Reappraisals Peter Uwe Hohendahl, 1991 Reappraisals Peter Uwe Hohendahl, 2016-11-01 Reappraisals is a provocative account of the development of modern critical theory in Germany and the United States Focusing on the period since World War II Peter Uwe Hohendahl explores key debates on the function of critical theory illuminating the diverse positions and alliances among the participants Bringing together six essays as well as new introductory and concluding chapters Hohendahl interprets and subjects to critical scrutiny many of the central ideas of the Frankfurt School He first maps the trajectory of neomarxist criticism in Germany to the 1980s Individual chapters then focus on the work of Georg Lukacs Theodor W Adorno and Jürgen Habermas and on such issues as the politicization of German criticism after 1965 under the influence of the Frankfurt School **Critical Social Theory** Craig Browne, 2016-02-14 In this accomplished sophisticated and up to date account of the state of critical social theory today Craig Browne explores the key concepts in critical theory like critique ideology and alienation and crucially goes on to relate them to major contemporary developments such as globalization social conflict and neo liberal capitalism Critical theory here is not solely the work of Adorno Horkheimer Marcuse and Habermas The book begins with the Frankfurt School but uses this as a base to then explore more contemporary figures such as Nancy Fraser Axel Honneth Luc Boltanski Cornelius Castoriadis Ulrich Beck Anthony Giddens Pierre Bourdieu Hannah Arendt A survey of critical social theory for our times this is an essential guide for students wishing to grasp a critical understanding of social theory in the modern world **Habermas and Giddens on Praxis and Modernity** Craig Browne, 2017-01-02 In Habermas and Giddens on Praxis and Modernity Craig Browne investigates how two of the most important and influential contemporary social theorists have sought to develop the modernist visions of the constitution of society through the autonomous actions of subjects Comparing Habermas's and Giddens's conceptions of the constitution of society interpretations of the social structural impediments to subjects autonomy and attempts to delineate potentials for progressive social change within contemporary society Browne draws on his own work which has extended aspects of the social theorists approach to modernity Despite the criticisms developed over the course of the book Habermas and Giddens are found to be two of the most important theorists of democratization and social democracy the dynamics of capitalist modernity and their paradoxes social practices and reflexivity and the foundations of social theory in the problem of the relationship of social action and social structure *The Dialectical Imagination* Martin Jay, 1996-03-05 Herbert Marcuse Erich Fromm Max Horkheimer Franz Neumann Theodor Adorno Leo Lowenthal the impact of the Frankfurt School on the sociological political and cultural thought of the twentieth century has been profound *The Dialectical Imagination* is a major history of this monumental cultural and intellectual enterprise during its early years in Germany and in the United States Martin Jay has provided a substantial new preface for this edition in which he reflects on the continuing relevance of the work of the Frankfurt School **Security, Strategy, and Critical Theory** Richard Wyn Jones, 1999 Preface

Critical Theory of Axel Honneth Danielle Petherbridge, 2013-09-05 The Critical Theory of Axel Honneth provides a comprehensive study of the work of Axel Honneth tracing the theoretical trajectory from his earliest writings on philosophical anthropology to the development of a theory of recognition The book argues that Honneth's early work provides important insights for the reconstruction of the normative project of critical theory and the articulation of a conceptual framework for analyzing social relations of power and domination Danielle Petherbridge contends however that these aims are not fully realized in Honneth's more mature project and that central insights recede as his project develops Petherbridge seeks to demonstrate that the basis for an alternative theory of intersubjectivity that can account for both an adequate theory of power and normative forms of subject formation can be immanently reconstructed from within Honneth's own work By contextualizing Honneth's project in relation to its theoretical influences The Critical Theory of Axel Honneth provides a critical study and excellent entry point that will be essential reading for both students and scholars who work in the areas of European philosophy critical theory social and political philosophy or social and political theory **The**

Giannakakis, 2021-11-04 History is replete with false and unfulfilled promises as well as singular acts of courage resilience and ingenuity These episodes have led to significant changes in the way people think and act in the world or have set the stage for such transformations in the form of rational expectations in theory and the hopeful anticipations of dialectical imagination Negative Dialectics and Event Nonidentity Culture and the Historical Adequacy of Consciousness revisits some of Theodor W Adorno's most influential writings and theoretical interventions to argue not only that his philosophy is uniquely suited to bring such events into sharp relief and reflect on their entailments but also that an effective historical consciousness today would be a consciousness awake to the events that interpellate and shape it into existence More broadly Vangelis Giannakakis presents a compelling argument in support of the view that the critical theory developed by the first generation of the Frankfurt School still has much to offer in terms of both cultivating insights into contemporary human experience and building resistance against states of affairs that impede human flourishing and happiness **The Actuality**

of Adorno Max Pensky, 1997-04-24 Always resistant to classification the work of Theodor Adorno ranged from biting criticism of the emergent popular culture in the United States and Europe through theories of contemporary music and literature and sociological analyses of the rise of fascism and antisemitism in Germany and elsewhere to careful readings of

modern Continental philosophers As a leading member of the famous Frankfurt School of critical social theory Adorno influenced current discussions in cultural studies and Continental philosophy However the various dimensions of Adorno's significance for the range of contemporary postmodern theory remained unclear This book demonstrates the relevance and power of Adorno's work for the state of critical social theory today
