Fundamental Topics in Metaphysics Peter Loftson argues for a conception of metaphysics as the most general or comprehensive method of inquiry Working from a broadly analytic and naturalist perspective he confronts positions that claim metaphysics to be impossible as advanced in ancient Kantian post Kantian and contemporary philosophy showing them to be unsuccessful He draws the topics of his selective investigation of metaphysics partly from the work of Kant whom he conceives as a primary guide to what metaphysical enquiry seeks to know Loftson provides accounts of basic categories of what is real and outlines major historical metaphysical systems He then goes on to explore aspects of existence essence substance universals space time causality mind freedom and other topics This important contribution to metaphysics offers both sustained arguments on all aspects of the subject and important insights into the major metaphysical systems from the history of philosophy **Reality Making** Mark Jago, 2016-02-12 What makes up reality and how What kinds of entity are fundamental to reality and how do dependent entities depend on the fundamental ones How does one entity metaphysically ground another These questions are central to contemporary metaphysics The papers in this collection written by a new generation of metaphysicians address these and related questions They investigate the metaphysical concepts of grounding and fundamentality and the relationship between the fundamental and all the other parts of reality Together these papers represent the cutting edge of a central topic in contemporary metaphysics

First Philosophy III: God, Mind, and Freedom Andrew Bailey, 2004-08-06 *First Philosophy* God Mind and Freedom brings together classic and ground breaking readings on metaphysics the philosophy of mind and the philosophy of religion Mindful of the intrinsic difficulty of much of the material the editor has provided comprehensive introductions both to the central topics and to each individual selection

By providing a detailed discussion of the historical and intellectual background to each piece he aims to enable readers to approach the material without unnecessary barriers to understanding In an introductory chapter the editor provides a brief introduction to the nature of philosophical enquiry to the nature of argument and to the process of reading and writing within the academic discipline of philosophy
