The Secret of Natural Readers Ada Anbar, 2004-10-30 It has been recognized since the 1980s that literacy begins to develop a long time before formal schooling begins In today's literate environment children start learning to read much as they learn to speak through playful print interactions with their parents older siblings or other adults beginning in year one A sharp debate about the best approach to developing early childhood literacy is now brewing between reading instruction experts who tend to advocate direct instruction of skills and preschool educators who know that preschoolers learn best through play This book provides a model for action that may help to settle the debate Interactions that involve the printed word occur spontaneously between young children and adults in the context of daily life activities This is true to a greater or lesser degree in essentially all socioeconomic and cultural environments Recognizing the critical importance of the early years for the development of literacy the National Association for the Education of Young Children NAEYC and the International Reading Association IRA formulated in 1998 a joint position statement regarding early literacy That statement

included a set of general recommendations for teaching practice But following the Bush administration's No Child Left Behind legislation of January 2002 and the establishment of the Reading First and Early Reading First programs early childhood educators are now under heavy pressure to be more specific and to issue standards or shared expectations for the literacy development of all children below kindergarten age Utilizing the actual experiences of six preschool children The Secret of Natural Readers documents the process of reading development through stories of their early years The author discusses the implications of natural reading development and its feasibility among preschoolers from different segments of the population She also spells out for parents and early childhood teachers critical information on how preschool children should learn to read

Close Reading New Media Jan van Looy, Jan Baetens, 2003 Close Reading New Media is the first publication to apply the method of close analysis to new media Since the early nineteen nineties electronic art and literature have continually gained importance in artistic and academic circles Significant critical and theoretical attention has been paid to how new media allow the text to break traditional power relations and boundaries The passive reader becomes an active participant choosing his own path and assembling not just his own interpretation of the text level of the signified but also his own text level of the signifier Texts no longer have a beginning or an ending being a web of interlinked nodes The decentered nature of electronic text empowers and invites the reader to take part in the literary process Poststructuralist theorists predicted a total liberation of textual restrictions imposed by the medium of print However while these are culturally significant claims little attention has been paid to their realization The goal of this volume is twofold Our aim is to shed light on how ideas and theories have been translated into concrete works and we want to comment on the process of close reading and how it can be applied to electronic literature While all contributions deal with particular works their aim is always to provide insight into how electronic fiction and new

media can be read This book proposes close readings of work by Mark Amerika Darren Aronofsky M D Coverley Raymond Federman Shelley Jackson Rick Pryll Geoff Ryman and Stephanie Strickland Rejoining the Common Reader Clara Claiborne Park,1991 Rejoining the Common Reader is suffused with the impulse that motivates Clara Claiborne Park s distinguished writing and teaching the desire to related literature to the experience of its readers This humane balanced and entertaining book will appeal to anyone who longs to recapture the pleasure of reading for personal enrichment and to teachers of literature who have grown to resent the intrusiveness of theory and theorizing and wish to reexamine what they are doing to for and with their students Increasing Fluency with High Frequency Word Phrases Grade 1 Timothy Rasinski,Edward Fry,Kathleen Knoblock,2007-04-12 Lay the critical foundation for reading with 20 lessons that focus on word recognition expression and fluency This resource includes quality lessons and reader response questions to master comprehension as well as fluency rubrics and reference lists
