Reality Prime:

Ideals and Reality Friedrich Ischebeck, Ravi A. Rao, 2005-11-22 Besides giving an introduction to Commutative Algebra the theory of commutative rings this book is devoted to the study of projective modules and the minimal number of generators of modules and ideals The notion of a module over a ring R is a generalization of that of a vector space over a field k The axioms are identical But whereas every vector space possesses a basis a module need not always have one Modules possessing a basis are called free So a finitely generated free R module is of the form R^n for some $n \in \mathbb{N}$ equipped with the usual operations A module is called projective iff it is a direct summand of a free one Especially a finitely generated R module P is projective iff there is an R module Q with $P \oplus Q \cong R^n$ for some n Remarkably enough there do exist nonfree projective modules Even there are nonfree P such that $P \oplus M \cong R^n$ for some m and n Modules P having the latter property are called stably free On the other hand there are many rings all of whose projective modules are free e.g. local rings and principal ideal domains A commutative ring is called local iff it has exactly one maximal ideal For two decades it was a challenging problem whether every projective module over the polynomial ring $k[X_1, \dots, X_n]$ is free

Is Present Reality Vipin Gupta, 2021-02-19 Is Present Reality The Super science of the transcendental value investigates our reality as an entity who has the power to shape the present and be the light that affirms our presence in the eternal future The transcendental value of the past is immanent within the present The present becomes the subject of scientific investigation The entity who conceived the scientifically investigable present is the super scientific factor whose reality transcends beyond the limits of science An observer behaves as a mirror image of the present and uses the light of self consciousness for illuminating the reality of the universe Without the observer's light the present of the universe is the dark matter Once the observer services the sentient light force the future of the observer is the black hole As a manager of our reality we have an option not to transform our sentient energy into a light force behaving as if we are the white star source of light for illuminating the reality of the universe Instead we may invest our energy for conceiving a different reality at any moment that thereafter constitutes the past Such unique reality is scientifically observable in the present as the illuminated matter The illuminated matter is a proportion of the present which is the dark matter Thus if an observer observes the illuminated matter as the rope it might as well be a body of atoms that eventually transforms into a body of cells That body of cells may be the reality of a snake What we observe and experience in the present is not necessarily the reality This work reveals the blockages that limit our vision's dimensionality and the solutions to be the reality that shapes the eternal present Dr Vipin Gupta has a Ph.D. in managerial science and applied economics from the Wharton School of the University of Pennsylvania He is a gold medalist from the Post graduate Program of the Indian Institute of Management Ahmedabad India He is a Professor of sensible management and appropriate science at the Jack H Brown College of Business and Public Administration California State University San Bernardino USA

Dispositional Reality Lorenzo Azzano, 2024-03-01 Dispositionalism perhaps the most popular variant of non Humean

metaphysics submits that dispositions powers or capacities are part of the furniture of the world In this book I advance an original approach to dispositionalism revolving around the notion of Dispositional Reality the novelty lies in the fact that the account unlike most alternatives on the market does not require the reification of objects facts properties nor their dispositional essences and is in fact compatible with a far more deflationary approach to dispositions while still being true to the non Humean spirit of the proposal This power metaphysics without powers allows one to dispel several puzzles in recent literature or recast them under a new light Albeit with its own peculiarities this proposal constitutes a variant of explanatory dispositionalism according to which realism about dispositions ought not to be understood as an ontological inflation but as an explanatory inversion within thenomic and modal family Some of these explanations are hereby attempted and a study of various types of non causal explanation will be provided Poison Reality Lord M. God and Reality Marshall Bowyer Stewart,1926 **Air Force Engineering & Services Quarterly** ,1984 [The Presidentialization of Politics](#) Thomas Poguntke,Paul Webb,2007-04-27

The Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time While these

contingent short term factors relate to the personalities of office holders the overall political agenda and the majority situation in parliament there are several structural factors which are relatively uniform across modern nations First the internationalization of modern politics which is particularly pronounced within the European Union has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control At the same time the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties In conjunction with the mediatization of politics this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters As a result three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism increasing leadership power and autonomy within the political executive increasing leadership power and autonomy within political parties and increasingly leadership centred electoral processes The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada While there are substantial cross national differences the overall thesis holds modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public Implications for democratic theory are considered
