## Real Time World:

The Real-time Contact Center Donna Fluss, 2005 New technology and best practices to turn your contact center into a revenue generator     DSP for Embedded and Real-Time Systems Robert Oshana, 2012-07-12 This book includes a range of techniques for developing digital signal processing code tips and tricks for optimizing DSP software and various options available for constructing DSP systems from numerous software components     AUUGN , 1992-02     **Realtime Data Mining** Alexander Paprotny, Michael Thess, 2013-12-03 Describing novel mathematical concepts for recommendation engines Realtime Data Mining Self Learning Techniques for Recommendation Engines features a sound mathematical framework unifying approaches based on control and learning theories tensor factorization and hierarchical methods Furthermore it presents promising results of numerous experiments on real world data The area of realtime data mining is currently developing at an exceptionally dynamic pace and realtime data mining systems are the counterpart of today's classic data mining systems Whereas the latter learn from historical data and then use it to deduce necessary actions realtime analytics systems learn and act continuously and autonomously In the vanguard of these new analytics systems are recommendation engines They are principally found on the Internet where all information is available in realtime and an immediate feedback is guaranteed This monograph appeals to computer scientists and specialists in machine learning especially from the area of recommender systems because it conveys a new way of realtime thinking by considering recommendation tasks as control theoretic problems Realtime Data Mining Self Learning Techniques for Recommendation Engines will also interest application oriented mathematicians because it consistently combines some of the most promising mathematical areas namely control theory multilevel approximation and tensor factorization     Surveillance on Screen Sébastien Lefait, 2013 The theme of surveillance has become an increasingly common element in movies and television shows perhaps as a response to the sense that the world is now virtually under watch But the recent surge of this filmic device calls for an explanation that transcends the basic assumption that media illustrates the changes of society The persistent and growing presence of surveillance in cinematic productions is not merely a reflection of the advent of surveillance societies but rather an aesthetic adaptation to the evolution of watching patterns In Surveillance on Screen Monitoring Contemporary Films and Television Programs Sébastien Lefait examines this ever increasing phenomenon Drawing on the rapidly developing field of surveillance studies Lefait offers an in depth analysis of television shows and films which complement current theoretical approaches to those subjects This unique combination of surveillance theories with the latest concepts of film television and Internet studies is based on a large and diversified range of popular series and films including the shows 24 Lost and Survivor as well as such films as Minority Report Paranormal Activity The Truman Show and the on screen version of George Orwell's Nineteen Eighty Four Written from a perspective that does not limit itself to a reflection of society approach this book explores both how cinema shapes our experience of surveillance and how surveillance influences our viewing of cinema

Lefait follows the various identifiable stages in cinema's experimental use of surveillance studying the impact of technology on both the watcher and the watched In addition to film and media studies this book will be of interest to those engaged in information technology sociology and of course surveillance studies
