Abstract

This paper explored America's foreign policy from a brief perspective, going back to history, and refreshing the readers' minds on what America's foreign policy entails, and the storyline of the American state during WW1, and after WW2. This period saw America withdrawing from non-interventionism to interventionism in other states' affairs. The study outlined the shapers of America's foreign policy, and her national interest. Lastly, the study discovered that America controls the international arena through; the use of diplomacy, the United Nations, military capabilities, economic aid, international monetary fund, and a collective security system. The paper made use of the secondary source of data collection to get reference materials for the study. In the application of a suitable theory as the basis of analysis, the manifest destiny theory was adopted, which portrays America's presence in the internal system as an ordinance from God, and as such; the ability to shape world affairs becomes imminent and justifiable.

Key Words: *America, Exploration, Fundamentals, Foreign, Policy.*

Introduction

America's foreign policy is strutted in history and controversies. Foreign policy as a tenant in international state relations is designed to encompass and dictate the tune in which a state adopts while in dealings with other states. The national interest of a state is often put forward while adopting a foreign policy posture. National interest supersedes all forms of interest, and it is the sole objective when two or more states are in relation. Certain variables are major determinants when a state's foreign policies are to be adopted. These determinants cut across both internal and external factors. The internal factors are occurrences within the state that influence foreign policy, while external factors are drawn outside the state. Foreign policy can be traced back to the 1648 Treaty of Westphalia. The Westphalia Treaty which also refers to the Peace of Westphalia is often seen by scholars in both history and the field of international relations to be the basis for many modern international laws and professional diplomacy (Patton, 2019). This served as a turning point toward the recognition of sovereignty accorded to states, and as such, formal diplomatic ties started.

America's Foreign Policy as a case in point has undergone some faces such as before and after the world war era. The fundamentality of America's foreign policy is built based on citizens' consent and acceptability. Also, the period of World War 1, made America adopt a non-interference in European affairs foreign policy posture, but later it went beyond that as they feared for Adolf Hitler's movement to conquer the world was on the match. With the end of World War 1, the struggle for world dominance was imminent, as America preached the gospel of containment against the USSR's communism. This later came to an end in 1992 with the

Lend-Lease program for America's entry into the war but supported it nevertheless. By late 1941 the Women's Division of the Fight for Freedom Committee had been established no longer merely advocating aid to Britain to keep American boys out of battle; this organization supported direct American involvement in the war as a means of stopping Nazi oppression. While most historians have focused on women's pacifism, Paton Walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs. *Our War Too* is a story of American women trying to reconcile the irreconcilable to preserve both their principles and their peace. It expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on American public opinion over the build-up to the war.
