Recapitalization Of Banks In Transition Economies:

Designing Financial Systems in Transition Economies Anna Meyendorff, Anjan V. Thakor, 2002 This collection examines the design of financial systems for central and eastern European countries engaged in the transition to market based economies It highlights the need for better approaches to measuring performance and providing incentives in banking and for financial mechanisms to encourage private sector growth Written by leading European and North American scholars the essays apply modern finance theory and empirical data to the development of new financial sectors **Central Bank Reform in the Transition Economies** International Monetary Fund, 1997-05-01 Since 1992 the central banks of the Baltic states and the Commonwealth of Independent States have undertaken comprehensive reform of their monetary and exchange arrangements in support of their stabilization efforts Their efforts have been supported by extensive technical assistance provided by the IMF and 23 central banks This book edited by V Sundararajan Arne B Peterson and Gabriel Sensenbrenner contains the background papers prepared for the second joint coordinating meeting of participants That meeting focused on the progress of structural reforms in central banking and bank restructuring and identified priorities for the deepening of reforms The book documents the remarkable progress achieved by the Baltic and CIS central banks and the catalytic role they have played in financial market development *Financial Policies in Socialist Countries in Transition*, *Preventing Bank Crises* Gerard Caprio, 1998 Trata de como prevenir a crise nos bancos estudando v rios casos de bancos que quebraram no mundo **East-Central European Economies in Transition**, 1994 Distributed to some depository libraries in microfiche **East-Central European Economies in Transition** United States. Congress. Joint Economic Committee, 1995 A collection of papers assessing what has been accomplished and the obstacles that remain in the transition from communism to capitalism in East Central Europe The papers are arranged within four sections the transition to market economies and political pluralism Western assistance and integration regional relations and country studies Each section begins with an overview This assessment was initiated by a formal request from the Joint Economic Committee of the US Congress to the Congressional Research Service Some of the papers were discussed in May 1994 at a conference in Washington DC A compilation of statistical material prepared for the conference is included as an appendix Annotation copyright by Book News Inc Portland OR *Balance of Payments, Exchange Rates, and Competitiveness in Transition Economies* Mario I. Blejer, Marko Skreb, 2007-08-23 Integrating transition economies into the global commercial and trade market system is a prolonged and risky process This book is a collection of studies dealing with the different issues related to the liberalization of external relations in economies moving from a socialist to a market based system The focus is on external sector developments and the topics deal with balance of payments conditions exchange rate policies and regimes international competitiveness international capital flows trade and other matters related to the integration of transition economies into the world economy An understanding of the principles involved and of the experiences of both transition and

advanced economies during this process is crucial to ensure its ultimate success. Written by internationally recognized scholars, the chapters cover these issues in a systematic manner. The first section treats current account developments, capital flows, and exchange rate policies in transition countries; the second section deals with specific issues related to international trade; and the final section consists of six specific country experiences. In this final section, a chapter dealing with the Russian Federation discusses the collapse of the ruble in August 1998.

The Economics of Bank Bankruptcy Law Matej Marinč, Razvan Vlahu, 2011-09-18. This book shows that a special bank bankruptcy regime is desirable for the efficient restructuring and/or liquidation of distressed banks. It explores in detail both the principal features of corporate bankruptcy law and the specific characteristics of banks, including the importance of public confidence, negative externalities of bank failures, fragmented regulatory framework, bank opaqueness, and the related asset substitution problem and liquidity provision. These features distinguish banks from other corporations and are largely neglected in corporate bankruptcy law. The authors, an assistant professor for money and finance and a research economist at the Dutch Central Bank, propose changes in both prudential regulation and reorganization policies that should allow regulators and banking authorities to better mitigate disruptions in the financial system and minimize the social costs of bank failures. Their recommendations are complemented by a discussion of bank failures from the 2007-2009 financial crisis.

When is Transition Over? Annette N. Brown, 1999. Contains six lectures which discuss criteria for determining the end of the transition process. These include changes in the characteristics of the economic system, outcomes of the transition process, and institutional reforms.

Debt as a Control Device in Transitional Economies Herbert L. Baer, Cheryl Williamson Gray, 1995.
