Real Time Enterprise:

The Real-Time Enterprise Dimitris N. Chorafas, 2004-11-15 Successful management teams can identify the cost and return derived from the implementation of new technology and they can properly apply the technology toward gaining a competitive advantage IT and business managers alike need a resource that enables them to prepare for future operating conditions identify beneficial solutions and use high tech

The Practical Real-Time Enterprise Bernd Kuglin, Heinz Thielmann, 2005-08-15 Speed as a factor for success Our modern industrial society lives life in the fast lane The catchwords faster shorter more powerful reflect what we experience in almost all aspects of our lives Whether at home or at work we are constantly on the move and in a rush In our private lives we find rapid exchange of information most entertaining and we are fascinated by the wide range of information that pours in on us from all around the world mainly via the new media It gives us the feeling of being a part of the action everywhere and all the time Seldom are we aware that the only reason this flood of information often referred to as overstimulation does not lead to overkill is that we manage to organize our time effectively There are many parallels to this in the business world Here too a great deal of time pressure is exerted from outside goals are set ever higher and deadlines become tighter In other words demands on our time demand faster reaction Crucial information travels around the globe across all time zones in a matter of seconds In fact instead of CET or CEST it would make sense to have a single time zone for the worldwide network called GST for Global Simultaneous Time In business more so than in private life we are almost constantly online

The Concept of a Real-Time Enterprise in Manufacturing Daniel Metz, 2013-10-01 Enterprises have to react instantly to changing market conditions and disturbances that occur during execution of value creation processes Depending upon the processes context the goal is to significantly reduce lead times reaction times and time to market among others The vision of a real time enterprise RTE which is able to sense and analyze events from internal and external sources and perform adequate reactions has been envisaged by manufacturing enterprises Daniel Metz presents a framework based on EDA and CEP towards the realization of RTE in manufacturing The framework closes the vertical integration gap and further establishes feedback in near real time among enterprise levels As such the framework provides a holistic and closed loop control of manufacturing processes and encompasses results and insights from management engineering and computer science The framework has been implemented for a small and medium sized foundry in Germany The developed control approach has led to a significant increase in manufacturing processes efficiency i.e. performance quality and availability

Business Intelligence for the Real-Time Enterprise Malu Castellanos, Umeshwar Dayal, Timos Sellis, 2009-08-03 In today's competitive and highly dynamic environment analyzing data to understand how the business is performing to predict outcomes and trends and to improve the effectiveness of business processes underlying business operations has become critical The traditional approach to reporting is no longer adequate users now demand easy to use intelligent platforms and applications capable of analyzing real time business data to provide insight and actionable

information at the right time The end goal is to improve the enterprise performance by better and timelier decision making enabled by the availability of up to date high quality information As a response the notion of real time enterprise has emerged and is beginning to be recognized in the industry Gartner defines it as using up to date information getting rid of delays and using speed for competitive advantage is what the real time enterprise is all about Indeed the goal of the real time enterprise is to act on events as they happen Although there has been progress in this direction and many companies are introducing products toward making this vision a reality there is still a long way to go In particular the whole lifecycle of business intelligence requires new techniques and methodologies capable of dealing with the new requirements imposed by the real time enterprise

The Real-Time Enterprise Dimitris N. The Practical Real-Time Enterprise Bernd Kuglin, 2005-02-21 The basic idea of the real time enterprise is to become quicker A business which wants to become a real time enterprise has to acquire three main abilities Internal and external data is integrated quickly and in real time in a well organized company data pool Analyses of information in the company data pool can be obtained in real time across function boundaries and at the touch of a button The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time The issue of communications or real time communications plays a special role here Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time In other words when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted The necessity of acquiring these three abilities has implications for the process related technical and organizational aspects of a business that are dealt with in detail in this book
