Realism And Truth:

Realism and Truth Michael Devitt, 1997-01-12 In a provocative thesis philosophy professor Michael Devitt argues for a thoroughgoing realism about the common sense and scientific physical world and for a corresponding notion of truth contrary to the opinions of anti realists such as Putnam Dummett van Fraassen and others This second edition includes a new Afterword by the author

Realism and Truth Michael Devitt, 1984 In this provocative and wide ranging book Michael Devitt argues for a thoroughgoing realism about the common sense and scientific physical world and for a correspondence notion of truth Furthermore he argues that contrary to received opinion the metaphysical question of realism is distinct from and prior to any semantic question about truth The book makes incisive responses to Putnam Dummett van Fraassen and other major anti realists The new afterword includes an extensive discussion of the metaphysics of nonfactualism and new thoughts on the need for truth and on the determination of reference

Realism and the Correspondence Theory of Truth Richard Fumerton, 2002-04-25 This book is a defense of realism about truth The author argues that the most plausible version of realism is a correspondence theory of Truth that takes thought as the primary bearer of truth value Anti realists about Truth have seemed to argue that one cannot make sense of a world of truth makers that exists independently of representations of that world While it may be true that there is no Truth without minds one still needs the category of representation independent fact the author argues to serve as truth maker In embracing this form of realism the author does not want to deny the critical role that mind through its representations plays in structuring the reality that exists independently of those representations Furthermore after distinguishing realism about Truth from various sorts of metaphysical realisms the author suggests that one can embrace much of anti realist rhetoric from within the framework of a variety of plausible claims about the way in which minds do and must represent the world

Truth and Objectivity Crispin Wright, 2009-07-01 Crispin Wright offers an original perspective on the place of realism in philosophical inquiry He proposes a radically new framework for discussing the claims of the realists and the anti realists This framework rejects the classical deflationary conception of truth yet allows both disputants to respect the intuition that judgments whose status they contest are at least semantically fitted for truth and may often justifiably be regarded as true In the course of his argument Wright offers original critical discussions of many central concerns of philosophers interested in realism including the deflationary conception of truth internal realist truth scientific realism and the theoreticity of observation and the role of moral states of affairs in explanations of moral beliefs

A Realist Conception of Truth William P. Alston, 2018-10-18 One of the most important Anglo American philosophers of our time here joins the current philosophical debate about the nature of truth William P Alston formulates and defends a realist conception of truth which he calls alethic realism from aletheia Greek for truth This idea holds that the truth value of a statement belief or proposition depends on whether what the statement is about is as the statement says it is Michael Dummett and Hilary Putnam are two of the prominent and widely influential

Hunt, 2016-09-16 In this book distinguished theorist and author Shelby D Hunt analyzes the major controversies in the philosophy debates raging throughout the field of marketing Using an historical approach Hunt argues against relativism and for scientific realism as a philosophy for guiding marketing research and theory He also shows how the pursuit of truth and objectivity in marketing research are both possible and desirable Specific controversies analyzed in the book include Does positivism dominate marketing research Does positivism imply quantitative methods Is relativism an appropriate foundation for marketing research Does relativism imply pluralism tolerance and openness Should marketing pursue the goal of objective research An ideal companion to Hunt's classic text Foundations of Marketing Theory this volume will be equally useful on its own in any graduate level course on marketing theory **Realism and Antirealism** William P. Alston, 2018-08-06 Throughout the past century a debate has raged over the thesis of realism and its alternatives Realism the seemingly commonsensical view that all or most of what we encounter in the world exists and is what it is independently of human thought has been vigorously denied by such prominent intellectuals as Jacques Derrida Michel Foucault Richard Rorty Thomas Kuhn Hilary Putnam and Nelson Goodman The opponents of realism among them historians and social scientists who support social constructionism hold that all or most of reality depends on human conceptual schemes and beliefs In this volume of original essays a group of philosophers explores the ongoing controversy The book opens with an introduction by William P Alston whose writing on the subject has been widely influential Selected essays then compare and contrast aspects of the arguments put forward by the realists with those of the antirealists Other chapters discuss the importance of the debate for philosophical topics such as epistemology and for domains ranging from religion literature and science to morality *Saving the Differences* Crispin Wright, 2003 Crispin Wright's Truth and Objectivity brought about a far reaching reorientation of the metaphysical debates concerning realism and truth The essays in this companion volume prefigure elaborate or defend the proposals put forward in that landmark work The collection includes the Gareth Evans memorial lecture in which the program of Truth and Objectivity was first announced as well as all of Wright's published reactions to the extensive commentary his study provoked it presents substantial new developments and applications of the pluralistic outlook on the realism debates proposed in Truth and Objectivity and further pursues its distinctive minimalist conceptions of truth and of truth aptitude Among the papers are important discussions of coherence conceptions of truth of Hilary Putnam's most recent views on truth and of the classical debate between correspondence coherence pragmatism and deflationary conceptions of the notion Others are concerned with Kripke's famous argument against physicalist conceptions of sensation the distinction between minimal truth aptitude
