make a semantic contribution to the things we say We inherit them from past writers and speakers and fill them with different words to produce novel utterances They shape us and the ways we interpret the world Yet prevalent assumptions about language and the constraints of print finding tools have kept linguistic forms and their histories hidden from view Drawing on recent work in cognitive and construction grammar along with tools and methods developed by corpus and computational linguists Daniel Shore's Cyberformalism represents a new way forward for digital humanities scholars seeking to understand the textual past Championing a qualitative approach to digital archives Shore uses the abstract pattern matching capacities of search engines to explore precisely those combinatory aspects of language word order syntax categorization discarded by the bag of words quantitative methods that are dominant in the digital humanities While scholars across the humanities have long explored the histories of words and phrases Shore argues that increasingly sophisticated search tools coupled with growing full text digital archives make it newly possible to study the histories of linguistic forms In so doing Shore challenges a range of received metanarratives and complicates some of the most basic concepts of literary study Touching on canonical works by Shakespeare Milton Wordsworth and Kant even as it takes the full diversity of digitized texts as its purview Cyberformalism asks scholars of literature history and culture to revise nothing less than their understanding of the linguistic sign

Profiles of Successful African-American Men Jaami Dawan, Ed.D.,2014-07-18 On a sunny Saturday morning at Chicago's Simeon Career Academy back in 2010 at a Concerned Christian Men CCM Breakfast I was engaged in a stimulating personal conversation with the late Dr William Lackland His insights rocked my world That conversation eventually inspired me to write a book This book Dr Lackland shared some of his university experiences with me The dean advised him to enroll into several remedial courses including reading and math The dean's attitude conveyed his doubts about William's ability to pass these courses much less completing the university curriculum Dr Lackland refused to let this stranger deter him from earning his Ph D in Chemistry no less Listening to Dr Lackland's story whet my appetite for other successful African American men's stories I had a strong suspicion that African American men though different in many ways are very much alike Most Black men continue to be confronted by seemingly overwhelming odds but WE persist This realization motivated me to use our experiences with success to create a directory of African American men I shared my

directory idea with friends and asked them for help It was my vision to make it a team project I got no takers Thus I changed the idea from a directory to a book Over several months I researched and read the literature about successful Black boys and men I then created an online survey to be completed by a few African American men I know The survey delved into their childhood family employment profession and the like More than fifty men of color were sent the survey by email to complete Thirteen of them completed the survey I have worked and learned from time to time with most of these men Thus I have had personal experiences with each of them I wanted to use successful African American men s life experiences as a blueprint for Black boys and young men who are striving to become successful I want them to realize that the men that they are reading about were once boys just like them **Ebony** ,2006-05 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine
