacy through a discussion of knowledge information media culture subjectivity science communication and politics Examining the ways in which the spread of literacy and education have caused culture wars in pluralist societies since the 16th century the author reviews an interdisciplinary array of scholarly literature to contend that science and more broadly evidence based inductive arguments offer the only reliable source information and the only peaceful solution to cultural conflict in the 21st century With a focus on the multifaceted practice of literacy as communication as embedded within larger social and political processes this book offers a comprehensive study of literacy through five core topics knowledge psychology culture science and arguing over truth in pluralist democracies The central thesis of the book argues that we require a new literacy that incorporates reading and writing with advanced cognitive and epistemological skills Today s citizens need to be able to understand the basic cognitive and cultural processes through which knowledge is created and they need to know how to evaluate knowledge peacefully debate knowledge and productively use knowledge for both personal decisions and public policy How Do You Know The Epistemological Foundations of 21st Century Literacy is an interdisciplinary study that will appeal to scholars across the sciences and humanities especially those concerned with pedagogy and the science of learning Educating Reason Harvey Siegel,2013-09-27 First Published in 1988 The critical thinking movement is increasingly important in the philosophy of education Beginning from the generally accepted view that children should be taught to reason not simply to repeat what they have been told it tries to establish whether it is in fact possible to teach children a set of skills which add up to thinking Siegel here examines three major conceptions of critical thinking and then puts forward his own definition of the critical thinker as one who is appropriately moved by reasons He argues that critical thinking is a fundamental educational ideal and defends the ideal against charges of indoctrination Chapters on science education and minimum competency testing highlight its practical implications for education policy and curriculum This book should be of interest to lecturers and students of education and philosophy

Epistemic Cognition and Development David Moshman, 2014-12-05 Epistemic cognition the philosophical core of metacognition concerns people's knowledge about the justification and truth of beliefs Multiple literatures in psychology and education address aspects of epistemic cognition In the absence of a coherent conceptual framework however these literatures mostly fail to communicate with each other and often connect only loosely to genuine epistemology This complicates any effort to achieve a systematic theoretical understanding of epistemic cognition and its development Deanna Kuhn writes in her foreword Moshman is not the first to take on this challenge but he fulfills it elegantly and I think the most comprehensively and astutely After reviewing the basics of philosophical epistemology and cognitive psychology *Epistemic Cognition and Development* provides a compelling account of developmental change across childhood and beyond in knowledge about knowledge especially with regard to fundamental conceptions of objectivity subjectivity rationality justification and truth This is followed by detailed consideration of domain specific epistemologies of science logic morality social convention history and identity including associated forms of reasoning The final section provides theoretical conclusions educational and social applications and suggestions for further research

Philosophy of Education in the Era of Globalization Yvonne Raley, Gerhard Preyer, 2009-12-04 Rather than having formed a global community today's society is more fragmented than ever In light of this education faces some formidable new challenges The authors of this collection of essays explore these challenges and suggest some novel ways of dealing with them

Expertise Out of Context Robert R. Hoffman, 2007 Researchers have revealed that real expertise while applied to well defined tasks with highly circumscribed contexts often stretches beyond its routine boundaries For example a medical doctor may be called upon to diagnose a rare disease or perform emergency surgery outside his or her area of specialization because other experts are not available Moreover in some cases the context for expertise is in a constant state of flux such that no one case is identical *Expertise Out of Context* is a culmination of some of the most insightful studies conducted by researchers in the fields of cognitive systems engineering and naturalistic decision making in the effort to better understand expertise and its development Born out of the Sixth International Conference on Naturalistic Decision Making a conference that gathers researchers who study cognition perception and reasoning outside of the traditional laboratory this book is organized in five parts the first of which provides an overview of the topic and presents varied perspectives Consequent sections cover how to make sense of things tools for thinking out of context how to cope with uncertainty in a changing workplace and teams operating out of context As researchers in naturalistic decision making have investigated such areas as the knowledge and decision making skills of expert firefighters critical care nurses military commanders and aircraft pilots this volume is of importance to an expansive

audience including individuals in business government industry and society at large
