required by an ever more complex and dynamic society Conceptual structures research focuses on what is behind and between the data glut and the information overload that need to be overcome in answering this question In this way our editor contributes important ideas on how to actually realize some of the many still ambitious visions All regular papers were reviewed in a thorough and open process by at least two reviewers and one editor

Conceptual Graphs and Fuzzy Logic Tru Hoang Cao, 2010-07-17 In this volume first we formulate a framework of fuzzy types to represent both partial truth and uncertainty about concept and relation types in conceptual graphs Like fuzzy attribute values fuzzy types also form a lattice laying a common ground for lattice based computation of fuzzy granules Second for automated reasoning with fuzzy conceptual graphs we develop foundations of order sorted fuzzy set logic programming extending the theory of annotated logic programs of Kifer and Subrahmanian 1992 Third we show some recent applications of fuzzy conceptual graphs to modelling and computing with generally quantified statements approximate knowledge retrieval and natural language query understanding
