Rationing Sanity Ethical Issues In Managed Mental Health Care:

Rationing Sanity James Lindemann Nelson, 2003-12-12 Mental illness is the poor and somehow damaged cousin to physical ailments in the eyes of too many in our society Compare the difference in how people would respond to someone who had fallen and broken their leg on the street to how most react to those mentally ill among us on those same streets who spend their winters on steam grates and forage for food in dumpsters *Rationing Sanity* is a provocative analysis of the mental health care system in the United States dealing with issues of justice and access to mental health care How should a decent society affluent but facing many serious calls on its resources best care for citizens afflicted with severe and persistent mental illnesses James Lindemann Nelson brings together for the first time scholars of the ethics of mental health care and top managed care policy analysts to address this crucial problem *Rationing Sanity* integrates those perspectives with the thoughtful practice based experience of physicians well versed in the actual care of people with emotional and behavioral problems Over a period of years the contributors met face to face to engage each other on the ethics of managed mental health care the result is a unique collaborative effort that provides a wealth of important new insights on not only how Americans can readjust their attitudes toward the mentally ill but also how we may find more just and humane treatment for those afflicted

Moody Minds Distempered Jennifer Radden, 2009-01-12 In *Moody Minds Distempered* philosopher Jennifer Radden assembles several decades of her research on melancholy and depression The chapters are ordered into three categories those about intellectual and medical history of melancholy and depression those that emphasize aspects of the moral psychological and medical features of these concepts and finally those that explore the sad and apprehensive mood states long associated with melancholy and depressive subjectivity A newly written introduction maps the conceptual landscape and draws out the analytic and thematic interconnections between the chapters Radden emphasizes and develops several new themes the implications theoretical phenomenological and moral of recognizing melancholy and depressive states as mood states questions of method as they affect how we understand and characterize claims about melancholy and depression and the persistence and force of cultural tropes linking such states to brilliance creativity and sagacity Insights from literature and the history of medicine psychology and psychiatry are woven together with those from the more recent disciplines of feminist theory and cultural studies This is interdisciplinary writing at its best part analytic philosophy and part history of ideas

Clio in the Clinic Jacalyn Duffin, 2005 Twenty three physicians all accomplished historians write autobiographically about their use of history in medical practice from the making of a diagnosis to consolation encouragement

Advancing an Ethics of Evidence Maya J. Goldenberg, 2007

The Virtuous Psychiatrist Jennifer Radden, John Sadler, 2010-01-07 The context for this interdisciplinary work by a philosopher and a clinician is the psychiatric care provided to those with severe mental disorders Such a setting makes distinctive moral demands on the very character of the practitioner it is shown calling for special virtues and greater virtue than many other practice settings In a practice so

attentive to the patient's self-identity the authors promote a heightened awareness of cultural and particularly gender issues. By elucidating the nature of the moral psychology and character of the good psychiatrist this work provides a sustained application of virtue theory to clinical practice. With its roots in Aristotelian writing *The Virtuous Psychiatrist* presents virtue traits as habits able to be cultivated and enhanced through training. The book describes these traits and how they can be habituated in clinical training. A turn towards virtue theory within philosophy during the last several decades has resulted in important research on professional ethics. By approaching the ethics of psychiatric professionals in these virtue terms Radden and Sadler's work provides an original application of this theorizing to practice. Of interest to both theorists and practitioners the book explores the tension between the model of enduring character implicit in virtue theory and the segmented personae of role-specific moral responses. Clinical examples are provided based upon dramaturgical vignettes, caseplays which illustrate both the interactions of the case participants as well as the inner monologue of the clinician protagonist.

New to the Fourth Edition All chapters have been updated to reflect recent trends in healthcare including the more global focus of CQI. New introductory chapters summarize the evolution of CQI and discuss the factors influencing the application and diffusion of CQI. Several new chapters cover hot topics such as the role of the patient in CQI, social marketing as an approach to CQI, assessing risk and harm in patient care, CQI in public health organizations, quality improvement in nursing and quality improvement in resource poor countries. A new companion volume of case studies. *Handbook of Public Quality Management* Ronald J. Stupak, Peter M. Leitner, 2019-09-16 Exploring a variety of methods for improving the economic performance of organizations this multidisciplinary text covers macro and micro perspectives while considering strategic planning, systematic process analysis, leadership studies, group dynamics and human motivation theories. It highlights quality of relationships as a guiding principle within the framework of public administration and stresses customer/client and stakeholder satisfaction. With over 1000 literature references, tables, drawings and equations and appendices of laws and regulations the book responds to the mandate for high performance and increased productivity. **Perspectives on Science and Christian Faith**, 2007
